## PART I: PHARMACEUTICS

### Section A: Pharmaceutical Technology 2–108

|                                               |     |
|-----------------------------------------------|-----|
| 1. Introduction to Dosage Forms               | 3   |
| 2. Preformulation Studies                     | 10  |
| 3. Powder and Granules Dosage Form            | 21  |
| 4. Tablets                                    | 25  |
| 5. Capsule Dosage Form and Microencapsulation | 35  |
| 6. Monophasic Liquid Dosage Forms             | 44  |
| 7. Pharmaceutical Suspension                  | 52  |
| 8. Pharmaceutical Emulsions                   | 59  |
| 9. Parenteral Products                        | 66  |
| 10. Ophthalmic Products                       | 75  |
| 11. Pharmaceutical Aerosol                    | 78  |
| 12. Semi-solid Dosage Form                    | 85  |
| 13. Suppositories Dosage Forms                | 92  |
| 14. Novel and Controlled Drug Delivery System | 97  |
| 15. Pharmaceutical Packaging                  | 105 |

### Section B: Physical Pharmaceutics 109–165

|                                |     |
|--------------------------------|-----|
| 16. State of Matter            | 110 |
| 17. Micromeritics              | 116 |
| 18. Interfacial Phenomenon     | 124 |
| 19. Colloids                   | 134 |
| 20. Viscosity and Rheology     | 141 |
| 21. Kinetic and Drug Stability | 150 |
| 22. Dissolution                | 156 |
| 23. Complexation               | 161 |

### Section C: Pharmaceutical Engineering 166–217

|                                                 |     |
|-------------------------------------------------|-----|
| 24. Size Reduction and Size Separation          | 167 |
| 25. Mixing                                      | 171 |
| 26. Flow of Fluids and Transportation of Fluids | 175 |
| 27. Transportation of Material (Conveyers)      | 178 |
| 28. Flow of Heat                                | 181 |
| 29. Distillation                                | 184 |
| 30. Evaporation                                 | 188 |
| 31. Drying                                      | 191 |
| 32. Extraction                                  | 195 |
| 33. Filtration                                  | 198 |
| 34. Centrifugation                              | 203 |
| 35. Crystallization                             | 206 |

|                                                                           |     |
|---------------------------------------------------------------------------|-----|
| 36. Humidity, Refrigeration and Air-conditioning                          | 209 |
| 37. Corrosion, Industrial Hazards, Material of Construction and Pollution | 212 |

### Section D: Pharmaceutical Microbiology 218–290

|                                                |     |
|------------------------------------------------|-----|
| 38. General Microbiology                       | 219 |
| 39. Bacteria and their Detection Methods       | 223 |
| 40. Staining and Other Detection Techniques    | 231 |
| 41. Fungi                                      | 236 |
| 42. Virus                                      | 239 |
| 43. Immunology and Immunological Preparations  | 244 |
| 44. Sterilization Techniques                   | 259 |
| 45. Disinfectants                              | 264 |
| 46. Microbiological Assay                      | 267 |
| 47. Communicable and Non-communicable Diseases | 270 |
| 48. Diagnostic Tests of Different Diseases     | 287 |

### Section E: Biopharmaceutics and Pharmacokinetics 291–347

|                                                  |     |
|--------------------------------------------------|-----|
| 49. Absorption of Drugs                          | 292 |
| 50. Drug Distribution and Drug-Protein Binding   | 301 |
| 51. Biotransformation of Drugs                   | 310 |
| 52. Drug Excretion                               | 321 |
| 53. Bioavailability and Bioequivalence           | 329 |
| 54. Compartment Modeling and Non-linear Kinetics | 338 |

### Section F: Dispensing Pharmacy and Calculation 348–362

|                                                   |     |
|---------------------------------------------------|-----|
| 55. General Conversions in Calculation            | 349 |
| 56. Prescription                                  | 351 |
| 57. Abbreviations and Latin Terms of Prescription | 353 |
| 58. Dose Calculation and Posology                 | 357 |
| 59. Pharmaceutical Incompatibilities              | 360 |

### Section G: Miscellaneous 363–471

|                                                        |     |
|--------------------------------------------------------|-----|
| 60. Hospital Pharmacy                                  | 364 |
| 61. Pharmaceutical Jurisprudence                       | 375 |
| 62. Pharmaceutical Biotechnology                       | 397 |
| 63. Pharmaceutical Management                          | 414 |
| 64. GMP, GLP, QA, QC, ICH and Validation               | 428 |
| 65. Cosmetics                                          | 436 |
| 66. Radiopharmaceutics                                 | 455 |
| 67. Source of Drug Information                         | 458 |
| 68. Intellectual Property Rights (IPR)                 | 462 |
| 69. Biological or Blood Products and Surgical Products | 467 |

