Preface

v

1. Plants, Taxonomy and Systematics

1-15

- Plants and Kingdoms of Life* 2
 - Two Kingdom System 2
 - Two Empires Three Kingdoms 2
 - Five Kingdom System 4
 - Six or Seven Kingdoms 4
 - The Plant Kingdom 8
- Taxonomy and Systematics* 8
 - Basic Components (Principles) of Systematics 10
 - Aims of Systematics 13
 - Advancement Levels in Systematics 14

2. Descriptive Terminology

16-49

- Habit and Lifespan* 16
- Habitat* 17
- Roots* 17
- Stems* 18
- Leaves* 22
 - Leaf Arrangement 22
 - Leaf Duration 23
 - Leaf Incision 23
 - Stipules 24
 - Leaf Shape 25
 - Leaf Margin 26
 - Leaf Base 27
 - Leaf Apex 27
 - Leaf Surface 28
 - Venation 29
- Inflorescence* 29
 - Racemose Types 29
 - Cymose Types 30
 - Specialized Types 31
- Flower* 31
 - Calyx 33
 - Corolla 33
 - Perianth 34
 - Androecium 34
 - Gynoecium 36
- Fruits* 39
 - Simple Fruits 39
 - Aggregate Fruits 43
 - Multiple Fruits 44

Floral Formula 44
Floral Diagram 44

3. Process of Identification

50–84

Specimen preparation 50
 Fieldwork 50
 Equipment 51
 Pressing 52
 Handling Special Groups 53
 Drying 53
Herbarium Methods 54
 Botanical Gardens 54
 Herbaria 59
 Pest Control 63
 Virtual Herbarium 64
Identification Methods 66
 Taxonomic Literature 66
 Taxonomic Keys 71
 Computers in Identification 77
DNA Barcoding 84

4. Systematic Evidence, Interdisciplinary Approach

85–141

Morphology 85
 Habit 85
 Underground Parts 86
 Leaves 86
 Flowers 86
 Fruits 86
Anatomy 86
 Wood Anatomy 86
 Trichomes 87
 Epidermal Features 88
 Leaf Anatomy 89
 Floral Anatomy 89
Embryology 90
 Families Marked out by Distinct Embryological Features 90
 Specific Examples of Role of Embryological Data 90
Palynology 91
 Pollen Aggregation 92
 Pollen Wall 92
 Pollen Aperture 93
Micromorphology and Ultrastructure 94
 Micromorphology 94
 Ultrastructure 96
Chromosomes 99
 Chromosomal Number 99
 Chromosomal Structure 101
 Chromosomal Behaviour 102
Chemotaxonomy 103
 Primary Metabolites 104
 Secondary Metabolites 104
 Non-Semantide Macromolecules 113
 Proteins 113

<i>Molecular Systematics</i>	117
Molecular Evolution	118
Location of Molecular Data	119
Molecular Techniques	121
DNA Polymorphism	131
Examples of Molecular Studies	136
Species vs Gene Trees	141

5. Hierarchical Classification

142–150

<i>Taxonomic Groups, Categories and Ranks</i>	143
<i>Utilization of Categories</i>	144
Species Concept	144
Intraspecific Ranks	149
Genus	149
Family	150

6. Nomenclature of Plants

151–182

<i>Need for Scientific Names</i>	151
Why Latin?	152
<i>Development of Botanical Code</i>	152
<i>Contents of Botanical Code</i>	153
Preamble	154
Principles of ICN	154
Names of Taxa	155
The Type Method	159
Author Citation	161
Publication of Names	162
Rejection of Names	165
Principle of Priority	167
Names of Hybrids	170
Names of Cultivated Plants	171
<i>Unified Biological Nomenclature</i>	172
Draft BioCode	172
PhyloCode	175

7. Variation, Biosystematics, Population Genetics and Evolution

183–202

<i>Types of Variation</i>	183
Developmental Variation	184
Environmental Variation	184
Genetic Variation	184
<i>Variance Analysis</i>	184
<i>Reproductive Systems</i>	186
Outbreeding	186
Inbreeding	189
Apomixis	190
<i>Population Genetics</i>	190
Allele Frequencies	190
Mating Systems	191
Hardy-Weinberg Law	191
<i>Evolution</i>	194
Mutation	194
Migration	195

Random Genetic Drift 195
Natural Selection 195
Molecular Evolution 197
Neutral Theory of Evolution 197
Speciation 198

