

# Index of Competencies

## Competency based Undergraduate Curriculum for the Indian Medical Graduate

Code	Competency	Chapter	Page no
<b>DR a.1</b>	Describe the structure and function of skin	1A	2
<b>DR a.2</b>	Describe the primary and secondary skin lesion	2	27
<b>DR a.3</b>	Elicit document and present a medical history of a common dermatology case	2	21
<b>DR a.4</b>	Perform a dermatological examination that establishes the diagnosis and severity of presentation of a common dermatology case	2	23
<b>DR5.1</b>	Describe the etiology, microbiology, pathogenesis, natural history, clinical features, presentations and complications of scabies in adults and children	9	136
<b>DR5.2</b>	At the end of the session the phase II student must be able to identify and differentiate scabies from other lesions in pediatric age group	9	139
<b>DR5.3</b>	At the end of the session the phase II student must be able to enumerate and describe the pharmacology, administration and adverse reaction of pharmacotherapies for scabies	9	139, 140
<b>DR6.1</b>	Describe the etiology pathogenesis and diagnostic features of pediculosis in adults and children	9	132, 134
<b>DR6.2</b>	Differentiate pediculosis from other skin lesions in adults and children and its treatment	9	134
<b>DR15.1</b>	Identify and distinguish folliculitis impetigo and carbuncle from other skin lesions	3	49
<b>DR15.2</b>	Identify staphylococcus on a gram stain	3	46
	At the end of the session the phase II student must be able to describe the steps in performing a Gram stain		
	At the end of the session the phase II student must be able to describe the characteristics of staphylococcus seen in gram stain		
	At the end of the session the phase II student must be observe gram stain		
	At the end of the session the phase II student must be able to identify staphylococcus in a gram stain correctly		
<b>DR15.3</b>	Enumerate the indications and describe the pharmacology, indications and adverse reactions of topical and systemic drugs used in treatment of pyoderma	3	47, 52
<b>DR15.4</b>	Enumerate the indications for surgical referral	3	53
<b>DR8.1</b>	Describe the etiology microbiology pathogenesis and clinical presentations and diagnostic features of common viral infections of the skin	4	59
<b>DR8.2</b>	Identify and distinguish herpes simplex and herpes labialis from other skin lesions	4	61
<b>DR8.3</b>	Identify and distinguish herpes zoster and varicella from other skin lesions	4	63, 65
<b>DR8.4</b>	Identify and distinguish viral warts from other skin lesions	4	70
<b>DR8.5</b>	Identify and distinguish molluscum contagiosum from other skin lesions	4	59
<b>DR8.6</b>	Enumerate the indications, describe the procedure and perform a Tzanck smear	4	63
<b>DR8.7</b>	Enumerate the indications and describe the pharmacology, administration and adverse reaction of pharmacotherapies for common viral illnesses of the skin	4	64–66, 71
<b>DR7.1</b>	Describe the etiology microbiology pathogenesis and clinical presentations and diagnostic features of dermatophytes	5	76
<b>DR7.2</b>	Identify candida species in fungal scrapings and KOH mount	5	92
<b>DR1.1</b>	Enumerate the causative and risk factors of acne vulgaris	22	322, 323
<b>DR1.2</b>	Identify and grade the various common types of acne vulgaris	22	325
<b>DR1.3</b>	Describe the treatment and preventive measures for various kinds of acne vulgaris	22	328
<b>DR12.1</b>	At the end of the session the phase III student must be able to describe the aetiopathogenesis of eczema	13	172
<b>DR12.3</b>	At the end of the session the phase III student should be able to classify and grade eczema	13	173
<b>DR12.4</b>	At the end of the session the phase III student should be able to enumerate the indications and describe the pharmacology, and adverse reactions of drugs used in the treatment of eczema	13	174, 180, 187, 188, 192
<b>DR12.5</b>	At the end of the session the phase III student should be able to define erythroderma and enumerate and identify the causes of erythroderma.	12	167
<b>DR12.6</b>	At the end of the session the phase III student should be able to identify and distinguish exfoliative dermatitis from other skin lesions	12	168, 169

