

Contents

CHAPTER 1: Historical Perspectives and Milestones.....	1
Introduction.....	1
Discovery of Cell and Chromosome Theory of Inheritance.....	1
Major Branches of Biotechnology.....	2
Advances in Biotechnology	4
Significant Milestones in Biotechnological Research.....	4
Historical Contributions of Some Leading Scientists.....	4
Genetic Evaluation	10
Historical Perspectives of Plant Tissue Culture	13
Questions	14
 CHAPTER 2: Immunology and Immunological Preparations	 15
Introduction.....	15
How the Immune System Works.....	16
Principles	19
Types of Immunity	21
Immune Tolerance.....	22
Hypersensitivity.....	23
Antigen–Antibody Reactions and Their Applications	24
Immunomodulators.....	26
Applications of Immunomodulators	29
Vaccines	30
Questions	34
 CHAPTER 3: Environmental Biotechnology.....	 35
Introduction.....	35
Bioremediation	36
Management of Environmental Pollution.....	36
Management of Air, Waste Gases and Water Pollution.....	40
Questions	42

CHAPTER 4: Proteins and Proteomics.....	43
Introduction.....	43
Proteins.....	44
Proteomics.....	50
Questions.....	53
 CHAPTER 5: Animal Cell and Tissue Biotechnology.....	 55
Introduction.....	55
Primary and Established Cell Lines.....	56
Kinetics of Cell Growth.....	57
Animal Tissue Culture: Media Requirements.....	60
Questions.....	73
 CHAPTER 6: Medicinal Plant Biotechnology.....	 75
Genetics as Applied to Medicinal Herbs.....	75
Mutation.....	77
Polyploidy.....	79
Chemodemes (Chemical Races).....	81
Hybridization.....	81
Genetic Engineering and Recombinant DNA Technology in Plants.....	82
Plant Tissue Cultures as Sources of Biomedical Compounds.....	86
Historical Development.....	88
Types of Cultures.....	89
Culture Medium.....	90
Surface Sterilization of Explants.....	91
Establishment of Cultures.....	92
Phytopharmaceuticals in Plant Tissue Cultures.....	94
Bioproduction of Useful Metabolites in Hairy Root and Multiple Shoot Cultures.....	95
Questions.....	97
 CHAPTER 7: Microbial Culture and Fermentation Process.....	 99
Introduction.....	99
Microorganisms.....	100
Microbial Culture.....	100
Quality Control of Microbial Culture Media.....	107
Questions.....	109
 CHAPTER 8: Genetics and Molecular Biotechnology.....	 111
Introduction.....	111
DNA as Segment of Molecular Heredity.....	113
Genes.....	116
Mutations.....	123

Molecular Biotechnology	124
Questions	127
CHAPTER 9: Recombinant DNA Technology	129
Introduction.....	129
Outline of Recombinant DNA Technology	130
Introduction of the Recombinant DNAs into a Suitable Host Cell and Their Identification	132
Applications of Recombinant DNA Technology.....	134
Production of Human Follicle-Stimulating Hormone	139
Disease Diagnosis by Recombinant DNA Methods.....	139
Recombinant DNA Technology for Improving Milk Production	140
Applications in the Pulp and Paper Industry	140
Applications in Antibiotic-Producing Microorganisms	140
Genetic Engineering as a Part of Recombinant DNA Technology.....	141
Questions	142
CHAPTER 10: Microbial Transformation.....	143
Introduction.....	143
Types of Reactions Mediated by Microorganisms	145
Design for Biotransformation	149
Biotransformation Process and Its Improvement with Special Reference to Steroids	150
Questions	153
CHAPTER 11: Hybridoma Technology and Monoclonal Antibodies.....	155
Introduction.....	155
Principle for Creation of Hybridoma Cells.....	156
Large-Scale Production of Monoclonal Antibodies.....	158
Applications of Monoclonal Antibodies	160
Questions	165
CHAPTER 12: Antibiotics	167
Historical Development of Antibiotics.....	167
Antimicrobial Spectrum.....	171
Standardization of Antibiotics.....	172
Screening of Soil for Organisms Producing Antibiotics.....	174
Fermenter or Bioreactor	176
Design of Industrial Fermentation Process.....	178
Fermenter Design and Control.....	180
Isolation of Mutants	181
Factors Influencing Rate of Mutation.....	182
Isolation of Fermentation Products	183
Questions	187

CHAPTER 13: Genetic Recombination	189
Introduction.....	189
Methods of Gene Transfer in Plants.....	190
Horizontal Gene Transfer Technology	200
Protoplast Fusion	205
Gene Cloning.....	207
Development of Hybridoma by Monoclonal Antibodies.....	208
Some Important Medicines Produced by Biotechnology.....	211
Gene Transfer in Humans	213
Applications of Gene Transfer.....	213
Questions	216
 CHAPTER 14: Medicine and Edible Vaccines	 217
Introduction.....	217
Edible Vaccines	219
Questions	225
 CHAPTER 15: Broad Applications of Pharmaceutical Biotechnology	 227
Introduction.....	227
Applications of Biotechnology in the Production of Biomolecules.....	228
Applications of Biotechnology in the Diagnosis of Diseases.....	231
Applications of Biotechnology in Agriculture.....	231
Applications of Ultrasound in Biotechnology.....	232
Testing of Pharmaceuticals.....	232
Questions	232
 CHAPTER 16: Biotechnology in Drug Discovery.....	 233
Introduction.....	233
Current Trends in Modern Pharmaceutical Analysis for Drug Discovery	235
Recent Pharmacokinetic Advances in Drug Discovery and Development.....	235
Natural Product Drug Discovery.....	235
Questions	237
 CHAPTER 17: Immobilization of Enzymes	 239
Introduction.....	239
History of Enzymes	240
Enzyme Structure.....	241
Enzyme Kinetic.....	242
Bioproduction of Enzymes.....	246
Enzyme Production	248
Enzyme Immobilization	249
Immobilization of Plant Cells.....	255

Enzyme Engineering	259
Applications of Enzymes	260
Biosensors	262
Questions	267
 CHAPTER 18: Nanobiotechnology	269
Introduction.....	269
Computational Gene	270
Nanolithography	272
Nanomedicine and Nanodevices.....	274
Medical Applications of Molecular Nanotechnology	277
Questions	286
 CHAPTER 19: Recent Advances in Biopharmaceuticals	287
Introduction.....	287
Advantages of DNA Technology in the Production of Biopharmaceuticals	288
Biomolecules Produced Through Recombinant DNA Technology	289
Biopharmaceuticals of Animal Origin	290
Biopharmaceuticals of Plant Origin	292
Pharmaceutical Substances of Microbial Origin	293
Recent Advances in Biopharmaceuticals	300
Questions	303
 Appendix	305
Glossary	313
Bibliography	321
Index	327
