<i>Preface</i>	<i>vii</i>
<i>List of Tables</i>	<i>xix</i>
<i>List of Figures</i>	<i>xxv</i>
<i>Abbreviations (Acronyms)</i>	<i>xxxiii</i>
<i>Symbols for Units</i>	<i>xxxvii</i>
<i>Conversion Factors</i>	<i>xxxix</i>

1. Introduction to Transportation

1

- 1.0 Preamble 1
- 1.1 Fields of Transportation Engineering 2
- 1.2 Roles of Transportation 5
- 1.3 Integrating and Coordinating Role of Transportation 16
- 1.4 Transportation Technologies 17
- 1.5 Comparison of Major Technologies 20
- 1.6 Components of Transportation System 22
- 1.7 Transportation Coordination 23
- 1.8 Population and Motor Vehicles Growth 28
- 1.9 Growth of Highways in India 31
- 1.10 Transportation Administration in India 36

2. Highway Terminology

38

- Introduction of Technical Terms Commonly used in Highway and Traffic Engineering 38

3. Highway Development and Planning

56

- 3.0 Preamble 56
- 3.1 History of Modern Roads 60
- 3.2 Development of Modern Paved Roads 62
- 3.3 Highway Planning 63
- 3.4 Highway Development and Planning in India 64
- 3.5 Road Development Plan Vision: 2021 85
- 3.6 National Transport Policy, 2005 88
- 3.7 Rural Road Development Plan Vision: 2025 94
- 3.8 Highway Administration and Organizations 100
- 3.9 Highway Hierarchy 111
- 3.10 Investment in Highway Sector 112

4. Highway Alignment and Location Surveys

115

- 4.0 Preamble 115
- 4.1 Ideal Alignment 116
- 4.2 Factors Controlling the Alignment 117
- 4.3 Route Location Process 122
- 4.4 Surveys for Finalizing Route Location 124
- 4.5 Material Surveys 130
- 4.6 Surveys for Road Improvements 131
- 4.7 Drainage Studies 132
- 4.8 Preparation of Detailed Project Reports (DPRs) 133

5. Pavement Materials and Testing

138

- 5.0 Preamble 138
- 5.1 Soil Characteristics 139
- 5.2 Soil Tests and their Significance 142
- 5.3 Characteristics of Road Aggregates 157
- 5.4 Aggregate Tests and their Significance 158
- 5.5 Type and Characteristics of Bituminous Materials (Binders) 166
- 5.6 Bitumen Tests and their Significance 174
- 5.7 Characteristics of Cement and Concrete 186

6. Geometric Design of Highways

187

- 6.0 Preamble 187
- 6.1 Basic Consideration in Geometric Design 187
- 6.2 Factors influencing Geometric Design Elements 188
- 6.3 Elements of Geometric Design 202
- 6.4 Sight Distances 212
- 6.5 Horizontal Alignment 219
- 6.6 Extra Widening on Curves 226
- 6.7 Transition Curves 230
- 6.8 Vertical Alignment 238
- 6.9 Vertical Curves 240
- 6.10 Safety and Geometric Design 246

7. Road User and Vehicle Characteristics

258

- 7.0 Preamble 258
- 7.1 The Human Behaviour 259
- 7.2 Physical Factors of Road Users 260
- 7.3 Psychological Factors of Road Users 262
- 7.4 PIEV Time 263
- 7.5 Behavioural Aspects and Provisions for Pedestrians 264
- 7.6 Characteristics and Provisions for Bicycle users 265

- 7.7 Physical Characteristics of Vehicles 266
- 7.8 Operating Characteristics of Vehicles 269
- 7.9 Braking and Accelerating Characteristics of Vehicles 272
- 7.10 Characteristics of Slow Moving Vehicles 274

8. Urban Traffic and Transportation Planning and Management

278

- 8.0 Preamble 278
- 8.1 Urban Transport System Planning 279
- 8.2 Urban Traffic and Transport Problems 281
- 8.3 Steps in Urban Transport Planning Process 284
- 8.4 Levels of Urban Transport Planning 293
- 8.5 System Approach to Transportation Planning 294
- 8.6 Traffic Forecast 295
- 8.7 Traffic System Management (TSM) Measures 298
- 8.8 Pedestrian and Cyclist Management Measures 304
- 8.9 Intelligent Transport Systems (ITS) 309
- 8.10 Applications of ITS in Different Countries 313
- 8.11 Basic Road Patterns 317
- 8.12 Alternative Urban Transportation System 317

