<i>Foreword</i> .....	v
<i>Preface</i> .....	vii
1. History of Plant Cell Cultures .....	1
2. Laboratory Facilities .....	6
3. Aseptic Transfer .....	12
4. Nutritional Requirements of Plant Cell Cultures .....	18
5. Initiation and Maintenance of Callus and Suspension Cultures .....	42
6. Secondary Metabolic Products (Phytopharmaceuticals) from Plant Cell Cultures .....	49
7. Effect of Cultural Practices on Production of Secondary Metabolites .....	121
8. Selection and Screening of Cultured Plant Cells .....	130
9. Biogenesis of Phytopharmaceuticals .....	138
10. Biotransformation Using Plant Cell Cultures .....	208
11. Immobilization of Plant Cells .....	254
12. Elicitation .....	270
13. Organogenesis and Regeneration in vitro .....	294
14. Somaclonal Variation and Genetic Instability in Plant Cell Cultures .....	298
15. Isolation, Culture and Regeneration of Protoplasts .....	311
16. Micropropagation .....	326
17. Synthetic Seeds .....	336
18. Transgenic Plants .....	348
19. Hairy Root Cultures .....	377
20. Large Scale Cultivation of Plant Cells Using Bioreactors .....	420
21. In-situ Adsorption, Two-Phase and Two-Stage Cultures .....	474
22. Cryopreservation and Germplasm .....	486
<i>Index</i> .....	495