<i>Code</i>	<i>Competency</i>	<i>Chapter</i>	<i>Page no</i>
<b>DR12.7</b>	At the end of the session the phase III student should be able to identify and distinguish fixed drug eruptions and Stevens-Johnson syndrome from other skin lesions	16	217, 218
<b>DR2.1</b>	Identify and differentiate vitiligo from other causes of hypopigmented lesions	18	249
<b>DR2.2</b>	Describe the treatment of vitiligo	18	252
<b>DR3.1</b>	Identify and distinguish psoriatic lesions from other causes	10	144
<b>DR3.2</b>	Demonstrate the grattage test. At the end of the session the phase III student must be able to demonstrate the grattage test.	10	147
<b>DR3.3</b>	Enumerate the indications for and describe the various modalities of treatment	10	150
<b>DR4.1</b>	Identify and distinguish lichen planus lesions from other causes	11	158
<b>DR4.2</b>	Enumerate and describe the treatment modalities for lichen planus	11	159
<b>DR14.1</b>	At the end of the session the phase III student must be able to describe the classification, etiology, pathogenesis and clinical precipitating features and of Urticaria and angioedema	14	197, 198
<b>DR14.2</b>	At the end of the session the phase III student must be able to distinguish urticaria from other skin lesions	14	203
<b>DR14.4</b>	At the end of the session the phase III student must be able to identify and distinguish angioedema from other skin lesions	14	204
<b>DR14.5</b>	Enumerate the indications and describe the pharmacologic indications and adverse reactions of various drugs used in the treatment of urticaria and angioedema	14	203, 205
<b>DR9.1</b>	Classify, describe the epidemiology, etiology, microbiology, pathogenesis and clinical presentations and diagnostic features of Leprosy	7	108
<b>DR9.2</b>	Demonstrate (and classify based on) the clinical features of leprosy including an appropriate neurologic examination	7	109, 110, 112
<b>DR9.3</b>	Enumerate the indications and observe the performance of a slit skin smear in patients with leprosy	7	111
<b>DR9.4</b>	Enumerate, describe and identify lepra reactions and supportive measures and therapy of lepra reactions	7	118
<b>DR9.5</b>	Enumerate the indications and describe the pharmacology, administration and adverse reaction of pharmacotherapies for various classes of leprosy based on National Guidelines	7	121
<b>DR9.6</b>	Describe the treatment of Leprosy based on WHO guidelines	7	120
<b>DR9.7</b>	Enumerate and describe the complications of leprosy and its management, including understanding disability and stigma	7	116
<b>DR10.1</b>	Identify and classify syphilis based on the presentation and clinical manifestations	31	446
<b>DR10.2</b>	Identify spirochete in a dark ground microscopy	31	446
<b>DR10.3</b>	Enumerate indications and describe pharmacology, administration and adverse effects of pharmacotherapies for syphilis.	31	452
<b>DR10.4</b>	Describe the prevention of congenital syphilis	31	449
<b>DR10.6</b>	Describe the etiology, diagnostic and clinical features of non-syphilitic sexually transmitted diseases (chancroid, donovanosis and LGV)	31	452, 456
<b>DR10.7</b>	Identify and differentiate based on the clinical features of non-syphilitic sexually transmitted diseases (chancroid, donovanosis, LGV)	31	452, 456
<b>DR10.8</b>	Enumerate the indications and describe the pharmacology, indications and adverse effects of drugs in the non-syphilitic sexually transmitted diseases (chancroid, donovanosis, LGV)	31	452, 456
<b>DR10.9</b>	Describe etiology, clinical features and management of herpes genitalis	31	453
<b>DR10.10</b>	Describe the syndromic approach to ulcerative sexually transmitted disease	31	464
<b>DR10.11</b>	Describe the etiology, diagnostic and clinical features and management of gonococcal and non-gonococcal urethritis	31	459, 460
<b>DR10.12</b>	Describe the etiology, diagnostic and clinical features and management of vaginal discharge	31	463
<b>DR11.1</b>	Describe the etiology, pathogenesis and clinical features of the dermatologic manifestations of HIV and its complications including opportunistic infections and IRIS	30	432
<b>DR11.2</b>	Describe cutaneous manifestations of HIV. At the end of the phase III student must be able to describe cutaneous manifestations of HIV correctly	30	432
<b>DR11.3</b>	Enumerate indications and describe the pharmacology, administration and adverse effects of pharmacotherapies for dermatologic lesions in HIV	30	441
<b>DR13.1</b>	At the end of the session the phase III student should be able to distinguish bulla from vesicles	17	229
<b>DR13.2</b>	At the end of the session the phase III student should be able to demonstrate the Tzanck test, Nikolsky sign and bulla spread sign	17	228
<b>DR16.1</b>	At the end of the session the phase III student must be able to identify and distinguish skin lesions of SLE	26	376
<b>DR16.2</b>	At the end of the session the phase III student must be able to identify and distinguish Raynaud's phenomenon	20	293

<i>Code</i>	<i>Competency</i>	<i>Chapter</i>	<i>Page no</i>	<b>xvii</b>
<b>DR17.1</b>	Enumerate and identify the cutaneous findings in vitamin A deficiency	27	394	
<b>DR17.2</b>	At the end of the session the phase III student should be able to enumerate the cutaneous findings of vitamin B deficiency	27	395–398	
<b>DR17.3</b>	Enumerate and describe the various changes in vitamin C deficiency	27	398	
<b>DR17.4</b>	Enumerate and describe the various changes in Zinc deficiency	27	391	
<b>DR18.1</b>	Enumerate the cutaneous features of Type 2 diabetes	27	403	
<b>DR18.2</b>	Enumerate the cutaneous features of hypo/hyper-thyroidism	27	403	
<b>DR b.1</b>	Identify and differentiate scarring from non-scarring alopecia	24	345, 347	
<b>DR b.2</b>	Identify and differentiate alopecia areata from other causes of hair loss	24	345, 348	
<b>DR b.3</b>	Identify and differentiate androgenetic alopecia from other causes of hair loss	24	350, 352	
<b>DR b.4</b>	Describe the treatment for common causes of hair loss	24	353, 356	
<b>DR c.1</b>	Identify and differentiate acute paronychia from other causes	25	366	
<b>DR c.2</b>	Identify and differentiate chronic paronychia from other causes	25	366	
<b>DR c.3</b>	Describe the treatment for acute paronychia	5	95	
<b>DR c.4</b>	Describe the treatment for chronic paronychia	5	95	
<b>DR c.4</b>	Identify and differentiate nail psoriasis from other causes	11, 25	157, 365, 366	
<b>DR c.5</b>	Identify and differentiate nail lichen planus from other causes	25	365	
<b>DR d.1</b>	Observe a Wood's lamp examination	2	35	
<b>DR d.2</b>	Observe a patch test examination	2, 13	36, 180, 182