9. Traffic Flow Theory

320

- 9.0 Preamble—Basic Flow Parameters 320
- 9.1 Relationship between Time Mean Speed and Space Mean Speed 321
- 9.2 Relationship between Flow Parameters 323
- 9.3 Greenshield's Linear Speed-Density Model 326
- 9.4 Other Theories of Traffic Flow 329
- 9.5 Highway Capacity 330
- 9.6 Levels of Service on Urban (City) Roads 335
- 9.7 Passenger Car Units on Urban Roads 336
- 9.8 Methods of Improving Capacity of Urban Roads 337
- 9.9 Levels of Service for Pedestrians 337

10. Traffic Data Collection and Analysis

350

- 10.0 Preamble 350
- 10.1 Traffic Volume (Flow) Study 351
- 10.2 Spot Speed Study 361
- 10.3 Travel Time and Delay Study 372
- 10.4 Origin and Destination Study 386
- 10.5 Parking Study 394
- 10.6 Accident Study 401
- 10.7 Study of High Accident Locations 415
- 10.8 Public Transport Study 419

11. Road Crossing and Parking Facilities

423

- 11.0 Preamble 423
- 11.1 Principles of Intersection Design 427
- 11.2 Elements of Intersection Design 431
- 11.3 Principles of Rotary Operation 443
- 11.4 Types of Rotaries 444
- 11.5 Design of Conventional Rotary Intersection 447
- 11.6 Design of a Small Roundabout 451
- 11.7 Grade Separated Intersections (Interchanges) 452
- 11.8 Summary of Consideration for Interchange Design 455
- 11.9 Parking Facilities (Provision for Stationary Vehicles) 457
- 11.10 Geometry of Parking Terminals 462

12. Traffic Control Devices

468

- 12.0 Preamble 468
- 12.1 Functions and requirements of Traffic Control Devices 468
- 12.2 Traffic Signs and their Classification 470
- 12.3 Placement, Height and Maintenance of Signs 475
- 12.4 Pavement Markings and their Types 476
- 12.5 Materials and Colours for Pavement Markings 478
- 12.6 Traffic Islands and their Classification 479
- 12.7 Road Delineators 480
- 12.8 Traffic Signals and their Types 481
- 12.9 Criteria for Signalisation of an Intersection (Warrants) 485
- 12.10 Basic Requirements of Traffic Signals 486
- 12.11 Signal Terminology 487
- 12.12 Design of Pre-timed Traffic Signals 491
- 12.13 Pedestrian Requirements at Signals 493

13. Highway Safety and Design

502

- 13.0 Preamble – Accident Scenario 502
- 13.1 United Nation's Decade of Action (2011–2020) for Road Safety 507
- 13.2 Causes of Road Accidents 507
- 13.3 Reporting, Recording and Analysis of Accident Data 511
- 13.4 Road Design with Safety Considerations 514
- 13.5 Pedestrian Safety 523
- 13.6 Road Safety Audit (RSA) 523
- 13.7 Traffic Calming 531

14. Structural Design of Highway Pavements

534

- 14.0 Preamble 534
- 14.1 Stresses in Flexible Pavements 537

- 14.2 Considerations for Flexible Pavement Design 546
- 14.3 Methods of Flexible Pavement Design 554
- 14.4 Flexible Pavement Design Procedures in other Countries 563
- 14.5 Analytical Methods of Flexible Pavement Design 572
- 14.6 Rigid (Concrete) Pavements 576
- 14.7 Factors that Govern Design of Rigid Pavements 577
- 14.8 Stresses in Rigid Pavement 579
- 14.9 Design of Rigid Pavements 589
- 14.10 Design of Joints in Concrete Pavements 596
- 14.11 Reinforced Concrete Pavements 598
- 14.12 Continuously Reinforced Concrete Pavements (CRCP) 599
- 14.13 Prestressed Concrete Pavements 600
- 14.14 Rigid Pavement Distress 601

15. Highway Construction and Stabilisation

602

- 15.0 Preamble 602
- 15.1 Construction Technology 604
- 15.2 Construction Management and Planning 604
- 15.3 Quality Control in Highway Construction 605
- 15.4 Construction Equipment (Highway Making Machines) 609
- 15.5 Activities in Construction of Highway Pavements 619
- 15.6 Construction of Flexible Pavements 620
- 15.7 Surface Courses of Bitumen 625
- 15.8 Bituminous Mix Design (Marshall Method) 630
- 15.9 Low Volume Low Cost Roads (Rural Roads) 636
- 15.10 Stabilisation 639
- 15.11 Construction of Rigid (Cement Concrete) Pavements 648
- 15.12 Joints in Cement Concrete Roads 653
- 15.13 Special Road Pavements 659

