

Contents

<i>Preface</i>	v
Section I: Foundations	
1. Introduction	3
2. Etiology and Risk Factors	5
• Risk Factors	5
3. Pathophysiology of Diabetic Retinopathy	6
• Histopathology	8
Section II: Clinical Features	
4. Signs of Diabetic Retinopathy	13
• Microaneurysms	13
• Hemorrhages	14
• Hard Exudates	14
• Cotton Wool Spots/Soft Exudates	15
• Intraretinal Microvascular Abnormalities	16
• Neovascularization	16
• Early Treatment Diabetic Retinopathy Study (ETDRS) Classification	18
• International Clinical Diabetic Retinopathy Disease Severity Scale	20
• Diabetic Macular Edema Scale	22
5. Differential Diagnosis of Diabetic Macular Edema	23
Section III: Evaluation and Diagnostics	
6. Systemic Evaluation in Diabetic Retinopathy	27
• Laboratory Examination	27
7. Ocular Examination in Diabetic Retinopathy	28
• Fundus Photography	28
• Fundus Fluorescein Angiography	28
• Ultrawide Field Fundus Imaging and Fundus Fluorescein Angiogram	29

viii Diabetic Retinopathy

- Optical Coherence Tomography 30
- B-Scan Ultrasonography 31
- Optical Coherence Tomography Angiography 31
- Artificial Intelligence-based Devices 31

Section IV: Management

8. A Holistic Physician's Perspective on Diabetic Retinopathy 35
 - Individualised Glycemic Goals: Not 'One Size Fits All' 36
 - Lifestyle: The Foundation of All Treatment 37
 - Caution for Advanced Retinopathy 37
 - Risk Factors for Retinopathy Progression 37
 - Diabetic Retinopathy and Diabetes Mellitus Treatment: A Delicate Balance of Benefit and Risk 38
9. Management of Nonproliferative Diabetic Retinopathy 42
10. Management of Diabetic Macular Edema 43
 - Center-involving Diabetic Macular Edema 43
 - Noncenter involving Macular Edema 43
 - Treatment Protocol 44
 - Optical Coherence Tomography Biomarkers in Diabetic Macular Edema 46
11. Management of Proliferative Diabetic Retinopathy 48
 - Comparison of Panretinal Photocoagulation Protocols 48
12. Treatment of Advanced Diabetic Eye Disease 51
 - Treatment of Diabetic Retinopathy (without Diabetic Macular Edema) 53
13. Complications Associated with Diabetic Retinopathy Treatments 54
 - Complications Related to Intravitreal Antivascular Endothelial Growth Factor Therapy 54
 - Complications Related to Laser Photocoagulation 54
 - Complications Related to Pars Plana Vitrectomy 54

Section V: Prognosis and Prevention

14. Prognosis of Diabetic Retinopathy 59
15. Prevention Strategies and Screening Guidelines in Diabetic Retinopathy 60

- Primary Prevention: Preventing the Onset of Diabetic Retinopathy 60
- Secondary Prevention: Early Detection of Diabetic Retinopathy 60
- Tertiary Prevention: Limiting Progression and Complications 61
- India-specific Screening Guidelines 61

Section VI: Future Directions

- 16. Artificial Intelligence and Teleophthalmology in Diabetic Retinopathy 65
 - Artificial Intelligence in Diabetic Retinopathy Detection 65
 - Teleophthalmology 66
- 17. Emerging Therapies in Diabetic Retinopathy 68
 - Long-acting Drug Delivery Systems 68
 - Emerging Pharmacological Agents 68
 - Gene Therapy and Cellular Approaches 69
 - Integrative Technologies 70

Appendices

- Glossary of Abbreviations 73
- Self-Assessment: Advanced MCQs in Diabetic Retinopathy 75
