Preface v

SAFETY TECHNIQUES 1

SECTION I

1. BASIC CHEMISTRY LAB EQUIPMENT 3

Heating Devices 7

Magnetic Stirrer 10

Fumehood 10

2. COMMON LABORATORY TECHNIQUES 11

Handling of Glassware 11

Heating Sources 11

Filtration 12

Decolourization 13

Refluxing 13

Sublimation 13

Chromatography 14

Solvent Drying and Drying Agents 14

Use of Conventional Drying Agents 15

Drying Process of Some Common Solvents 16

TRAPS 18

Simple Distillation 18

Calculation of Percent Yield 18

Theoretical, Actual and Percent Yields 18

3. CRYSTALLIZATION TECHNIQUE 20

Selection of a Suitable Solvent for the Recrystallization 20

Dissolving the Impure Solid in a Minimum Volume of Hot Solvent 21

Removal of Any Insoluble Impurities by Filtration 21
Crystallization of the Desired Compound from the Solution 22
Isolation of the Purified Solid Compound 22

4. DETERMINATION OF MELTING AND BOILING POINTS**23**

Determination of Melting Point 25
Determination of Boiling Point 26

SECTION II**5. SINGLE STEP SYNTHESIS****27**

Experiment 5.1: Synthesis of Aspirin (Acetyl Salicylic Acid) from Salicylic Acid 27
Experiment 5.2: Synthesis of 2,4,6-Tribromophenol from Phenol 31
Experiment 5.3: Synthesis of Picric Acid from Phenol 33
Experiment 5.4: Synthesis of Urotropine from Formaldehyde 36
Experiment 5.5: Synthesis of Phenyl Benzoate from Phenol 38
Experiment 5.6: Synthesis of 2,3-Dihydro-1,4-Phthalazinedione from Phthalic Anhydride 41
Experiment 5.7: Synthesis of Methyl Salicylate (Oil of Wintergreen) from Salicylic Acid 43
Experiment 5.8: Synthesis of *m*-Dinitrobenzene from Nitrobenzene 45
Experiment 5.9: Synthesis of Dibenzalacetone from Acetone 48
Experiment 5.10: Synthesis of 2,4,6-Tribromoaniline from Aniline 50
Experiment 5.11: Synthesis of 1,2,3,4-Tetrahydrocarbazole from Cyclohexanone 52
Experiment 5.12: Synthesis of 7-Hydroxycoumarin (Umbelliferone) 55
Experiment 5.13: Synthesis of 2,4,5-Triphenyl 1H-Imidazole from Benzil 57
Experiment 5.14: Synthesis of Benzylideneaniline (Schiff Base) from Aniline 59
Experiment 5.15: Synthesis of 2-Naphthol Aniline or Aniline Yellow Dye 62
Experiment 5.16: Synthesis of Iodoform from Ethyl Alcohol or Acetone 64
Experiment 5.17: Synthesis of Benzoic Acid from Benzamide 67
Experiment 5.18: Synthesis of Benzotriazole from *o*-Phenylenediamine 70
Experiment 5.19: Synthesis of Benzimidazole from *o*-Phenylenediamine 72
Experiment 5.20: Synthesis of 2-Phenyl-4H-Benzo[1,3] Oxazin-4-one from Anthranilic Acid 74
Experiment 5.21: Synthesis of 3,5-Dimethyl Pyrazole from Acetylacetone 76
Experiment 5.22: Synthesis of 2,5-Diphenyl Oxazole 79
Experiment 5.23: Synthesis of Chalcone (Benzal Acetophenone) 82
Experiment 5.24: Synthesis of *m*-Nitrobenzoic Acid from Benzoic Acid 84
Experiment 5.25: Synthesis of Barbituric Acid from Urea 87
Experiment 5.26: Synthesis of α -Phenylthiourea from Aniline 89
Experiment 5.27: Synthesis of Glucosazone from Glucose 91

