Preface

Syllabus

v

ix

UNIT I Nervous System

- 1. Nervous System** 2
- Organisation (overview) of the nervous system 2
 - Cellular components of the nervous system 3
 - Neuron communication 4
 - Other nervous tissues 5
 - Nerve impulse 6
 - Sensory afferent receptors 7
 - Motor efferent endings 8
 - Central nervous system 9
 - Brain 10
 - Cerebrospinal fluid 13
 - Spinal cord 14
 - Medulla oblongata 19
 - Pons 21
 - Midbrain 22
 - Cerebellum 23
 - Cerebrum 27
 - Cerebral hemisphere 28
 - Diencephalon 33
 - Basal nuclei 36
 - Reticular formation 37
 - Blood supply of brain 39
 - Summary of the ventricles of the brain 43
 - Higher mental functions 43
 - Pathophysiology of nervous system disorders 44
 - Schizophrenia 49
 - Clinical aspects 53
 - Diseases that can be diagnosed by EEG 53
 - Diseases of spinal cord 54
 - Aging changes 54

UNIT II Gastrointestinal System

- 2. Gastrointestinal System** 58
- Parts of digestive system 58
 - Alimentary canal 64
 - Digestion and absorption of food 80
 - Movements of alimentary tract 81
 - Accessory organs of digestive system 83
 - Metabolism 89
 - Control of the digestive system 91
 - Pathophysiology of gastrointestinal system disorder 91
 - Clinical aspects 99
 - Energetics 100
 - Basal metabolic rate (BMR) 101

UNIT III Respiratory and Urinary System

- 3. Respiratory System** 106
- Organs of respiration 106
 - Muscles of respiration 120
 - Pulmonary ventilation 121
 - Physiology of respiration 121
 - Pulmonary circulation 123
 - Exchange of gases 123
 - Regulation of airflow and blood flow in the lung 125
 - Regulation of respiration 126
 - Effect of exercise on respiration 127
 - Lung volumes and capacities 127
 - Pulmonary function tests 129
 - Pathophysiology of respiratory system disorder 130
- 4. Urinary System** 138
- Urinary system 138
 - Parts of urinary system 138
 - Functions of kidneys 147
 - Pathophysiology of urinary system disorder 154
 - Hemodialysis 158
 - Urinary tract infection 158
 - Aging 161

UNIT IV Endocrine System

- 5. Endocrine System** 164
- Hormones 164
 - Pineal body 166
 - Hypothalamus 167
 - Pituitary gland/hypophysis cerebri 169
 - Thyroid gland 172
 - Parathyroid glands 174
 - Thymus gland 175
 - Adrenal or suprarenal glands 177
 - Hormones from other organs 180
 - Pathophysiology of endocrine system disorder 183

UNIT V Reproductive System

- 6. Reproductive System** 194
- Male reproductive system 194
 - Male hormones 201
 - Spermatogenesis 204

Female reproductive system 206
External genital organs—pudendum/vulva 206
Internal genital organs 207
Accessory reproductive organ 216
Hormones secreted by female reproductive system 218
Physiology of the menstrual cycle 222
Menopause or female climacteric 222
Fundamentals of reproduction 223
Placenta 224
Contraceptives 224

Pathophysiology of reproductive system disorder and cancer 225

7. Introduction to Genetics 235

Chromosomes 235
Genes 237
Some important terms 237
DNA structure 238
Protein synthesis 238
Patterns of inheritance 238
Chromosomal aberrations 239
Genetic counselling 241
