## SECTION 1: Anatomy

---

- |                                                        |          |                                                 |
|--------------------------------------------------------|----------|-------------------------------------------------|
| <b>1. Skeletal System</b>                              | <b>3</b> |                                                 |
| • Introduction to Anatomy                              | 3        | ▪ Blood Vessels of the Upper Limb 16            |
| • Skeletal System—An Overview                          | 3        | ▪ Clinical Applications of Venipuncture 17      |
| ▪ Bones                                                | 4        | ▪ Bones of the Lower Limb 17                    |
| ▪ Joints                                               | 6        | ▪ Joints and Ligaments of the Lower Limb 21     |
| ▪ Important Clinical Conditions Associated with Joints | 6        | ▪ Nerves of the Lower Limb 22                   |
| <b>2. Muscular System</b>                              | <b>8</b> | ▪ Blood Vessels of the Lower Limb 22            |
| • Muscles                                              | 8        | ▪ Superficial Veins of the Lower Limb 23        |
| ▪ Types of Muscles                                     | 8        | ▪ Clinical Applications 23                      |
| • Bones and Joints of the Upper Limb                   | 9        | ▪ Movements of the Joints 23                    |
| ▪ Bones of the Upper Limb                              | 9        | ▪ Muscles of the Upper Limb 26                  |
| ▪ Joints of the Upper Limb                             | 9        | ▪ Muscles of the Lower Limb 31                  |
| ▪ Brief Description of the Individual Bones            | 10       | ▪ Clinical Relevance: Tarsal Tunnel Syndrome 35 |
| ▪ Joints and Ligaments of the Upper Limb               | 13       |                                                 |
| ▪ Nerves of the Upper Limb                             | 14       |                                                 |

## SECTION 2: Systemic Anatomy and Physiology

---

- |                                                   |           |                                     |
|---------------------------------------------------|-----------|-------------------------------------|
| <b>3. Cellular Organization of the Human Body</b> | <b>39</b> |                                     |
| • Overview of Human Body Systems                  | 39        | ▪ Lipids 42                         |
| ▪ Homeostasis                                     | 40        | ▪ Proteins 42                       |
| ▪ Cell                                            | 41        | ▪ Functions of the Cell Membrane 42 |
| ▪ Cell Membrane                                   | 41        | ▪ Organelles in Cytoplasm 43        |
| ▪ Composition of the Cell Membrane                | 41        | ▪ Cell Transport Mechanisms 44      |
|                                                   |           | ▪ Transport of Large Particles 44   |

- 4. Hematology 46**
- Blood 46
    - Composition of Blood 46
    - Functions of Blood 47
    - Plasma Proteins 48
    - Functions of Plasma Proteins 48
  - Blood Cells 48
    - Red Blood Cells (Erythrocytes) 48
    - RBC Count 49
    - Functions of RBCs 49
    - Anemia 49
    - Classification of Anemia 49
    - Morphological Classification 50
    - Hemoglobin 50
    - Granulocytes 50
    - Total Leukocyte Count (TLC) 50
    - Functions of WBCs 51
    - Platelets 51
    - Routine Hematological Tests 51
    - Blood Groups 52
    - Blood Transfusion 52
    - Tests before Blood Transfusion 53
    - Criteria for Blood Donation 53
    - Commonly Used Anticoagulants 53
    - Indications for Blood Transfusion 53
    - Complications of Blood Transfusion 53
  - Immunity 53
- 5. Respiratory System 54**
- Physiological Anatomy of the Respiratory System and Its Functions 54
    - Pathway of Air 54
    - Functions of the Respiratory System 54
    - Functional Organization of the Respiratory System 55
    - Mechanism of Respiration 56
    - Transport of Gases 56
    - Regulation of Respiration 57
    - Pulmonary Function Tests 57
    - Lung Volumes 58
    - Uses of Pulmonary Function Tests 58
    - Respiratory Disorders 58
- 6. Cardiovascular System 60**
- Cardiovascular System Functions 60
  - Structure of the Cardiovascular System 61
  - Blood Vessels and Lymphatics 62
  - Conducting System of the Heart 63
  - Cardiac Cycle 63
  - Heart Sounds 64
  - Blood Pressure 65
  - Coronary Artery Disease (CAD) 66
  - Cardiac Profile Tests 66
  - Cardiovascular Disorders 66
- 7. Gastrointestinal System 68**
- Physiological Anatomy and Functions of the Gastrointestinal System 68
    - Structure and Functions of Various Parts of the Gastrointestinal Tract 68
    - Small Intestine 70
    - Pancreas 71
    - Gallbladder 72
    - Liver 72
    - Large Intestine 72
    - Rectum 73
    - Anus 73