16. Pavement Maintenance, Evaluation and Strengthening

662

- 16.0 Preamble 662
- 16.1 Types of Maintenance 663
- 16.2 Defects in Flexible Pavements 664
- 16.3 Defects in Rigid (concrete) Pavements 672
- 16.4 Maintenance Management System (MMS) 676
- 16.5 Modelling the Problem of Highway Maintenance 678
- 16.6 Maintenance Techniques 686
- 16.7 Evaluation of Highway Pavements 691
- 16.8 Techniques of Pavement Evaluation 691
- 16.9 Strengthening of Pavements (overlays) 702

- 16.10 Design of Overlays 703
- 16.11 Preparation of Surface for the Overlays 709

17. Highway Embankments

711

- 17.0 Preamble 711
- 17.1 Dimensions of Embankment 711
- 17.2 Stability of Embankments 712
- 17.3 Slope Stability Analysis 715
- 17.4 Settlement Analysis 718
- 17.5 Design of Embankments 720
- 17.6 Materials for Embankments 720
- 17.7 Embankment Construction 723
- 17.8 Erosion Control of Embankment Slopes 727

18. Highway Drainage

729

- 18.0 Preamble 729
- 18.1 Sources of Water Entry in Road Structure 729
- 18.2 Consequences of Poor Drainage System 731
- 18.3 Basic Principles of Good Drainage 731
- 18.4 Drainage Systems: Surface Water Drainage 733
- 18.5 Sub-surface Drainage System 737
- 18.6 Cross Water Drainage (Non-submersible) Works 742
- 18.7 Submersible Cross-Drainage Works 746
- 18.8 Special Consideration for Drainage of Urban Roads 747
- 18.9 Special Consideration for Drainage in Water Logged Areas 747

19. Hill Roads

748

- 19.0 Preamble 748
- 19.1 Classification of Hill Roads 748
- 19.2 Planning of Hill Roads 749
- 19.3 Alignment of Hill Roads 750
- 19.4 Geometric Design of Hill Roads 750
- 19.5 Drainage of Hill Roads 757
- 19.6 Protective Structures in Hill Roads 758
- 19.7 Landslides and Remedial Measures 763
- 19.8 Construction of Hill Roads 764
- 19.9 Maintenance of Hill Roads 765

20. Highway Lighting

767

- 20.0 Preamble 767
- 20.1 General Principles of Visibility on Roads 768
- 20.2 Lighting System and Road Accidents 769
- 20.3 Definition of Terms in Lighting System 770

- 20.4 Warrants of Highway Lighting 771
- 20.5 Types and Selection of Highway Lighting System 772
- 20.6 Parameters of a Lighting System 774
- 20.7 Steps in Highway Lighting Design Process 776
- 20.8 Solar Highway Lighting System 776

21. Highways and the Environment

780

- 21.0 Preamble 780
- 21.1 Environmental Consequences of Highway Development 782
- 21.2 Environmental Impact Assessment (EIA) 792
- 21.3 Environment Management Plan (EMP) 800
- 21.4 Management and Mitigation Measures for Sustainable Environment 800
- 21.5 Environmental Audit (Post Project Monitoring) 803
- 21.6 Environmental Regulation related to Roads/Highways 805
- 21.7 Landscaping and Aesthetics 808
- 21.8 Roadside Arboriculture 808

22. Economic Analysis of Highway Projects

812

- 22.0 Preamble 812
- 22.1 Role of Economic Evaluation 814
- 22.2 Basic Principles of Economics 814
- 22.3 Cost Considerations 815
- 22.4 Considerations of Benefits 819
- 22.5 Economic Evaluation 824
- 22.6 Methods of Economic Evaluation 827
- 22.7 Limitations of Economic Analysis 830
- 22.8 Steps in Economic Evaluation 830

23. Computer Applications in Highway (Transportation) Engineering

834

- 23.0 Preamble 834
- 23.1 Advantages of using Computers in Highway and Traffic Engineering 835
- 23.2 Computer Softwares 836
- 23.3 Planning Software 836
- 23.4 Traffic Simulation Software 839
- 23.5 Traffic Capacity Software 842
- 23.6 Road Design Software 843
- 23.7 Signal or Intersection Design Software 844
- 23.8 Other Softwares 846

<i>Typical Questions for Practice (Theoretical, Numerical and Objective type)</i>	849
