

Contents

<i>Preface</i>	<i>vii</i>
<i>Syllabus</i>	<i>xv</i>
1. Introduction to Analytical Chemistry	1–11
Introduction	1
Analytical Methods	2
Concept of Sampling	2
Errors in Chemical Analysis	4
Accuracy and Precision	6
Presentation of Experimental Results: Concept of Significant Figures	8
2. Analysis of Soil	12–23
Introduction	12
Composition of Soil	12
Significance of Soil Analysis	14
Interpretation of Soil pH	14
Determination of pH of Soil	16
<i>Experiment 2.1:</i> Measurement of soil pH using a potentiometer.	16
Complexometric Titration	18
Estimation of Calcium and Magnesium Ions as Calcium Carbonate by Complexometric Titration	19
<i>Experiment 2.2:</i> Determination of Ca^{2+} and Mg^{2+} ions concentrations in soil as CaCO_3 by complexometric titration method.	19
3. Analysis of Water	24–42
Introduction	24
Concept of Pure Water	24
Water Contamination	25
Water Sampling Methods	26
Water Purification Methods	28
pH of Water	31
<i>Experiment 3.1:</i> Determination of water pH (i) using pH paper (colorimetrically) and (ii) using pH meter (electrometrically).	31
Acidity of Water	33
<i>Experiment 3.2:</i> Determination of the acidity of water sample.	34

Alkalinity of Water 35

Experiment 3.3: Determination of hydroxide, carbonate and bicarbonate alkalinity of water sample. 35

Dissolved Oxygen (DO) in Water 38

Experiment 3.4: Determination of dissolved oxygen (DO) in water sample using Winkler's (azide modification) method. 38

4. Analysis of Food

43–59

Introduction 43

Nutritional Value of Foods 43

Food Processing 45

Food Adulteration 46

Food Preservatives and Colouring Matter 50

Experiment 4.1: Qualitative and quantitative estimation of benzoic acid in food items. 53

Experiment 4.2: Qualitative and quantitative estimation of sorbic acid in food items. 55

5. Chromatography-I

60–74

Introduction 60

Background of Chromatography 60

Classification of Chromatography 61

Paper Chromatography 63

Paper Chromatographic Separation of Mixture of Metal Ions (Fe^{3+} and Al^{3+}) 66

Experiment 5.1: Separation and identification of Fe^{3+} and Al^{3+} ions present in a given mixture using ascending paper chromatography. 66

Thin Layer Chromatography (TLC) 67

Analysis of Paint Samples by TLC 70

Experiment 5.2: Investigation and separation of the organic pigments in paint sample by TLC. 70

6. Chromatography-II

75–87

Introduction 75

Column Chromatography 75

Ion-exchange Chromatography 80

Experiment 6.1: Determination of ion-exchange capacity of cation exchange resin. 83

7. Analysis of Cosmetics

88–110

Introduction 88

Ingredients of Cosmetics 88

Antiperspirants and Deodorants 92

Analysis of Deodorants and Antiperspirants: Al, Zn, Boric Acid, Chloride, Sulfate 94

Experiment 7.1: Determination of aluminium (Al) and zinc (Zn) in deodorants by gravimetric method. 94

Experiment 7.2: Determination of chloride (Cl^-) in deodorants by gravimetric method. 96

Experiment 7.3: Determination of sulfate (SO_4^{2-}) in deodorants by gravimetric method. 96

Experiment 7.4: Determination of boric acid (H_3BO_3) in deodorants and antiperspirants by ion-exchange method. 97

Determination of Constituents of Talcum Powder: Magnesium Oxide, Calcium Oxide, Zinc Oxide and Calcium Carbonate by Complexometric Titration 99

Experiment 7.5: Determination of magnesium oxide (MgO) in talcum powder by complexometric titration method. 102

Experiment 7.6: Determination of zinc oxide (ZnO) in talcum powder by complexometric titration method. 102

Experiment 7.7: Determination of calcium carbonate (CaCO₃) in talcum powder by complexometric titration method. 103

Experiment 7.8: Determination of Ca²⁺ (CaO and/or CaCO₃) and Zn²⁺ (ZnO) in talcum powder by complexometric titration method. 104

Experiment 7.9: Determination of Ca²⁺ (CaO and/or CaCO₃) and Mg²⁺ (MgO) in talcum powder by complexometric titration method. 106

Experiment 7.10: Determination of Mg²⁺ (MgCO₃) and Zn²⁺ (ZnO) in talcum powder by complexometric titration method. 106

Experiment 7.11: Determination of Ca²⁺, Mg²⁺ and Zn²⁺ in talcum powder by complexometric titration method. 107

8. Analytical Chemistry in Forensic Sciences 111–119

Introduction 111

Uses of Phenolphthalein in Trap Cases 111

Experiment 8.1: Detection of phenolphthalein by thin layer chromatography (TLC). 112

Experiment 8.2: Detection of phenolphthalein by spectrophotometric method. 113

Analysis of Arson Accelerants 114

Experiment 8.3: Identification of arson accelerants by gas chromatography. 114

Analysis of Gasoline Sample 116

Experiment 8.4: Determination of relative concentrations of different components in gasoline by gas chromatography. 116

9. Instrumental Demonstrations 120–136

Introduction 120

Flame Photometry 120

Estimation of Macronutrients: Potassium, Calcium, in Soil Samples by Flame Photometry; Magnesium in Soil Samples by Atomic Absorption Spectroscopy 125

Experiment 9.1: Determination of calcium (Ca) in soil samples by flame photometry method. 125

Experiment 9.2: Determination of magnesium (Mg) in soil samples by atomic absorption spectrophotometer (AAS). 126

Experiment 9.3: Determination of potassium (K) in soil samples by flame photometry method. 127

UV-vis Spectrophotometry 127

Spectrophotometric Determination of Iron in Vitamin/Dietary Tablets 130

Experiment 9.4: Quantitative determination of iron content of a commercially available vitamin tablet using UV-vis spectrophotometry. 130

Spectrophotometric Identification and Determination of Caffeine and Benzoic Acid in Soft Drinks 132

Experiment 9.5: Measurement of two major species such as caffeine and sodium benzoate in soft drinks using spectrophotometry. 132

Appendices 137

Index 139
