Contents

About the Authors ..... *v*

Contributors and Reviewers ..... *vii*

Preface ..... *ix*

Acknowledgments ..... *xi*

Special Features of the Book ..... *xvii*

Syllabus ..... *xxi*

SECTION I GENERAL PATHOLOGY

Chapter 1 Introduction to Pathology 3–10

Introduction *3*
Aspects of Disease *4*
Important Terminology in the Study of Pathology *4*
Historical Background *5*
Importance of Studying Pathology *5*
Branches of Pathology *5*
Histopathological Examination *6*

Chapter 2 Cellular Adaptations and Cell Injury 11–34

Introduction *12*
Cellular Adaptation and Response
Atrophy *12*
Hypertrophy *14*
Hyperplasia *15*
Metaplasia *16*
Dysplasia *19*
Cell Injury
Factors Causing Cell Injury *21*
Types of Cell Injury *23*
Intracellular Accumulations *26*
Normal Cellular Components *26*
Accumulation of Abnormal Substances *28*
Pigments *30*

Chapter 3 Cell Death (Necrosis and Apoptosis) 35–47

Introduction *35*
Necrosis *36*
Gangrene *40*
Apoptosis *43*

Chapter 4 Inflammation, Regeneration and Wound Healing 48–74

Inflammation
Signs of Inflammation *49*
Types of Inflammation *49*
Acute Inflammation *49*
Chronic Inflammation *60*

Regeneration and Wound Healing
Regeneration *66*
Wound Healing *66*
Healing in Various Organs *72*

Chapter 5 Neoplasia 75–91

Introduction *76*
Components of Neoplasia or Tumor *76*
Epidemiology of Cancer *76*
Cancer Incidence *78*
Characteristics of Tumor *78*
Cancer Phenotype and Stem Cells *78*
Clinical Features *79*
Gross and Microscopic Features *80*
Metastasis or Distant Spread *81*
Grading and Staging of Cancer *84*
Nomenclature *85*
Laboratory Diagnosis of Cancer *87*

Chapter 6 Circulatory Disturbances: Thrombosis, Embolism, Shock 92–109

Thrombosis *92*
Embolism *98*
Ischemia *102*
Infarction *103*
Shock *107*

Chapter 7 Disturbances of Body Fluids and Electrolytes 110–124

Introduction *110*
Disturbances in Body Fluid *111*
Electrolyte Disturbances *118*
Acid-Base Imbalances *119*
Derangements in Blood Flow (Circulatory/Hemodynamic Disturbances) *121*

SECTION II SYSTEMIC PATHOLOGY

Chapter 8 Respiratory System Diseases 127–159

Overview of Respiratory System *127*
Pulmonary Tuberculosis *129*
Pneumonia *134*
Chronic Obstructive Pulmonary Disease *139*
Lung Abscess *149*
Pleural Effusion *152*
Lung Tumors *154*

Chapter 9 Cardiovascular System Diseases 160–180

Overview of Cardiovascular System *161*
Diseases of Cardiovascular System
Pericardial Effusion *161*
Atherosclerosis *163*
Ischemic Heart Disease *166*
Rheumatic Heart Disease *172*
Infective Endocarditis *174*
Aneurysm *177*

Chapter 10 Gastrointestinal System Diseases 181–206

Overview of Gastrointestinal System *181*
Peptic Ulcer Disease *183*
H. pylori Gastritis *187*
Typhoid Fever (Ulcer) *188*

Preneoplastic Lesion of Oral Cavity *190*
Carcinoma of Gastrointestinal Tract *191*
Esophageal Cancer *193*
Gastric Cancer *195*
Colorectal Cancer *198*
Inflammatory Bowel Disease *202*

Chapter 11 Liver, Gallbladder and Pancreas Diseases 207–235

Overview of Liver, Gallbladder and Pancreas *207*
Diseases of Liver
Hepatitis *208*
Jaundice *213*
Liver Cirrhosis *215*
Alcoholic Liver Disease and Cirrhosis *218*
Nonalcoholic Liver Cirrhosis/Disease *220*
Primary Sclerosing Cholangitis *220*
Liver Function Tests *221*
Autoimmune Diseases of Liver *222*
Liver Abscess *224*
Hydatid Cyst Disease *225*
Tumors of Liver *226*
Diseases of Gallbladder
Cholecystitis *228*
Tumors of Gallbladder *230*
Disease of Pancreas *230*
Tumors of Pancreas *232*

Chapter 12 Skeletal System Diseases 236–258

Overview of Skeletal System *236*
Structure of Bones *237*
Classification of Bones *237*
Bone Formation and Maintenance *238*
Bone Healing *238*
Osteoporosis *239*
Osteomyelitis *241*
Arthritis *245*
Bone Tumors *249*
Classification of Bone Tumors—WHO *249*

Chapter 13 Endocrine System Diseases 259–271

Overview of Thyroid Gland *259*
Diseases of Thyroid Gland *260*
Overview of Pancreatic Gland *267*
Diabetes Mellitus *268*

Chapter 14 Kidneys and Urinary Tract Diseases 272–295

Overview of Urinary System *273*
Diseases of Kidney and Urinary Tract
Glomerulonephritis *274*
Pyelonephritis *283*
Xanthogranulomatous Pyelonephritis *285*
Renal Calculi or Kidney Stones *286*
Cystitis *288*
Renal Cell Carcinoma *289*
Renal Failure *290*

Chapter 15 Male Genital System Diseases 296–305

Overview of the Male Genital System *297*
Cryptorchidism *297*
Testicular Atrophy *299*
Benign Prostatic Hyperplasia *300*
Prostatic Carcinoma *301*
Carcinoma Penis *303*

