Preface

v

Section 1: FOUNDATION

1. Introduction to CBC	2
2. Basics of Hematopoiesis: How the CBC is Born	5
3. Blood Collection	10
4. Hematology Analyzers	14

Section 2: RED BLOOD CELL PARAMETERS

5. Hemoglobin, Hematocrit and Red Cell Count	22
6. Red Cell Indices (MCV, MCH, MCHC and RDW)	27
7. CBC and Peripheral Smear	35
8. Approach to Anemia Using CBC	39
9. Polycythemia and Erythrocytosis	45

Section 3: WHITE BLOOD CELLS AND DIFFERENTIAL COUNT

10. Total Leukocyte Count	54
11. Neutrophils: Left Shift, Toxic Changes and Neutropenia	63
12. Lymphocytes: Reactive and Pathological Patterns	73
13. Eosinophils and Basophils	83
14. Monocytes and Other Uncommon Circulating Cells	94
15. Differential Leukocyte Count	103

Section 4: PLATELETS AND HEMOSTASIS EVALUATION

16. Platelet Counts and Indices (MPV, PDW and PCT)	114
17. Thrombocytopenia: Mechanisms and Diagnostic Approach	122
18. Thrombocytosis: Reactive vs Primary Causes	130
19. CBC Clues to Platelet Function Disorders	139

Section 5: INTEGRATED CBC INTERPRETATION

20. CBC Patterns in Infections	146
21. CBC in Inflammatory, Autoimmune and Malignant Disorders	153
22. CBC in Nutritional Deficiencies and Chronic Diseases	158

23. CBC in Pediatrics and Geriatrics	167
24. CBC in Pregnancy and Special Physiological States	171

Section 6: ADVANCED AND EXTENDED PARAMETERS

25. Scatterplots and Histograms in CBC	178
26. Spurious CBC Results: Causes and Recognition	196
27. Analyzer Errors vs True Pathology	201
28. When to Review and When to Repeat the Peripheral Smear	206
29. Interpreting a CBC Report	209
