### SECTION A - THEORY

|                                                                        |     |
|------------------------------------------------------------------------|-----|
| 1. Introduction                                                        | 1   |
| 2. Carbocyclic and Heterocyclic Compounds                              | 7   |
| 3. Nomenclature of Organic Compounds                                   | 15  |
| 4. Topical Anti-infectives                                             | 22  |
| 5. Antibacterial Sulphonamides                                         | 39  |
| 6. Antibiotics                                                         | 61  |
| 7. Antitubercular Drugs                                                | 102 |
| 8. Antileprotic Drugs                                                  | 113 |
| 9. Antifungal Drugs                                                    | 118 |
| 10. Antiamoebic Drugs and Anthelmintics                                | 125 |
| 11. Antimalarials                                                      | 137 |
| 12. Central Nervous System Stimulants                                  | 149 |
| 13. General Anaesthetics                                               | 156 |
| 14. Hypnotics and Sedatives                                            | 165 |
| 15. Anticonvulsants                                                    | 178 |
| 16. Drugs used to Treat Mental Illness                                 | 186 |
| 17. Narcotic Analgesics                                                | 207 |
| 18. Antipyretic Analgesics and Nonsteroidal<br>Antiinflammatory Agents | 218 |
| 19. Adrenergic Drugs                                                   | 229 |

|                                                        |     |
|--------------------------------------------------------|-----|
| 20. Adrenergic Blocking Agents                         | 243 |
| 21. Cholinergic Drugs and<br>Anticholinesterase Agents | 246 |
| 22. Cholinergic Blocking Agents                        | 254 |
| 23. Histamine and Antihistaminic Agents                | 267 |
| 24. Cardiovascular Agents                              | 278 |
| 25. Coagulants and Anticoagulants                      | 304 |
| 26. Diuretics                                          | 310 |
| 27. Hypoglycaemic Agents                               | 320 |
| 28. Local Anaesthetics                                 | 331 |
| 29. Thyroid Hormones and Antithyroids                  | 338 |
| 30. Steroid Hormones                                   | 344 |
| 31. Vitamins                                           | 363 |
| 32. Antineoplastic Agents                              | 391 |
| 33. Diagnostic Agents                                  | 403 |

### **SECTION B - PRACTICAL**

|                                                                               |     |
|-------------------------------------------------------------------------------|-----|
| 34. Preparation of Simple Organic Compounds                                   | 412 |
| 35. Systematic Qualitative Analysis of Organic<br>Compounds and Organic Drugs | 416 |
| 36. Tests for Identification of Selected<br>Groups of Drugs                   | 439 |