- Secretory Functions of the Gastrointestinal Tract (GIT) 73
  - Salivary Glands 73
  - Saliva Composition 74
  - Gastric Juice 74
  - Pancreatic Secretion 75
  - Bile 76
  - Liver Function Tests (LFT) 77
  - Jaundice 77
  - Bilirubin Metabolism 78

## **8. Reproductive System 79**

- Physiological Anatomy of the Reproductive System and Its Functions 79
  - Male Reproductive System 79
  - Female Reproductive System 81
  - Female Hormones 82
  - Menstrual Cycle 82
  - Tests for Ovulation 83
  - Uses of Ovulation Tests 83

## **9. Nervous System 84**

- Organization of the Nervous System 84
  - Central Nervous System (CNS) 84
  - Peripheral Nervous System (PNS) 85
- Neuromuscular Junction (NMJ) 86
  - Cranial Nerves 86
  - General Functions of the Nervous System 87
  - Cerebral Cortex and Its Lobes 88
  - Frontal Lobe 88
  - Parietal Lobe 89
  - Temporal Lobe 89
  - Occipital Lobe 90
  - Important Functional Areas of the Cerebral Cortex (Brodman's Areas) 90

- Hypothalamus 91
  - Major Functions of the Hypothalamus 91
- Basal Ganglia 92
  - Major Components 92
  - Clinical Correlation—Parkinson's Disease 92
- Thalamus 92
  - Functions of the Thalamus 93
  - Thalamic Syndrome 93
- Cerebellum 93
  - Functional Divisions of the Cerebellum 93
- Sensory System 94
  - Classification of Sensations 94
  - Components of the Sensory System 94
- Motor System 97
  - Motor Areas 97
  - Descending Tracts (Motor Pathways) 97

## **10. Special Senses 99**

- Eye (Vision) 99
  - Physiological Anatomy 99
  - Muscles of the Iris 99
  - Visual Pathway 100
  - Refractive Errors of the Eye 100
- EAR 102
  - External Ear 102
  - Middle Ear 103
  - Internal Ear 104
  - Deafness 105
- Taste 105
  - Taste Buds 105
  - Pathway for Taste Sensations 106
  - Taste Sensations and Chemicals 106
  - Primary Taste Sensations 106
  - Applied Aspects 107

- Smell 107
  - Olfactory Receptors 107
  - Classification of Odors 107
  - Olfactory Pathway 107
  - Applied Aspects 107

### **11. Endocrine System 108**

- Physiological Anatomy of the Endocrine System 108
  - Functions of the Endocrine System 108
  - Major Endocrine Glands 108
  - Hormones of the Pituitary Gland 109
  - Thyroid Gland 110
  - Hormones Regulating Calcium: Parathyroid Hormone, Vitamin D and Calcitonin 111
  - Pancreas 112
  - Adrenal Cortex and Medulla 112

### **12. Excretory System 113**

- Physiological Anatomy of the Renal System 113
  - Kidneys 113
  - Nephron: Structural and Functional Unit 114
  - Glomerulus 115
  - Renal Tubule 115
  - Mechanisms of Urine Formation 116
  - Ureter 116

- Histology 116
- Urinary Bladder 116
- Innervation 117
- Urethra 117
- Micturition 117
- Renal Function Tests (RFTs) 117
- Routine Kidney Profile 118
- Urine Examination 118
- Physical Characteristics of Urine 118
- Chemical and Microscopic Composition 119
- Clearance Tests for Measuring Glomerular Filtration Rate (GFR) 119
- Radiological Evaluation of Kidney Function 120
- Imaging Modalities 120
- Acid–Base Balance and the Role of Kidneys 120
- Mechanisms of H<sup>+</sup> Ion Regulation 121
- Evaluating pH Imbalance in Arterial Blood Sample 121
- Role of the Kidneys in Acid–Base Balance 123
- pH Meter: Principle and Applications 123
- Working Principle 123
- Electrochemical Equation 123
- Types of pH Meters 123
- Applications of pH Meter 123

## **SECTION 3: Biochemistry and Clinical Laboratory Practices**

### **13. Biochemistry in Laboratory Medicine 127**

- Scope and Importance of Biochemistry in Laboratory Medicine 127
- Role and Responsibilities of Medical Laboratory Technologists 128
- Biological Specimens and Their Collection 129

