Preface to the Third Edition

vii

Preface to the First Edition

ix

1. General Considerations of Bone 1

- Properties 1
- Functions 1
- Chemical composition 1
- Structure of bone 1
- Classification of bones 3
- Blood supply of bones 4
- Applied anatomy of bones 5

2. Skull: General Features 7

- Introduction 7
- Neurocranium 8
- Facial skeleton (viscerocranium or splanchnocranium) 8
- Anatomical position of skull 8
- Applied anatomy 9

3. Exterior of the Skull 11

- Norma verticalis 11
- Norma occipitalis 13
- Norma frontalis 15
- Norma lateralis 19
- Norma basalis 23

4. Orbital Cavity 33

- Definition 33
- Shape and parts 33
- Bony contributions 33
- Communications 34
- Measurements 35
- Features 36
- Applied anatomy 38

5. Nasal Cavity 40

- Features 40
- Applied anatomy 42

6. Interior of the Cranial Vault 44

- Definition 44
- Shape 44
- Bones 44
- Sutures 44
- Features 44
- Applied anatomy 45

7. Interior of the Base of the Skull 46

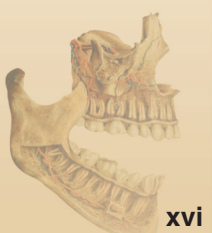

- Definition 46
- Subdivisions 46
 - I. Anterior cranial fossa 46
 - II. Middle cranial fossa 48
 - III. Posterior cranial fossa 51
- Applied anatomy 54

8. Mandible 56

- Peculiarities 56
- Features and attachments 56
- Ossification 61
- Age changes in mandible 61
- Applied anatomy 62

9. Dental Anatomy 66

- Introduction 66
- General arrangement 66
- Dental formula 67
- Clinical notation system 67
- Morphology of permanent teeth 70

Eruption of teeth	72		
Functions of teeth	72		
Structure of tooth	73		
Occlusion	74		
Applied anatomy	75		
10. Maxillae	77		
Location	77		
Features and attachments	77		
Ossification	80		
Age changes in maxilla	80		
Applied anatomy	80		
11. Parietal Bones	83		
Side determination	83		
Features and attachments	83		
Ossification	85		
Age changes	85		
Applied anatomy	85		
12. Frontal Bone	87		
Location	87		
Features and attachments	87		
Ossification	90		
Applied anatomy	90		
13. Temporal Bones	92		
Side determination	92		
Features and attachments	92		
Spaces and canals	99		
I. External acoustic meatus	99		
II. Middle ear space (tympanic cavity)	100		
III. Mastoid antrum	102		
IV. Mastoid air cells	102		
V. Bony labyrinth (osseous labyrinth)	103		
Ossification	105		
Applied anatomy	105		
14. Auditory Ossicles	107		
Terminology	107		
Features and attachments	107		
I. Malleus	107		
II. Incus	108		
III. Stapes	108		
Ossification	108		
Functions	108		
Applied anatomy	108		
15. Occipital Bone	110		
Locations	110		
Features and attachments	110		
Ossification	114		
Applied anatomy	115		
16. Zygomatic Bones	116		
Terminology	116		
Features and attachments	116		
Ossification	118		
Applied anatomy	118		
17. Nasal Bones	120		
Location	120		
Features and attachments	120		
Ossification	121		
Applied anatomy	121		
18. Lacrimal Bones	123		
Terminology	123		
Peculiarities	123		
Location	123		
Features and attachments	123		
Ossification	124		
Applied anatomy	124		
19. Ethmoid Bone	126		
Terminology	126		
Location	126		
Features and attachments	126		
Ossification	128		
Applied anatomy	128		
20. Inferior Nasal Conchae	130		
Terminology	130		
Location	130		
Features and attachments	130		
Ossification	131		
Applied anatomy	131		

21. Vomer	132	Second cervical vertebra	158
Terminology	132	Seventh cervical vertebra	159
Location	132	II. Thoracic vertebrae	160
Features and attachments	132	III. Lumbar vertebrae	160
Ossification	133	IV. Sacrum	161
Applied anatomy	133	V. Coccyx	161
22. Sphenoid Bone	135	26. Sternum	163
Terminology	135	Terminology	163
Anatomical position	135	Features	163
Articulations	135	I. Manubrium	163
Shape	135	II. Body	165
Features and attachments	135	III. Xiphoid process	165
Ossification	141	27. Ribs	166
Applied anatomy	142	General considerations	166
23. Palatine Bones	143	First rib	167
Terminology	143	28. Bony Pelvis	170
Location	143	Terminology	170
Features and attachments	143	Pelvic girdle	170
Ossification	146	Divisions of pelvis	171
Applied anatomy	146	29. Ossification at a Glance	172
24. Hyoid	148	Definition	172
Location	148	Centre of ossification	172
Features and attachments	148	Primary and secondary centres	172
Ossification	150	Fusion of ossification centres	172
Applied anatomy	150	Fusion between adjacent bones	172
25. Vertebrae	151	Clinical significance	172
General considerations	151	Cartilaginous nasal capsule	172
Curvatures of vertebral column	152	Ossification of mandible, hyoid, parietal bone and frontal bone	174
Movements of vertebral column	152	Ossification of occipital bone and sphenoid	175
Features of a typical vertebra	152	Ossification of temporal bone, palatine bone, lacrimal bone, zygomatic bone and maxilla	176
Distinguishing features	153	Fate of cartilaginous nasal capsule	177
I. Cervical vertebrae	153	<i>Index</i>	<i>179</i>
A. Typical cervical vertebra	154		
B. Atypical cervical vertebrae	156		
First cervical vertebra	156
