<i>Preface</i>	v
<i>Syllabus</i>	ix
<i>Guidelines for Teachers and Students</i>	xi
Experiment 1: Study of Compound Microscope	1
Experiment 2: General Technique for Blood Collection	5
Experiment 3: Microscopic Examination of Muscular and Nervous Tissues	9
Experiment 4: Microscopic Examination of Epithelial and Connective Tissues	12
Experiment 5: Microscopic Examination and Gross Anatomy of Bones	16
Experiment 6: Blood Group	41
Experiment 7: Erythrocyte Sedimentation Rate (ESR) of One's Own Blood	45
Experiment 8: Estimation of Haemoglobin	48
Experiment 9: Bleeding Time	54
Experiment 10: Clotting Time of a Subject	57
Experiment 11: White Blood Cell Count of a Blood Specimen	59
Experiment 12: Number of Red Blood Cells in One Cubic Millimetre of Blood	62
Experiment 13: Differential White Blood Cell Count/Differential Leucocytes Count	66
Experiment 14: Measuring the Blood Pressure by Using a Sphygmomanometer	70
Experiment 15: Recording of Body Temperature, Requirement of Clinical Thermometer	75
Experiment 16: Heart and Pulse Rate of the Patients	79
Experiment 17: Tidal Volume and Vital Function	82
Experiment 18: Recording Pulse Oxygen	84
Experiment 19: Basal Mass Index	87
Experiment 20: Study of Cardiovascular System	89
Experiment 21: Study of Respiratory System	93

Experiment 22: Study of Digestive System	96
Experiment 23: Study of Urinary System	100
Experiment 24: Study of Endocrine System	105
Experiment 25: Study of Reproductive System	109
Experiment 26: Study of Nervous System	114
Experiment 27: Study of Human Eye	120
Experiment 28: Study of Human Ear	122
Experiment 29: Study of Human Skin	124