**PART II: PHARMACOGNOSY AND PHYTOCHEMISTRY**

|                                                                                |     |
|--------------------------------------------------------------------------------|-----|
| 70. General Pharmacognosy                                                      | 475 |
| 71. Biogenetic Pathways                                                        | 486 |
| 72. Traditional Herbal Drugs and Herbal Formulation (Ayurvedic, Siddha, Unani) | 490 |
| 73. Plant Biotechnology                                                        | 493 |
| 74. Glycosides                                                                 | 501 |
| 75. Alkaloids                                                                  | 515 |
| 76. Resins                                                                     | 528 |
| 77. Tannins                                                                    | 534 |
| 78. Volatile Oils                                                              | 540 |
| 79. Carbohydrates                                                              | 550 |
| 80. Proteins and Enzymes                                                       | 557 |
| 81. Fats and Lipids                                                            | 563 |
| 82. Miscellaneous                                                              | 568 |

**PART III: PHARMACOLOGY AND ALLIED SUBJECTS****Section A: Human Anatomy and Physiology 580–617**

|                                     |     |
|-------------------------------------|-----|
| 83. Integumentary System            | 581 |
| 84. Skeletal System                 | 583 |
| 85. Muscular System                 | 585 |
| 86. Endocrine System                | 588 |
| 87. Blood and Cardiovascular System | 593 |
| 88. Lymphatic System                | 600 |
| 89. Brain and Nervous System        | 602 |
| 90. Sense Organs                    | 606 |
| 91. Respiratory System              | 609 |
| 92. Digestive System                | 611 |
| 93. Urinary System                  | 613 |
| 94. Reproductive System             | 615 |

**Section B: Pharmacology-toxicology and Medicinal Chemistry 618–821**

|                                                          |     |
|----------------------------------------------------------|-----|
| 95. General Pharmacological Principles                   | 619 |
| 96. Drugs Acting on Autonomic Nervous System             | 637 |
| 97. Autacoids and Related Drugs                          | 653 |
| 98. Respiratory System Drugs                             | 664 |
| 99. Hormones and Related Drugs                           | 670 |
| 100. Drugs Acting on Peripheral (Somatic) Nervous System | 691 |
| 101. Drugs Acting on Central Nervous System              | 701 |
| 102. Cardiovascular Drugs                                | 715 |
| 103. Drugs Acting on Kidney and Diuretics                | 734 |
| 104. Drugs Affecting Blood and Blood Formation           | 744 |
| 105. Gastrointestinal Drugs                              | 753 |
| 106. Antimicrobial Drugs                                 | 760 |
| 107. Chemotherapy of Neoplastic Diseases or Chemotherapy | 802 |
| 108. Miscellaneous Drugs                                 | 816 |

**PART IV: PHARMACEUTICAL CHEMISTRY****Section A: Pharmaceutical Analysis 824–922**

|                                                                                                                                                |     |
|------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 109. UV-visible Spectroscopy                                                                                                                   | 825 |
| 110. Infrared Spectroscopy                                                                                                                     | 835 |
| 111. NMR Spectroscopy                                                                                                                          | 843 |
| 112. Mass Spectroscopy                                                                                                                         | 851 |
| 113. Miscellaneous Spectroscopy                                                                                                                | 860 |
| 114. Chromatography                                                                                                                            | 865 |
| 115. Titrations (Acid–base, Non-aqueous, Oxidation–Reduction Titration, Precipitation, Complexometric, and Gravimetry Karl Fischer Titrations) | 884 |
| 116. Polarography, Potentiometry and pH Measurement, Conductometry, Nephelometry and Turbidimetry, Amperometry                                 | 900 |
| 117. Miscellaneous                                                                                                                             | 914 |
| [A] Thermal Methods                                                                                                                            | 914 |
| [B] XRD (X-ray Diffraction) Method                                                                                                             | 916 |
| [C] Protein Docking and QSAR                                                                                                                   | 918 |

**Section B: Pharmaceutical Biochemistry 923–991**

|                                                      |     |
|------------------------------------------------------|-----|
| 118. General Biochemistry                            | 924 |
| 119. Enzymes                                         | 931 |
| 120. Proteins and Amino Acids                        | 945 |
| 121. Carbohydrates                                   | 958 |
| 122. Lipids and Fatty Acids                          | 970 |
| 123. Nucleic Acids, Purine and Pyrimidine Metabolism | 979 |
| 124. Vitamins                                        | 983 |

**Section C: Physical Chemistry 992–1035**

|                                                                   |      |
|-------------------------------------------------------------------|------|
| 125. General Physical Chemistry, States of Matter and Solid State | 993  |
| 126. Atomic Structure                                             | 997  |
| 127. Chemical Bonding                                             | 1002 |
| 128. Chemical Kinetics                                            | 1007 |
| 129. Solutions                                                    | 1015 |
| 130. Electrochemistry and Redox Reactions                         | 1021 |
| 131. Thermodynamics                                               | 1025 |
| 132. Surface Chemistry                                            | 1030 |

**Section D: Inorganic Chemistry 1036–1057**

|                          |      |
|--------------------------|------|
| 133. Inorganic Chemistry | 1037 |
|--------------------------|------|

**Section E: Organic Chemistry 1058–1097**

|                                                    |      |
|----------------------------------------------------|------|
| 134. General Organic Chemistry                     | 1059 |
| 135. Acid–Base Strength                            | 1064 |
| 136. Reaction Intermediates and Types of Reactions | 1067 |
| 137. Aromaticity                                   | 1074 |
| 138. Stereochemistry and Isomerism                 | 1078 |
| 139. Name Reactions and Other Reactions            | 1089 |
