<i>Foreword by Dr B Suresh</i>	<i>vii</i>
<i>Foreword by Dr GD Gupta</i>	<i>ix</i>
<i>Preface</i>	<i>xi</i>

Section 1: PHARMACEUTICAL CHEMISTRY

PHARMACEUTICAL INORGANIC CHEMISTRY			
1. Pharmaceutical Impurities	2	7. Various Classes of Therapeutic Agents	45
2. Monographs	7	8. Different Classes of Therapeutic Drugs	87
3. Isotopes	11	9. Quantitative Structure–Activity Relationship	118
4. Dentrifrices, Desensitizing Agents, and Anticaries Agents	16	10. Asymmetric Synthesis, Chirality, Chiral Pool, Sources of Various Naturally Available Chiral Compounds	127
MEDICINAL CHEMISTRY			
5. Therapeutic Class of Drugs	23	11. Combinatorial Chemistry	129
6. Cardiovascular Drugs	40		

Section 2: BIOCHEMISTRY

1. Cell	134	6. Biological Oxidation and Reduction	187
2. Carbohydrates	139	7. Enzymes	191
3. Proteins	159	8. Nucleic Acids	208
4. Lipids	172	9. Hereditary Diseases	227
5. Vitamins	178	10. Important Biochemistry Pathways	232

Section 3: PHYSICAL CHEMISTRY

1. Composition and Physical States of Matter	240	5. Solutions	274
2. Colligative Properties	250	6. Electrochemistry	283
3. Thermodynamics	265	7. Ionic Equilibrium	288
4. Refractive Index	273	8. Kinetics	290
		9. Phase Rule	292

Section 4: PHARMACEUTICAL ANALYSIS

1. Importance of Quality Control in Pharmacy	296	9. Potentiometry	358
2. Acid–Base Titration	296	10. Miscellaneous Methods of Analysis	362
3. Nonaqueous Titration	315	11. Calibration	369
4. Oxidation–Reduction Titration	321	12. General Principle of Spectroscopy	376
5. Precipitation Titration	335	13. Ultraviolet-visible Spectroscopy	382
6. Complexometric Titration	342	14. Spectrofluorimetry	398
7. Gravimetry	348	15. Flame Photometry and Atomic Absorption Spectroscopy	406
8. Extraction Techniques	354	16. Infrared Spectroscopy	412

17. Proton Nuclear Magnetic Resonance Spectrometry	423	20. Nephelometry and Turbidimetry	445
18. Mass Spectroscopy	434	21. Chromatography	451
19. Polarography	441	22. Electrophoresis	462

Section 5: ORGANIC CHEMISTRY

1. General Principles	472	8. Heterocyclic Compounds	519
2. Different Classes of Compounds	476	9. Bridged Rings	527
3. Protection and Deprotection of Groups	485	10. Kinetic and Thermodynamic Control in Organic Reactions	530
4. Aromaticity and Chemistry of Aromatic Compounds	490	11. Stereochemistry	532
5. Different Aromatic Classes of Compounds	494	12. Carbohydrates	538
6. Polycyclic Aromatic Hydrocarbons	504	13. Amino Acids and Proteins	541
7. Carbonyl Chemistry	508	14. Pericyclic Reactions	542

<i>Bibliography</i>	550