- Important Considerations for Specimen Collection 129
  - Prevention and Disposal of Biological Specimens 130
  - Standard Waste Disposal Protocol 130
  - Standard Solutions: Preparation and Storage of Chemicals 131
  - Standard Units of Measurement 131
  - Standard Chemicals and their Solvents 132
  - Preparation of Common Solutions 132
    - Normal Saline (1L) 132
    - Sodium Bicarbonate Solution 132
    - pH and Buffer Solutions 133
    - Osmolarity and Osmolality 133
    - Quality Control in Laboratory Medicine 133
    - Automation in Clinical Biochemistry 134
    - Types of Autoanalyzers 135
    - Types of Fully Automated Analyzers 135
    - Cleaning and Care of Laboratory Glassware and Equipment 135
    - Analytical Biochemistry: Uses of Balances, Centrifuge Machines, and Colorimeters 136
    - Universal Precautions 137
    - Standard Precautions 137
    - Modes of Transmission of Diseases 138
    - Control and Prevention of Infections 138
    - Preventing the Spread of Infection 139
    - Interventions to Control and Minimize the Spread of Infections 140
- 14. Biochemistry of Complex Biomolecules 142**
- Introduction to Complex Biomolecules of Cells 142
  - Carbohydrates 142
    - Classification of Carbohydrates 142
    - Functions of Carbohydrates 143
    - Metabolism of Carbohydrates 144
    - Digestion of Carbohydrates 144
    - Absorption of Carbohydrates 145
    - Clinical Applications 145
    - Non-digestible Carbohydrates 145
    - Metabolic Pathways of Carbohydrates 145
    - Glucose Transporters 146
  - Carbohydrate Metabolic Pathways 146
    - Glycolysis (Embden-Meyerhof Pathway) 146
    - Citric Acid Cycle (Krebs Cycle or TCA Cycle) 148
    - Glycogenesis 149
    - Glycogenolysis 150
    - Gluconeogenesis 150
    - Hexose Monophosphate Pathway 151
    - Regulation of Blood Glucose 154
    - Glycosuria 154
    - Diabetes Mellitus 155
  - Proteins 156
    - Classification of Proteins 156

- Based on Structure 156
  - Examples of Protein Types 156
  - Functions of Proteins 157
  - Digestion of Proteins 158
  - Absorption of Proteins 159
  - Applied Aspects 159
  - Urea Cycle (Ornithine Cycle) 159
  - $\beta$ -Oxidation of Fatty Acids 160
  - Lipids 161
    - Functional Significance of Lipids 162
    - Classification of Lipids 162
    - Simple Lipids 162
    - Compound (Conjugated) Lipids 163
    - Derived Lipids 163
    - Lipoproteins and their Functions 163
    - Plasma Lipid Reference Values 163
    - Digestion and Absorption of Lipids 164
    - Metabolism of Lipids 164
    - $\beta$ -Oxidation of Fatty Acids 164
    - Fatty Acid Synthesis 165
    - Cholesterol 165
    - Ketone Bodies 166
  - Nucleic Acids 166
    - DNA and RNA: Structure and Function 166
    - Gene Expression: Transcription and Translation 168
    - Transcription 168
    - Translation 169
  - Molecular Diagnostics: Polymerase Chain Reaction (PCR) 170
  - Applications of PCR in Diagnostics 170
  - Clinical Uses of PCR 170
  - DNA Fingerprinting in Forensic Science 171
  - Genetic Disorders 171
  - Gene Therapy and CRISPR Technology 172
- 15. Minerals 173**
- Classification of Minerals 173
    - Sodium ( $\text{Na}^+$ ) 174
    - Potassium ( $\text{K}^+$ ) 175
    - Calcium ( $\text{Ca}^{2+}$ ) 176
    - Phosphorus (P) 177
    - Magnesium ( $\text{Mg}^{2+}$ ) 177
    - Iron (Fe) 177
    - Fluoride ( $\text{F}^-$ ) 178
- 16. Enzymes and Coenzymes 179**
- Enzymes 179
    - Introduction to Enzymes 179
    - Classification of Enzymes 179
    - Factors Affecting Enzymatic Activity 180
    - Use of Enzymes as Reagents 180
  - Coenzymes 181
    - Definition and Role of Coenzymes 181
    - Types of Coenzymes 181
    - Coenzymes Not Related to B-complex Vitamins 181
