<i>Apologia</i>	v
-----------------------	---

GENERAL PHYSIOLOGY

1. Principles of Physical Chemistry in Physiology	1
2. The Cell and Intracellular Junctions	3
3. Composition and Structure of the Cell Membrane	5
4. Membrane Transport and Membrane Channels	6
5. Mitosis, Meiosis and Apoptosis	8

NERVE AND MUSCLE SYSTEM

6. Neuron	10
7. Muscle and Neuromuscular Junction	12
8. Degeneration and Regeneration of Nerve and Muscle	15
9. Resting Membrane Potential	17
10. Membrane Excitation and Action Potential	19
11. Ion Channels and their Role in Action Potential	22
12. Conduction of Nerve Impulses	24
13. Neuromuscular Transmission	26
14. Mechanism and Energetics of Muscle Contraction	29
15. Gross Characteristics of Muscle Contraction	31
16. The Motor Unit	35
17. Electromyography and Electroneurography	36
18. Smooth Muscles	38
19. Cardiac Muscle	41

BLOOD AND IMMUNE SYSTEM

20. Blood and Plasma Proteins	43
21. Red Blood Cells and Anemia	45
22. Hemoglobin and its Reactions	48
23. Hemoglobin Degradation and Jaundice	50
24. Iron	53
25. Folic Acid and Vitamin B ₁₂	56
26. Blood Grouping and Transfusion	59
27. Blood Platelets	61
28. Blood Coagulation	63

29. Pro- and Anti-Hemostatic Mechanisms	64
30. Hemorrhagic and Thrombotic Disorders	65
31. Neutrophils, Eosinophils and Basophils	67
32. Monocyte, Lymphocyte and Lymphoid Organs	69
33. Immune Response, Tolerance and Hypersensitivity	71
34. Mechanism of the Immune Response	74
35. Immune Effectors	75
36. Immunomodulation	77
37. Hemopoiesis and Bone Marrow	78

CARDIOVASCULAR SYSTEM

38. Principles of Electrocardiography	81
39. Electrocardiogram	83
40. Abnormalities of Cardiac Excitation	85
41. Cardiac Cycle	89
42. Cardiac Output and its Regulation	91
43. Factors Affecting Cardiac Output	94
44. Circulatory System. Structure, Function and Hemodynamics	96
45. Measurement of Blood Flow and Pressure	99
46. Capillary Exchange, Lymphatic Circulation and Edema	101
47. Chemical Control of Cardiovascular System	103
48. Neural Control of Cardiovascular System	105
49. Blood Pressure Regulation and Hypertension	107
50. Circulatory Shock	110
51. Coronary Circulation	114
52. Cerebral Circulation	116
53. Cerebrospinal Fluid	117
54. Pulmonary Circulation	119
55. Cutaneous and Muscle Circulation	121
56. Splanchnic Circulation	123
57. Cardiovascular Reflexes and Readjustments	124

RESPIRATORY SYSTEM

58. Structure and Function of the Respiratory System	127
59. Mechanics of Pulmonary Ventilation	129
60. Static Lung Volumes	132
61. Dynamic Lung Volumes	135
62. Alveolar Ventilation, Perfusion and Gaseous Exchange	137
63. Transport of Gases in Blood	140
64. Neural Bases of Respiratory Rhythm and Reflexes	142
65. Chemical Control of Breathing	144
66. Respiratory Disequilibria	147
67. High and Low Pressure Breathing	150
68. Respiratory Medicine	152

EXCRETORY SYSTEM

69. Structure and Functions of the Kidney	154
70. Glomerular Filtration and Tubular Reabsorption	157
71. Renal Handling of Sodium and Diuretic Mechanisms	160
72. Renal Regulation of Urine Volume and Osmolarity	162
73. Body Fluid and Electrolyte Balance	164
74. Renal Handling of Hydrogen Ions and Acid-Base Balance	167
75. Renal Handling of Potassium Ions and Potassium Balance	170
76. Renal Handling of Miscellaneous Substances	171
77. Hormones acting on the Kidney	172
78. Quantification of Renal Functions	174
79. Urine Analysis and Renal Function Tests	178
80. Renal Syndromes	180
81. Urinary Bladder and Cystometry	182

GASTROINTESTINAL SYSTEM

82. Events in the Mouth and Esophagus	185
83. Events in the Stomach	187
84. Events in the Duodenum	191
85. Events in the Small Intestines	194
86. Events in the Colon	196
87. Gastrointestinal Hormones	198
88. Gastrointestinal Disorders	200

METABOLISM AND NUTRITION

89. Liver	203
90. Metabolism	204
91. Vitamins	206
92. Nutrition	207

ENDOCRINE SYSTEM

93. The Pituitary Gland and Growth Hormone	209
94. Thyroid Hormones	212
95. Calcitropic Hormones	215
96. Corticosteroid Synthesis and Secretion	217
97. Actions of Corticosteroids	219
98. Adrenomedullary Hormones	222
99. Pancreatic Hormones	224
100. Testicular and Ovarian Hormones	226

REPRODUCTIVE SYSTEM

101. Puberty and Gametogenesis	230
102. Menstrual Cycle	234
103. Sperm Maturation and Fertilization	237

104. Differentiation of the Sexes	239
105. Feto-placental Unit and Placental Hormones	242
106. Pregnancy, Parturition and Lactation	244
107. Contraceptives	247

CENTRAL NERVOUS SYSTEM

108. Spinal Cord and Brainstem	248
109. Cerebellum	251
110. Thalamus and Hypothalamus	254
111. Basal Ganglia	257
112. Cerebral Cortex	260
113. Autonomic Nervous System	263
114. Synaptic Transmission	266
115. Sensory Mechanisms	269
116. Physiology of Emotions	274
117. Regulation of Muscle Length and Tension	275
118. Motor Mechanisms and Regulation of Posture	279
119. Electroencephalogram	283
120. Sleep and Wakefulness	284
121. Memory and Learning	287
122. Language and Speech	291
123. Regulation of Food Intake	293
124. Regulation of Body Temperature	295

SPECIAL SENSES

125. Structure and Functions of the Eye	298
126. Visual Optics and the Field of Vision	300
127. The Retina and Phototransduction	303
128. Visual Pathway and Image Processing Cells	307
129. Motor Mechanisms of the Eye	310
130. Auditory Mechanisms	313
131. Deafness and Tests for Hearing	316
132. Vestibular Senses	318
133. Olfactory and Gustatory Senses	320
<i>Index</i>	321
