<i>Foreword</i>	<i>v</i>
<i>Preface</i>	<i>xi</i>
<i>Key Definitions</i>	<i>xiii</i>
<i>Abbreviations</i>	<i>xv</i>
1. Introduction	1
2. Water as a Resource	4
Water—One of the Lives Sustaining Resource	4
Existence of Water in Various Forms	6
Surface Water	6
Groundwater	7
Piezometric Surface or Pressure Surface	9
Connate Water	9
Cosmic Water	9
Meteoric Water	9
Mode of Development of Groundwater	9
Shallow Well	9
Deep Well	10
Artesian Well	12
Infiltration Well	12
Difference between Borewell and Tube Well	13
Borewells	13
Tube Well	13
Relation between Surface Water and Groundwater	14
Quality of Water	18
3. Water Resources Availability and Demand by 2050	21
Availability of Water Resources	21
Total Water Resource Available in India	23
Water Requirement for Different uses	24

Demand Side Management Control through
Conservation Measures 26
Demands and Supply of Water 27

4. Augmentation of Water Resources 29

Augmentation of Water Resources 29
Artificial Recharge for Augmentation of
Groundwater 31
Overexploited Areas 31
Purposes and Principles of Artificial Recharge of
Groundwater 32
Alluvial Areas 32
Coastal Areas 34
Volumetric Allotment of Surface Water and
Groundwater 36
National Water Policy 37
Interlinking of Rivers 37
Compensatory Recharge 39
Injection Tube Well or Borewell 39
Conservative, Conjunctive use of Surface
Water for Augmentation and Reclamation of
Waterlogging and Saline Areas 42
Hard-rock Areas 47
Rooftop Harvesting 47
Adoption of Water Saving Techniques 49
Conservation of Water 49
Rotational System of Water Supply for
Domestic Purpose 49
Saving of Water from Domestic and
Irrigation Sector 50
Adoption of Desalination Technique for
Drinking Water in Mega Cities 52
Water Audit 53
Industrial Sector 54
Energy Sector 54
Artificial Recharge Techniques 55

5. Integrated Planning of Water Resource for Sustainable Development **58**

- Integrated and Multidisciplinary Approach 58
- Stakeholders Role 61
- Integrated and Coordinated Water Resource Development 63
- Basinwise Concept 65
- Watershed Development 66
 - What is Watershed? 66
 - Integrated Watershed Development 72
 - Important Factors which Needs Consideration for Development 73
- National Water Policy for Water Resources Development 74
- Groundwater 75
 - Groundwater Estimation and Management 75
 - Integrated Surface Water Resources 76
 - Conjunctive use of Surface Water and Groundwater 78

6. Measures to Improve Efficiency of Water Resources **82**

- Domestic Water Supply Systems 82
 - Present Status of Development 84
 - Present and Future Domestic Demands 86
 - Measures for Improving Efficiencies 87
 - Public Awareness and Participation 88
 - Pricing as a tool for Demand Management 92
 - Reuse of Water 92
 - Water Audit 94
 - Measures for Water Saving 94
- Domestic Water Supply 97
 - Urban Areas 97
 - Assessment of Water Resources 97
 - Planning for Designing Rainwater Harvesting Project 103

- Method of Rainwater Harvesting for
Managing Run-off 104
- Improving Water use Efficiency in Irrigation
Sector 106
- Irrigation 107
 - Increasing Water use Efficiency in Irrigation
Sector 107
 - Measures for Improving Irrigation Efficiency 112
 - Participatory Irrigation Management System 114
 - Responsibility of the Society 116
 - On Farm Management 118
 - Irrigation Scheduling 118
 - Waterlogging and Salination 121
 - Benchmarking of Irrigation System 122
 - Capacity Building 122
 - Water Audit 123
- Industrial Sector 125
 - Objective 125
 - Present and Future Demand 126
 - Review of Present Level of Efficiencies 126
 - Measures for Improving Efficiencies in
Industrial Sector 127
 - Thermal Power Sector 129
 - Nuclear Energy 130
 - Difficult Options for Water Resource
Conservation and Management 131
- Energy Sector 133
 - Thermal and Nuclear Power Plants 133
 - Hydropower 133
 - Agriculture Sector 136
 - Domestic Sector 137
- Environment 138
 - Recreation, Aquatic Life, Navigation,
Vegetation and Environmental Interface 138
 - Recreation Activities 138
 - Aquatic Life 139
 - Navigation 140

7. Quality of Water Resources **144**

- Source of Pollution 145
- Remedial Measures 146
- Thermal Power Stations 147
- Role of Ecology 148
- Biodiversity and Man-made Waste Lands 149
- Riverbank Filtration Technology 151

8. Environmental Impact **153**

- Environment and Environmental Problems 153
- Water Pollution 154
- Natural Restoration and Management Services 154
 - Hydrological Cycle 155
 - Forests and Watersheds 155
 - The Urban Hydrological Cycle 156
 - Misuse via Elevated Lifestyle 157
 - How Would Rainwater Harvesting Benefit us? 157
 - Stream and River Ecology 158
 - The New Water Vision on the Concept of Environment 160
- Measures that can be Suggested to Protect
 - Basic Ecological Process 161
 - The Conservation Zone 161
 - Storage Zone 162
 - Utilization Zone 162
- Environmental Evaluation 165
 - Environment Pollution 165
 - Greenhouse Effect 165
 - Changing Climate and its Causes 166
 - Ozone Layer Depletion 166
 - Awareness by Social and Political Means 167

9. Information System and Technology **169**

- Information System 169
- Media for Communication of Water Resources as per Watershed 170
- GIS Software Computer Studies 173

Output from GIS/Remote Sensing Techniques	174
Mathematical Modeling using GIS Software	175
Drainage Pattern	177
Soil Data	177
Hydrogeological Data	177
Existing Surface Water Bodies	178
Vegetation and Cropping Pattern	178
Enhanced Stakeholder's Involvement in Water Management	179
Stakeholders Involvement	179
Mass Awareness Campaign	180

10. Regulating use of Water Resources by Legal and Constitutional Remedial Measures **183**

Regulating use of Water Resources	183
Project Justification	185
Demand Regulation	186
Supply Augmentation	187
Logical Collective Inaction	188
Stakeholders of Water users	188
Enforcement Problems	189
Increasing Supply – Yes	190
Restricting Demand – No	190
Judicious Activism	191
Notions of Intrabasin Equity	191
Government's Intervention for Allotment	192
Participatory Approach to Water Resource Management	192
Water Rights	195

11. Conclusion **199**

Institutional Mechanism for Integrated Water Resources Management	202
---	-----

<i>Bibliography</i>	203
<i>Index</i>	205
