

Contents

<i>Preface to Eighth Edition</i>	vii
Chapter 1. Introduction	1
Stages in Taxonomy	3
Importance of Taxonomy	4
Problems of Taxonomists	11
Aims and Tasks of a Taxonomist	12
Taxonomy as a Profession	13
Chapter 2. Taxonomy and Biodiversity	19
Taxonomy	19
Taxonomic Organisations in Support of Biodiversity	22
Biodiversity	24
Importance of Biodiversity	26
Benefits of Biodiversity	27
Conservation of Biodiversity	34
Threat to Biodiversity	35
Ozone and Biodiversity	36
Degradation of Ecosystems and Biodiversity Loss	41
Gain in Biodiversity	43
Marine Biodiversity	44
Biodiversity Awareness	46
New Techniques and Biodiversity Preservation	50
Role of United Nations in Biodiversity	50
Support to Biodiversity	52
National Biodiversity Authority	53

Agricultural Biodiversity	53
Carbon Credits	55
Chapter 3. Rise of Taxonomy	63
Chapter 4. Newer Trends in Taxonomy	71
Morphological Approach	71
Immature Stages and Embryological Approach	76
Ecological Approach	78
Behavioural Approach	79
Cytological Approach	81
Biochemical Approach	89
Numerical Taxonomy	97
Differential Systematics	100
Conclusion	101
Chapter 5. Zoological Classification	103
Kinds of Classifications	104
Phyletic Lineages	110
Components of Classification	113
Linnaean Hierarchy	114
Chapter 6. Concept of Species	117
Typological Species Concept	119
Nominalistic Species Concept	119
Biological Species Concept	120
Evolutionary Species Concept	123
Phylogenetic Species Concept	124
Recognition Species Concept	124
Ecological Species Concept	125
Genotypic Cluster Species Concept	125
Cohesion Species Concept	126
Genic Species Concept	126
Differential Fitness Species Concept	127
Conclusions	127
How Many Species?	129
Other Kinds of Species	130
Polytypic Species	134
Subspecies	135
Other Intraspecific Groups	139
Superspecies	141

Chapter 7. Taxonomic Collection—Identification— Description and Publication	134
Species Registry	148
Collecting Ways	151
Data of Collection	166
Preservation of Collected Material	166
Curating	167
Preparation of Specimens	167
Relaxing Insects	168
Mounting	169
Storage	175
Cataloguing of Specimens	176
Arrangement of the Specimens	177
Maintaining Quality of Collection	177
Identification	178
Methods of Identification	179
Problems Encountered in Identification	196
Sending Insects and other Arthropods by Mail	197
Description	202
Subjects of Description	203
Taxonomic Characters	203
Future of Descriptive Taxonomy	205
Taxonomic Publications	205
Preparation of Taxonomic Publications	210
Taxonomic Paper	213
Chapter 8. Reference Works in Taxonomy	215
Zoological Record	215
Literature Earlier to Zoological Record	218
Biological Abstracts	219
Dissertation Abstracts	219
Nomenclator Zoologicus	220
The Century of Dictionary	220
Directories	220
Entomology Abstracts	221
Helminthology Abstracts	221
Protozoological Abstracts	221
Review of Agricultural Entomology	221
Review of Medical and Veterinary Entomology	222
Agrindex	222
Bibliography of Agriculture with Subject Index	223

Publications of International Commission on Zoological Nomenclature	223
Guides to Journals	225
Books	226
Latin and Greek Terminology in Taxonomy	227
Latin Abbreviations	227
Latin Words	229
Linnaean Signs	229
Taxonomy and Biodiversity on the Web	229
Chapter 9. Zoological Nomenclature	235

Origin of the Code	236
Biocode	239
Phylocode	240
International Code of Zoological Nomenclature	242
Rules of Nomenclature	243
Electronic Publication	271
<i>References</i>	273
<i>Glossary</i>	307
<i>Index</i>	325