8. Numerical and Cladistic Methods

203–251

Phenetic Methods 203
Principles of Taxometrics 204
Cladistic Methods 205
Phylogenetic Terms 205
Phylogenetic Diagrams 213
Phylogeny and Classification 216
Phylogenetic Data Analysis 220
Taxa-Operational Units 220
Characters 221
Measure of Similarity 224
Construction of Trees 227
The Consensus Tree 240
Automated Trees 246
Gene Trees and Species Trees 249
Developing Classification 250

9. Phylogeny of Angiosperms

252–282

Origin of Angiosperms 252
What are Angiosperms? 252
What is the Age of Angiosperms? 253
What is the Place of their Origin? 256
Are Angiosperms Monophyletic or Polyphyletic? 256
What are the Possible Ancestors? 257
Origin of Monocotyledons 265
Basal Living Angiosperms 266
Casuarinaceae 266
Magnoliids 266
Paleoherbs 268
Evolutionary Trends 271
Coevolution with Animals 271
Basic Evolutionary Trends 272
Xylem Evolution 273
Stamen Evolution 275
Pollen Grain Evolution 276
Carpel Evolution 278
Evolution of Inferior Ovary 281

10. Systems of Classification

283–340

Classifications Based on Gross Morphology 283
Preliterate Mankind 283
Early Literate Civilizations 283
Medieval Botany 285
Renaissance 285
Sexual System 288
Carolus Linnaeus 288

<i>Natural Systems</i>	291
Michel Adanson	291
Jean B. P. Lamarck	291
de Jussieu Family	292
de Candolle Family	292
Robert Brown	293
George Bentham and Sir J. D. Hooker	293
<i>Phylogenetic Systems</i>	296
Transitional Systems	297
Intentional Phylogenetic Systems	301
Modern Phylogenetic Systems	308

11. Families of Pteridophytes

341–363

<i>Classification</i>	341
Classification of Smith	341
Consensus Classification of Pteridophytes	342
Pteridophyte Phylogeny Group (PPG)	342
Lycopodiaceae	345
Selaginellaceae	346
Isoetaceae	348
Ophioglossaceae	349
Psilotaceae	350
Equisetaceae	352
Osmundaceae	354
Marsileaceae	355
Salvinaceae	356
Cyatheaceae	357
Pteridaceae	358
Aspleniaceae	360
Dryopteridaceae	361
Polypodiaceae	362

12. Families of Gymnosperms

364–385

<i>Classification</i>	366
<i>Cycadidae</i>	366
Cycadaceae	366
Zamiaceae	368
<i>Ginkgoaceae</i>	369
<i>Pinaceae</i>	370
Cupressaceae	372
Podocarpaceae	374
Araucariaceae	375
Taxaceae	376
Ephedraceae	378
Gnetaceae	379

13. Selected Families of Angiosperms

386–543

<i>Identification of Families Based on the Classification of Bentham and Hooker</i>	387
<i>Arrangement of the Families Described in this Book According to the</i>	
<i>Classification of APG IV (2016)</i>	388
Nymphaeaceae	393

Magnoliaceae 395
Annonaceae 398
Araceae 400
Alismataceae 402
Hydrocharitaceae 404
Potamogetonaceae 406
Liliaceae 408
Orchidaceae 410
Asphodelaceae 413
Amaryllidaceae 415
Arecaceae 421
Commelinaceae 423
Musaceae 425
Zingiberaceae 427
Cannaceae 430
Cyperaceae 431
Poaceae 434
Ranunculaceae 438
Dilleniaceae 442
Saxifragaceae 444
Fabaceae 445
Rosaceae 454
Moraceae 458
Cucurbitaceae 461
Euphorbiaceae 464
Myrtaceae 469
Rutaceae 472
Malvaceae 475
Capparaceae 482
Cleomaceae 485
Brassicaceae 487
Caryophyllaceae 491
Amaranthaceae 495
Aizoaceae 501
Nyctaginaceae 503
Portulacaceae 506
Primulaceae 508
Rubiaceae 511
Apocynaceae 514
Solanaceae 519
Acanthaceae 523
Verbenaceae 526
Lamiaceae 528
Asteraceae 532
Apiaceae 536

14. Plant Geography

544-559

Historical Development 545
Aims of Phytogeography 545
Physical Geography of Earth 545
Continental Drift 546

<i>Plate Tectonics</i>	546
Continental and Oceanic Islands	549
<i>Static or Descriptive Plant Geography</i>	549
Phytochoria	550
Botanical Provinces of India	551
<i>Dynamic or Interpretive Phytogeography</i>	553
Major Theories	554
Ranges	555
Migration and Barriers	555
Centers of Origin	556
Vicariance	557
Endemism	557

<i>References</i>	561–587
<i>Index</i>	589–618
