Foreword by Dr B Suresh

vii

Preface

ix

Section 1: PHARMACOGNOSY

1. Introduction to Pharmacognosy	2	17. Pharmaceutical Aids	224
2. Sources and Classification of Crude Drugs	5	18. Toxic Drugs	232
3. Factors Influencing Quality of Crude Drugs	9	19. Enzymes	240
4. Techniques in Microscopy	20	20. Natural Pesticides and Insecticides	249
5. Introduction to Phytoconstituents (Carbohydrates, Glycosides, Alkaloids, Terpenoids, Volatile Oils and Resins, Lipids)	21	21. Adulteration and Evaluation of Drugs	256
6. Principles of Plant Classification	88	22. Quantitative Microscopic Evaluation	257
7. Biogenetic Pathways	130	23. Drugs Containing Carbohydrates and Lipids, Tannins, Volatile Oils, Resinous Drugs, Glycosides and Alkaloids	272
8. Herbal Formulations	159	24. Quality Control and Standardization of Herbal Drugs	281
9. Plant Tissue Culture	162	25. Traditional Herbal Drugs	286
10. Herbal Cosmetics	174	26. Ayurvedic and Homeopathic Systems of Medicine	288
11. Patents	177	27. Isolation, Identification and Analysis of Phytoconstituents	291
12. Herbal Excipients	181	28. Modern Methods of Extraction and Isolation	308
13. Marine Drugs	193	29. Plant Secondary Metabolites	323
14. Animal Products	197	30. Plant Based Industries and Research Institutes in India	341
15. Plant Products	200	31. Worldwide Trade in Medicinal Plants	344
16. Herbal Drug Interaction and WHO Guidelines for Assessment of Herbal Drugs	208		

Section 2: BIOTECHNOLOGY

1. Introduction to Biotechnology	348	8. Animal Cell Culture	386
2. Plant Cell Structure	353	9. Fermentation Technology	388
3. Deoxyribonucleic Acid	362	10. Recombinant DNA Technology	392
4. Genes	367	11. Biotechnology-derived Products, Sources, Upstream and Downstream Processing	406
5. Chromosomes	370	12. Important Tables and Concepts	417
6. Cell and Tissue Culture	373		
7. Enzymes	375		

Section 3: MICROBIOLOGY

1. Introduction to Microbiology	426	8. Fungi and Viruses	463
2. Scope and Applications of Microbiology in Pharmacy	427	9. Aseptic Technique	474
3. Germ Theory of Fermentation	430	10. Sterilization and Disinfection	475
4. Microscopy	435	11. Microbial Spoilage of Pharmaceutical Products: Types and Factors Affecting Spoilage	482
5. Bacteria	444	12. Vaccines and Sera	485
6. Staining Methods	449	13. Microbial Assay	495
7. Biology of Microorganisms	455	14. Important Terminology, Tables and Figures	500
<i>Bibliography</i>			516
