1. INTRODUCTION	1-34
1.1 Introduction	1
1.2 Number System	1
1.3 Interval	2
1.4 Concept of Sets	3
1.5 Types of Sets	6
1.6 Subset	8
1.7 Universal Set	9
1.8 Venn Diagrams	12
1.9 Operations on Sets	12
1.10 Some Results on Venn diagrams	20
1.11 Ordered Pair	21
1.12 Relation	27
1.13 Classification of Relations	29
1.14 Functions	37
1.15 Types of Functions	38
1.16 Boundedness of a Subset of Real Numbers	45
1.17 Supremum and Infimum of a Set	46
1.18 Sequences	49
2. COUNTABILITY	57-84
2.1 Introduction	57
2.2 Cardinally Equivalent Sets	57
2.3 Cardinal Number	57
2.4 Algebra of Cardinal Numbers	58
2.5 Countable Sets	59
2.6 Algebraic Numbers	60
2.7 Transcendental Number	72
2.8 Continuum Hypothesis	72
2.9 Cantor-like Sets	82
3. TOPOLOGY OF REAL NUMBERS	85-118
3.1 Introduction	85
3.2 Neighbourhood of a Point	85
3.3 Interior of a Set	90
3.4 Limit Point of a Set	91
3.5 Properties of Open and Closed Sets	95
3.6 Interior, Exterior and Boundary of a Set	104
3.7 Dense and Perfect Sets	107
3.8 Sets of First and Second Category	107
3.9 Compactness of a Set	110
3.10 Heine-Borel Theorem	111
3.11 Cantor Ternary Set	113

4. TOPOLOGY OF METRIC SPACES	119-184
4.1 Introduction	119
4.2 Some Particular Metric Spaces	119
4.3 Distance between Two Sets : Diameter of a Set	124
4.4 Some Important Inequalities	127
4.5 Open and Closed Sets in a Metric Space	136
4.6 Neighbourhood	142
4.7 Properties of Neighbourhood	142
4.8 Closure, Interior and Exterior	153
4.9 Interior Point and Interior of a Set	156
4.10 Properties of The Interior	156
4.11 Exterior Point and Exterior of a Set	157
4.12 Frontier Point and Frontier of a Set	157
4.13 Boundary Point and Boundary of a Set	158
4.14 Separable Space and Base	165
4.15 Complete Metric Space	166
4.16 Metric Space of First and Second Category	171
4.17 Completion of a Metric Space	174
4.18 Completeness of $C[a, B]$	177
5. TOPOLOGICAL SPACES	185-254
5.1 Introduction	185
5.2 Topological Space	185
5.3 Type of Topologies	185
5.4 Comparison of Topologies	194
5.5 Union and Intersection of Topologies	195
5.6 Metricable Space and Metric Topology	196
5.7 Concept of Neighbourhood and Open Sets	200
5.8 Neighbourhood Axioms	201
5.9 Topological Spaces in terms of Neighbourhoods	202
5.10 Closed Sets	205
5.11 Properties of Union and Intersection of Closed Sets	207
5.12 Topology in terms of Closed Sets	209
5.13 Some Special types of Topologies	211
5.14 Bases for a Topology	211
5.15 First and Second Countable Space	214
5.16 Topological Space Generated by Collection of Sets	219
5.17 Adherent Points and Limit Points	220
5.18 Closed Sets in terms of Derived Set	224
5.19 Closure of a Set	227
5.20 Characterization of a Topological Space in terms of Closure Operator	232
5.21 Interior Point and Interior of a Set	234
5.22 Exterior Points and Exterior of a Set	239
5.23 Frontier Points and Frontier of a Set	241
5.24 Dense Set	245
6. THE SUBSPACE TOPOLOGY	255-264
6.1 Introduction	255
6.2 Relative Topology	255

6.3	Properties of Subspace or Relative Topology	256
7.	CONTINUITY AND HOMEOMORPHISM	265-292
7.1	Introduction	265
7.2	Continuity of a Function	265
7.3	Homeomorphism	282
8.	CONNECTEDNESS	293-320
8.1	Introduction	293
8.2	Separated Sets	293
8.3	Connected and Disconnected Sets	297
8.4	Continuity and Connectedness	307
8.5	Components	309
8.6	Totally Disconnected Space	310
8.7	Locally Connected Space	313
8.8	Path and Path Connected Space	313
9.	COMPACTNESS	321-342
9.1	Introduction	321
9.2	Cover and Open Covers	321
9.3	Compact Subset	322
9.4	Finite Intersection Property	328
9.5	Bolzano–Weierstrass Property	328
9.6	Compactness of $\mathbb{R}^n$	331
9.7	Variation of Compactness: Local, Sequential and Countably Compact Spaces	333
10.	SEPARABILITY AND COUNTABILITY	343-402
10.1	Introduction	343
10.2	Fundamental Results on Countability	343
10.3	Lindelof Spaces	349
10.4	Separable Space	353
10.5	T_0 -Separation Axioms	356
10.6	T_1 -Space	358
10.7	T_2 -Spaces	363
10.8	Regular and T_3 -Space	371
10.9	Normal and T_4 -Spaces	375
10.10	Completely Normal Space and T_5	386
10.11	Completely Regular Space	389
10.12	One-Point Compactification	393
10.13	Stone-Cech Compactification	397
11.	PRODUCT SPACES	403-426
11.1	Introduction	403
11.2	Order Topology	403
11.3	Product Space	403
11.4	Projection Mapping	406
11.5	Tychonoff Topology	414
11.6	Hausdorff Maximal Principle and Tychonoff Theorem	418
12.	NETS AND FILTERS	427-458
12.1	Introduction	427
12.2	Filters	427
12.3	Types of Filters	428

12.4	Comparison of Filters	429
12.5	Union and Intersection of Filters	430
12.6	Filters Generated by Collections of Sets	430
12.7	Supremum and Infimum of Filters	432
12.8	Filter Base	433
12.9	Ultrafilter and Ultrafilter Base	437
12.10	Convergence of Filters	443
12.11	Properties of Convergence	443
12.12	Nets	448
12.13	Convergence of a Net	449
12.14	Ultra Net and Sub Net	452
13.	METRIZATION AND PARACOMPACTNESS	459-470
13.1	Introduction	459
13.2	Metrizable Space	459
13.3	Local Finiteness	462
13.4	Paracompactness	465
14.	THE FUNDAMENTAL GROUP AND COVERING SPACES	471-488
14.1	Introduction	471
14.2	Homotopy of Paths	471
14.3	Product Operation on Paths	472
14.4	Homotopy Equivalence	474
14.5	The Fundamental Group	475
14.6	Addition of Paths	476
14.7	α -Hat and Simply Connected Space	477
14.8	Covering Spaces	479
14.9	Fundamental Group of The Circle	481
14.10	Fundamental Theorem of Algebra	485
●	BIBLIOGRAPHY	489-490
●	INDEX	491-494