Chapter 16 Female Genital System Diseases 306–326

Overview of Female Reproductive/Genital System *306*
Cervicitis *307*
Ovarian Cysts *308*
Carcinoma Cervix *309*
Carcinoma of Endometrium *313*
Vesicular Mole and Choriocarcinoma *315*
Uterine Fibroid or Leiomyoma *318*
Ovarian Tumors *320*

Chapter 17 Breast Diseases 327–338

Introduction *327*
Fibrocystic Disease *328*
Breast Fibroadenoma *330*
Phyllodes Tumor *332*
Breast Carcinoma *333*

Chapter 18 Central Nervous System Diseases 339–350

Overview of Central Nervous System *339*
Meningitis *340*
Encephalitis *344*
Stroke *345*
Tumors of Central Nervous System *346*

SECTION III CLINICAL PATHOLOGY

Chapter 19 Hematological Tests for the Diagnosis of Blood Disorders 353–394

Process of Blood Testing *354*
Anticoagulants *354*
Blood Collection Tubes or Vacutainers *355*
Methods of Blood Collection *356*
Blood Test *358*
Hemogram *359*
Determination of Red Blood Cell Indices *370*
Hemoglobin Estimation *371*
Erythrocyte Sedimentation Rate *374*
Coagulation Tests *375*
Normal Reference Ranges in Hematology and Inference of Data *379*
Blood Biochemistry *380*
Blood Culture *382*
Bone Marrow Examination *383*
Serological and Immunological Tests *383*
Blood Bank
Blood Grouping and Crossmatching *385*
Blood Products *388*
Pretransfusion Compatibility Testing *389*
Transfusion Reactions *390*

Chapter 20 Examination of Body Cavity Fluids 395–411

Introduction *396*
Cerebrospinal Fluid Analysis *396*
Sputum Examination *399*
Routine Gastric Juice Examination *405*
Wound Discharge Analysis *406*
Peritoneal Fluid Analysis *407*
Pleural Fluid Analysis *409*

Chapter 21 Examination of Semen 412–417

Introduction *412*
Indications of Semen Analysis *413*
Specimen Requirements and Procedure *413*
Examination of Seminal Fluid *414*
Clinical Significance *416*

Chapter 22 Urine Examination 418–431

Introduction *418*
Components of Basic (Routine) Urinalysis *419*
Urine Dipstick Test *428*
Urine Culture and Sensitivity Test *429*

Chapter 23 Examination of Feces 432–440

Introduction *432*
Indications for Stool Examination *432*
Sample for Stool Examination *433*
Macroscopic or Gross Appearance of the Stool *433*
Microscopic Examination of the Stool *435*
Chemical Examination of the Stool *437*
Stool Analysis *437*
Stool Culture *438*
Other Stool Tests *438*

SECTION IV GENETICS

Chapter 24 Basics of Genetics 443–469

Introduction *444*
Branches of Genetics *444*
Practical Applications/Role of Nurses in Genetics *444*
Impact of Genetic Condition on Families *445*
Factors Impacting Genetic Conditions in Families *446*
Basic Structures Involved in Genetics *447*
Review of Cell Division: Mitosis and Meiosis *450*
Chromosomes: Sex Determination *454*
Gene Mutations/Errors in Transmission *455*
Chromosomal Aberrations *457*
Patterns of Inheritance *460*
Mechanism of Inheritance *461*
Multiple Alleles and Blood Groups *466*

Chapter 25 Maternal and Genetic Influences on Development of Defects and Diseases 470–503

Genetics and Infections *471*
Genetic Polymorphism *471*
Conditions Affecting the Mother *472*
Adverse Effect of Prenatal Infections in Newborn *475*
Consanguinity Atopy—Impact on Reproductive Health *476*
Prenatal Nutrition and Food Allergies *479*
Maternal Age *483*
Maternal Drug Therapy *486*
Effect of Radiation on Pregnancy *488*
Effects of Drugs and Chemicals on Pregnancy *490*
Infertility *492*
Spontaneous Abortion *498*

Chapter 26 Prenatal Testing 504–515

Introduction *505*
Indications for Prenatal Testing *505*
Benefits of Prenatal Testing *505*
Prenatal Tests *505*

Chapter 27 Genetic Testing in the Neonates and Children 516–534

Introduction *516*
Types of Genetic Tests *517*
Genetic Screening and Testing *517*
Clinical Tests in Genetics *519*
Screening for Congenital Abnormalities *520*
Developmental Delay *522*
Dysmorphism *526*

Chapter 28 Genetic Conditions of Adolescent and Adults 535–564

Introduction *536*
Congenital Abnormalities *536*
Neural Tube Defects *536*
Down Syndrome (Trisomy 21) *539*

Turner Syndrome *542*
Klinefelter Syndrome *545*
Huntington Disease *546*
Mental Illness *549*
Alzheimer's Disease *550*
Attention Deficit Hyperactivity Disorder *551*
Autism Spectrum Disorder *551*
Generalized Anxiety Disorder *552*
Inborn Errors of Metabolism *553*
Cancer Genetics—Familial Cancer *554*
Conditions of Inherited/Familial Cancers *555*
Blood Groups Alleles *558*
Hematological Disorders *559*

Chapter 29 Services Related to Genetics 565–582

Human Genome Project *566*
Gene Therapy *568*
Methods of Gene Transfer *571*
Applications of Gene Therapy for Inherited Disorders *572*
Genetic Testing *572*
The Eugenics Movement *572*
Genetic Counseling *575*
Role of Nurse in Genetic Counseling *580*

Annexures 583–584

Annexure I Breast Self-Examination (BSE) 583
Annexure II ADA Update 2018-Diagnostic Criteria for Diabetes 584

Further Readings 585–586

Index 587–597
