<i>Foreword</i>	<i>v</i>
<i>Preface</i>	<i>vii</i>
<i>Reviewers for Different Sections</i>	<i>ix</i>
<i>Acknowledgments</i>	<i>xi</i>

Section I: General Topics **1–112**

1. Learning Morphology in Hematology	3
2. The Laboratory-Clinician Interactionn	9
3. Expectations from a Postgraduate Pathology Student	14
4. How to Approach the MD Pathology (Hematology) Examination	22
5. Approach to Peripheral Blood Smear Reporting	35
6. Common Artifacts in the Peripheral Blood Smear	43
7. Bias in Hematology Reporting	53
8. Automated Hematology Analyzers: Basics	58
9. Automated and Manual Cell Counts	66
10. Newer (Novel) Automated Parameters	72
11. Routine Stains in Hematology	80
12. Diurnal Variations in CBC Parameters	88
13. 'g' Value and RPM in Centrifugation	93
14. Handling Hemolyzed Samples	98
15. Issues with Pediatric (including Neonatal) Samples	102
16. Massive Splenomegaly	108

Section II: Red Blood Cells **113–214**

17. Assessing Hypochromia and Hyperchromia	115
18. Elliptocytosis in the Peripheral Blood	121
19. Spherocytes, Microspherocytes and Irregularly Contracted Cells	125
20. Schistocytes: Identification and Reporting	133
21. Bite and Blister Cells	141
22. Nucleated RBCs and Polychromasia	146
23. Handling RBC Agglutination	152
24. Rouleaux Formation	158
25. Leukoerythroblastic Anemia/Picture	162
26. Mentzer Index	167
27. Understanding Red Cell Distribution width	171
28. Reticulocyte Count and Related Parameters	178

29. Erythrocyte Sedimentation Rate	185
30. Approach to Hemolytic Anemia	189
31. Interpretation of Plasma Hemoglobin Testing	197
32. Interpretation of Sickling Test	202
33. Interpretation of Osmotic Fragility Test	208

Section III: White Blood Cells **215–326**

34. Performing the Differential Leukocyte Count	217
35. Morphological Dilemmas in the Peripheral Blood Smear: White Blood Cells	224
36. Left Shift: Significance and Reporting	234
37. Atypical Lymphocytes: Significance and Reporting	241
38. Reporting Blasts and Blast Equivalents	248
39. Acute Promyelocytic Leukemia	261
40. Acute Monocytic Leukemia	270
41. Hairy Cell Leukemia	278
42. Interpretation of Myeloperoxidase Stain	287
43. Interpretation of Periodic Acid Schiff Stain	293
44. Interpretation of Neutrophil/Leucocyte Alkaline Phosphatase Score	297
45. Smudge Cells: Significance and Reporting	302
46. Lupus Erythematosus Cell	306
47. Myeloproliferative Neoplasms: Broad Approach	310

Sction IV: Platelets **327–352**

48. Platelet Counts: Reporting Dilemmas	329
49. Role of Platelet Histogram in Platelet Counting	337
50. Handling EDTA-induced Pseudothrombocytopenia	342
51. When to Suspect Inherited Macrothrombocytopenia?	348

Section V: Coagulation **353–400**

52. Approach to Diagnosis of Coagulation Disorders	355
53. Pre-analytic Variables in Coagulation Testing	361
54. Bleeding and Clotting Time	367
55. Prolonged and Shortened Prothrombin Time and Activated Partial Thromboplastin Time	372
56. Citrate Correction in Coagulation Testing	377
57. Mixing Studies in Coagulation Testing	382
58. Basics of Factor Assays	389
59. D-dimer: Interpretation and Fallacies	397

Section VI: Bone Marrow**401–592**

60. Components of a Bone Marrow Report	403
61. Why does Bone Marrow Appear Difficult to Report?	410
62. Types of Bone Marrow Aspirate Smears	415
63. Bone Marrow Dry Tap	423
64. Bone Marrow Cellularity: Assessment and Pitfalls	429
65. Megakaryocyte Assessment in Bone Marrow	435
66. Myeloid to Erythroid (M:E) Ratio in Bone Marrow Aspirate Smears	446
67. Common Morphological Dilemmas in Bone Marrow Reporting	452
68. Assessing Dysplasia in Myelodysplastic Syndromes	462
69. Ineffective Erythropoiesis and Hematopoiesis	476
70. Focal Diseases of the Bone Marrow: Broad Approach	483
71. Reporting Bone Marrow in Aplastic Anemia	489
72. Bone Marrow Plasmacytosis: Interpretation	498
73. Bone Marrow Morphology in Multiple Myeloma	505
74. Morphology of Bone Marrow Trephine Biopsy	514
75. Bone Marrow Touch Imprints	528
76. Clot Section in Bone Marrow Examination	532
77. Patterns of Lymphomatous Infiltration in Trephine Biopsy	538
78. Gelatinous Marrow Transformation	545
79. Bone Marrow Iron Stores	551
80. Bone Marrow Fibrosis	558
81. Osteosclerosis: Causes and Morphology	566
82. Hemophagocytosis: Identification and Relevance	571
83. Hematogones: Identification and Relevance	580
84. Effect of Blood Transfusion on CBC and Bone Marrow Morphology	587