- Experiment 5.28: Synthesis of Anthrone from Anthraquinone 94
- Experiment 5.29: Synthesis of Phenolphthalein from Phthalic Anhydride and Phenol 96
- Experiment 5.30: Synthesis of Benzocaine from *para*-Aminobenzoic Acid 99
- Experiment 5.31: Synthesis of Benzanilide from Aniline 102
- Experiment 5.32: Synthesis of Chlorobutanol from Acetone and Chloroform 104
- Experiment 5.33: Synthesis of Acetaminophen from *p*-Aminophenol 106
- Experiment 5.34: Synthesis of Phenothiazine from Diphenylamine 109
- Experiment 5.35: Synthesis of Phenacetin from Acetaminophen 110
- Experiment 5.36: Synthesis of 1-Phenyl-3-Methylpyrazol-5-one from Phenyl Hydrazine 113
- Experiment 5.37: Synthesis of Hippuric Acid from Glycine 115
- Experiment 5.38: Synthesis of 2,5-Dimethyl-1-Phenyl Pyrole from 2,5-Hexanedione 117
- Experiment 5.39: Synthesis of Benzoic Acid (and Benzyl Alcohol) from Benzaldehyde 120
- Experiment 5.40: Synthesis of 5-Nitro Salicylic Acid from Salicylic Acid 123
- Experiment 5.41: Synthesis of Cinnamic Acid from Benzaldehyde 125

6. TWO STEP SYNTHESIS

129

- Experiment 6.1: Synthesis of *p*-Bromoacetanilide from Aniline 129
- Experiment 6.2: Synthesis of *p*-Nitroacetanilide from Aniline 134
- Experiment 6.3: Synthesis of 4-Methyl-7-Acetoxy coumarin from Resorcinol 137
- Experiment 6.4: Synthesis of 9-Acridone from *o*-Chlorobenzoic Acid 140
- Experiment 6.5: Synthesis of 4-Benzylidene-2-Methyl oxazole-5-one from Glycine 143
- Experiment 6.6: Synthesis of Dilantin (5,5-Diphenyl Hydantoin) from Benzoin 147
- Experiment 6.7: Synthesis of Anthranilic Acid from Phthalic Anhydride 151
- Experiment 6.8: Synthesis of 2-Phenylindole from Acetophenone 155
- Experiment 6.9: Synthesis of Benzilic Acid from Benzoin 159
- Experiment 6.10: Synthesis of 2,3-Diphenyl Quinoxaline from Benzil and *o*-Phenylenediamine 162
- Experiment 6.11: Synthesis of 6-Methoxy-2-Amino Benzothiazole from 6-Methoxy-2-Aniline 164
- Experiment 6.12: Synthesis of 4-Phenyl Butyric Acid from Benzene via Friedel Craft Reaction 167
- Experiment 6.13: Synthesis of Caprolactam from Cyclohexanone 170
- Experiment 6.14: Synthesis of Propranolol from α -Naphthol 173
- Experiment 6.15: Synthesis of Isatin from Aniline 176
- Experiment 6.16: Synthesis of Lidocaine from 2,6-Dimethyl Aniline 180
- Experiment 6.17: Synthesis of Methyl Orange from Aniline 184
- Experiment 6.18: Synthesis of Eosin from Resorcinol 190

7. MULTI STEP SYNTHESIS

195

- Experiment 7.1: Synthesis of Flavone from 2-Hydroxy Acetophenone 195
- Experiment 7.2: Synthesis of *p*-Bromoaniline from Aniline 199
- Experiment 7.3: Synthesis of Sulphanilamide from Aniline 202

Experiment 7.4: Synthesis of *N*-Phenyl Succinimide from Succinic Acid 206

Experiment 7.5: Synthesis of Tolbutamide from Toluene 209

8. EXTRACTION PROCEDURE

213

Experiment 8.1: Extraction of Caffeine from Tea Leaves 213

Experiment 8.2: Isolation of *L*-Cystine from Human Hairs 215

Experiment 8.3: Extraction of Carvone from Caraway Seeds 217

Experiment 8.4: Isolation of Limonene from Orange Peel 219

Experiment 8.5: Isolation of Eugenol from Clove Buds 222

Experiment 8.6: Isolation of Citric Acid from Lemon Juice 225

Experiment 8.7: Isolation of Nicotine from Tobacco Leaves 227

Experiment 8.8: Isolation of Piperine from Pepper 228

Experiment 8.9: Extraction of Casein from Milk 231

Experiment 8.10: Isolation of Lactose from Powdered Milk 233

Experiment 8.11: Isolation of Lycopene from Tomato 234

Experiment 8.12: Isolation of Trimyristin from Nutmeg 236

Experiment 8.13: Isolation of Quercetin from the Leaves of Fenugreek (*Trigonella Foenum*) 238
