## Preface

### Unit 1: Classification, Nomenclature and Isomerism

- I. Organic Compounds 1
- II. Nomenclature of Organic Compounds 2
  - A. Common System of Nomenclature 1
  - B. IUPAC System of Nomenclature 3
    - Nomenclature of Carbocyclic Compounds 13
    - Nomenclature of Alicyclic compounds 13
    - Nomenclature of Aromatic Compounds 15
    - Isomerism in Organic Compound 17

### Unit 2: Alkanes, Alkenes and Conjugated Dienes

- I. Hybridization 20
  - 1. Types of Hybridization 20
    - $sp^3$  Hybridization 20
    - $sp^2$  Hybridization 21
- II. Halogenation of Alkanes 22
- III. Paraffin 24
- IV. Elimination Reaction 24
  - E1 Reaction 25
  - E2 Reaction 27
- V. Electrophilic Addition Reaction of Alkenes 28
- VI. Free Radical Addition Reactions of Alkenes 29
- VII. Electrophilic Addition Reactions of Conjugated Dienes 30
- VIII. Free Radical Addition Reactions of Conjugated Dienes 31
- IX. Diels-Alder Reactions 32
- X. Miscellaneous 32
  - 1. Allylic Rearrangement 32
  - 2. Carbocations 33
    - Carbocation Classification 33
    - Stabilization of Carbocation 34
    - Carbocation Formation 36
    - Carbocation Formation 36

### Unit 3: Alkyl Halides

- I. Nucleophiles (NU) 39
- II. Leaving Groups (LG) 43
- III. Nucleophilic Substitution Reaction 43
  - 1.  $S_N1$  Reaction 44
  - 2.  $S_N2$  Reaction 46

## IV. Structure and Uses

1. Ethyl-chloride 48
2. Chloroform 49
3. Trichloroethylene 49
4. Dichloromethane 49
5. Tetrachloromethane 50
6. Iodoform 50

## V. Alcohols

- A. Qualitative Test for Alcohol 51
- B. Distinguish between Primary, Secondary and Tertiary Alcohols 52
- C. Structure and Uses of Alcohols 54
  1. Ethyl alcohol 54
  2. Methyl alcohol 54
  3. Chlorobutanol 55
  4. Cetostearyl alcohol 55
  5. Benzyl alcohol 55
  6. Glycerol 56
  7. Propylene glycol 56

**Unit 4: Aldehydes and Ketones**

- I. Introduction 57
- II. Structure of Carbonyl Compounds 57
- III. Nucleophilic Addition 58
- IV. Electromeric Effect 61
- V. Aldol Condensation Reaction 63
- VI. Crossed Aldol Condensation Reaction 64
- VII. Claisen-Schmidt Condensation 65
- VIII. Cannizzaro Reaction 66
- IX. Crossed Cannizzaro Reaction 67
- X. Benzoin Condensation 68
- XI. Perkin Condensation 69
- XII. Qualitative Test for Aldehyde and Ketone 70
  - a. Test for Aldehyde and Ketone 70
  - b. Test to Distinguish between Aldehyde and Ketone 71
- XIII. Structure and Uses 73
  1. Formaldehyde 73
  2. Paraldehyde 73
  3. Acetone 74
  4. Hexamine 74
  5. Benzaldehyde 75
  6. Vanillin 76
  7. Cinnamaldehyde 76

**Unit V: Carboxylic Acids and Amines**

- I. Carboxylic Acids 78
  - Factor that Effect the Acidity of Carboxylic Acid 79

|                                                             |    |
|-------------------------------------------------------------|----|
| II. Qualitative Tests for Carboxylic Acids, Amide and Ester | 82 |
| A. Test for Carboxylic Acid                                 | 82 |
| B. Test for Amides                                          | 84 |
| C. Test for Esters                                          | 84 |
| III. Structure and Uses of Carboxylic Acids                 | 85 |
| 1. Acetic acid                                              | 85 |
| 2. Lactic acid                                              | 86 |
| 3. Tartaric acid                                            | 86 |
| 4. Citric acid                                              | 87 |
| 5. Succinic acid                                            | 87 |
| 6. Oxalic acid                                              | 88 |
| 7. Benzoic acid                                             | 88 |
| 8. Salicylic acid                                           | 88 |
| 9. Acetyl salicylic acid                                    | 89 |
| 10. Methyl salicylate                                       | 89 |
| 11. Benzyl benzoate                                         | 89 |
| 12. Dimethyl phthalate                                      | 90 |
| IV. Aliphatic Amines                                        | 90 |
| A. Physical Properties and Characteristics of Amines        | 92 |
| B. Basicity of Amines                                       | 92 |
| C. Qualitative Test for Amines                              | 95 |
| V. Structure and Uses                                       | 97 |
| 1. Ethanolamine                                             | 97 |
| 2. Ethylenediamine                                          | 98 |
| 3. Amphetamine                                              | 98 |
| Index                                                       | 99 |
