

1.	
1.1	Introduction 1
1.2	Concept of Sets 1
1.3	Set of Numbers 3
1.4	Cartesian Product of Sets 4
1.5	Relation 5
1.6	Function 7
1.7	Boundedness of a Subset of Real Numbers $\mathbf{R}$ 10
1.8	Sequences 15
1.9	Countable Set 18
1.10	Algebraic Numbers 21
1.11	Cardinally Equivalent Sets 22
1.12	Cardinal Number of a Set 23
1.13	Transcendental Number 28
1.14	Continuum Hypothesis 36
2.	
2.1	Introduction 39
2.2	Neighbourhood of a Point 39
2.3	Interior of a Set 43
2.4	Limit Point of a Set 45
2.5	Theorems on Closed and Derived Sets 49
2.6	Interior, Exterior and Boundary of a Set 59
2.7	Dense and Perfect Sets 61
2.8	Sets of First and Second Category 62
2.9	Compactness of a Set 64
2.10	Heine-Borel Theorem 65
2.11	Cantor Ternary Set 67
3.	
3.1	Introduction 73
3.2	Metric Space 73
3.3	Distance Between Two Sets and Diameter of a Set 78
3.4	Some Inequalities 81
4.	
4.1	Introduction 101

4.2	Open and Closed Spheres in a Metric Space	101
4.3	Neighbourhood	110
4.4	Equivalent Metrics	114
4.5	Closure of a Set	122
4.6	Interior Point and Interior of a Set	125
4.7	Exterior Points and Exterior of a Set	127
4.8	Frontier Points and Frontier of a Set	127
4.9	Boundary Points and Boundary of a Set	127
4.10	Separable Spaces	136
5.		
5.1	Introduction	149
5.2	Sequence	149
5.3	Complete Metric Space	155
5.4	Properties of Complete Metric Space	157
5.5	Metric Spaces of First and Second Category	160
5.6	Completion of a Metric Spaces	164
6.		
6.1	Continuity at a Point (Local Continuity)	179
6.2	Homeomorphism	179
6.3	Uniform Continuity in a Metric Space	180
6.4	Isomorphism	180
7.		
7.1	Introduction	197
7.2	Separated Sets	197
7.3	Connected and Disconnected Sets	202
7.4	Continuity and Connectedness	213
7.5	Characterisation of Connected Subsets of The Real Line	214
7.6	Connectedness of Unions	216
7.7	Connectedness of Products	220
7.8	Components	221
7.9	Totally Disconnected Spaces	223
7.10	Locally Connected Spaces	224
8.		
8.1	Introduction	231
8.2	Compact Metric Space	231
8.3	Equivalent characterisations for Compactness	234
8.4	Compact Subsets of The Real Line	236
8.5	Compact Subset in $\mathbf{R}^n$	237
8.6	Countably Compactness	238
8.7	Sequential Compactness	240
8.8	Total Boundedness	242

8.9	Compactness and Continuity	249
8.10	Locally Compact Spaces	251
8.11	Lindelof Spaces	252
8.12	Product of Two Compact Metric Spaces	253
9.		
9.1	Introduction	259
9.2	Pointwise Convergence	259
9.3	Uniform Convergence of Sequences	260
9.4	Uniform Convergence of a Series of Functions	262
9.5	Cauchy's General Principle of Uniform Convergence	262
9.6	Dini's Criterion for Uniform Convergence of a Sequence of Continuous Functions	263
9.7	Tests for Uniform Convergence	264
9.8	Uniform Convergence and Continuity	281
9.9	Equicontinuous Family of Functions	286
9.10	Weirstrass's Approximation Theorem	288
10.		
10.1	Introduction	297
10.2	Limit	297
10.3	Continuity of a Function of Two Variables	304
10.4	Partial Differentiation of Function of Two Variables	312
10.5	Differentiability of Function of Two Variables	320
10.6	Directional Derivatives of a Function of Two Variables	328
10.7	Composite Functions	329
10.8	Mean Value Theorem for Two Variables	330
10.9	Taylor's Theorem for Function of Two Variables	330
10.10	Schwarz's Theorem	334
10.11	Young's Theorem	335
10.12	Invertible Function	339
10.13	Linear Transformation	339
10.14	Implicit Function	344
10.15	Implicit Function Theorem	344
10.16	Maxima and Minima of a Function of Several Independent Variables	349
10.17	Necessary Condition for The Existence of Maxima Or Minima	349
10.18	Necessary Condition for Maxima Or Minima	351
10.19	Sufficient Condition for Maxima Or Minima: The Lagrange's Condition	352
10.20	Maxima and Minima of The Function of Three Independent Variables	365
10.21	Maxima and Minima for a Function of Three Independent Variables: The Lagrange's Condition	366
10.22	Lagrange's Method of Undetermined Multipliers	371

11.	
11.1	Introduction 385
11.2	Cauchy Sequence of Rational Numbers 385
11.3	A Necessary Condition for Convergence 386
11.4	Cantor's Numbers 386
11.5	Algebra of Cantor's Numbers 387
11.6	Order in $\mathbf{R}_c$ 388
11.7	Cantor Rational and Irrational Numbers 391
11.8	Convergence of Cantor Numbers 393
11.9	Order Completeness of Cantor Number System 394
