## **CHAPTER 1: Real Numbers** **1 – 24**

Set, Relation and Map	1
The Real Numbers and Order Properties of $\mathbb{R}$	4
Absolute Value of Real Number	6
The Extended Real Number System	6
Real Line	7
Supremum and Infimum	7
Complete Ordered Field	9
Equivalent Set	11
Intervals and Neighbourhood of a Point	13
Interior Point of a Set, Open Sets	15
Limit Point of a Set	16

## **CHAPTER 2: Sequences of Real Numbers** **25 – 80**

Sequence	25
Bernoulli's Inequality	34
Squeeze Theorem	35
Monotone Sequences	41
Cauchy's First Theorem on Limits	52
Cesaro's Theorem on Limits	55
Cauchy's Second Theorem on Limits	55
Nested Interval Theorem	59
Limit Point of a Sequence	62
Limit Superior and Limit Inferior	63
Monotone Subsequence Theorem	69
Bolzano-Weierstrass Theorem	70
Cauchy Sequence	75

## **CHAPTER 3: Infinite Series** **81 – 144**

Cauchy's General Principle of Convergence of Series	81
Comparison Theorem	84
D' Alembert's Ratio Test	94
Raabe's Test	99
Logarithmic Ratio Test	103
De-Morgan's and Bertrand's Test	108
Cauchy's Root Test	112
Gauss's Test	116

Cauchy's Integral Test	122
Cauchy's Condensation Test	126
Leibnitz Test	131
Abel's Test	136
Dirichlet's Test	137
Reimann's Theorem	139
<b>CHAPTER 4: Functions of Single Variable: Limit and Continuity</b>	<b>145 – 216</b>
Limit of a Function	145
Sequential Criterion of Limit	151
Limits at Infinity	161
Sequential Criterion for Infinite Limit	163
Sequential Criterion for Limits at Infinity	163
Cauchy Criterion for Limits at Infinity	163
Left Hand and Right Hand Limit	164
Continuity of Functions	171
Discontinuity of a Function	186
Monotone Function	195
Uniform Continuity	201
<b>CHAPTER 5: Functions of Single Variable: Differentiation</b>	<b>217 – 247</b>
Caratheodory's Theorem	218
Geometrical Interpretation of the Derivative	219
Chain Rule	235
Inverse Functions	237
Darboux Theorem	240
<b>CHAPTER 6: Mean Value Theorems and their Applications</b>	<b>248 – 309</b>
Rolle's Theorem	248
Lagrange's Mean Value Theorem	255
Cauchy's Mean Value Theorem	261
Taylor's Theorem	264
Maclaurin's Theorem	266
Taylor's Infinite Series	273
Absolute Maximum and Absolute Minimum	277
Indeterminate Forms	284
L' Hospital's Rule	285
<b>CHAPTER 7: Functions of Bounded Variation</b>	<b>310 – 324</b>
Variation of a Function	310
Total Variation Function	318
Jordan Decomposition Theorem	319
Positive and Negative Variation	321

<b>CHAPTER 8: Reimann Integral</b>	<b>325 – 372</b>
Norm or Mesh of a Partition	326
Darboux's Theorem	338
Integration and Differentiation	355
Fundamental Theorem of Calculus	356
First Mean Value Theorem of Integral Calculus	358
Abel's Inequality	361
Bonnet's Mean Value Theorem	361
Second Mean Value Theorem	363
Integral as a Limit of Sums	364
<b>CHAPTER 9: The Riemann Stieltjes Integral</b>	<b>373 – 399</b>
Riemann Stieltjes Integral as Limit of Sums	388
Change of Variable	393
Mean Value Theorems for RS-integrals	394
Integration of Vector Valued Functions	395
Rectifiable Curves	396
<b>CHAPTER 10: Convergence of Improper Integrals</b>	<b>400 – 445</b>
Comparison Test	409
$\mu$ -test for Convergence	413
Cauchy's Test for Convergence	415
Dirichlet's Test	416
Abel's Test	416
Absolute and Conditional Convergence	419
<b>CHAPTER 11: Uniform Convergence of Sequence and Series of Functions</b>	<b>446 – 501</b>
Pointwise and Uniform Convergence	446
Cauchy's Criterion for Uniform Convergence	457
$M_n$ -Test for Uniform Convergence	458
Weierstrass M-test	466
Abel's Test	471
Dirichlet's Test	471
Uniform Convergence and Continuity	475
Uniform Convergence and RS-integration	480
Uniform Convergence and Differentiation	489
Everywhere Continuous but Nowhere Differentiable Function	495
Weierstrass Approximation Theorem	497
<b>CHAPTER 12: Power Series</b>	<b>502 – 526</b>
Radius of Convergence	502
Cauchy-Hadamard Theorem	504
Ratio Test	505

Abel's Theorem	518
Abel's Limit Theorem	519
Tauber's Theorem	524
<b>CHAPTER 13: Functions of Two Variables</b>	<b>527 – 562</b>
Neighbourhood of a Point	527
Simultaneous Limit or Double Limit	529
Repeated Limits	538
Continuity of a Function of two Variables	541
Partial Derivatives	545
Differentiability of Function of two Variables	547
Young's Theorem	557
Schwarz's Theorem	559
<b>CHAPTER 14: Functions of Two Variables 2: Taylor's Theorem and Maxima-Minima</b>	<b>563 – 595</b>
Taylor's Theorem for Function of two Variables	563
Maclaurian's Theorem	565
Maxima and Minima of Function of two Variables	571
Maxima and Minima Subject to Constraints	579
Lagrange's Method of Undetermined Multipliers	580
Lagrange's Multipliers Method for the Function of three Variables	581
<b>CHAPTER 15: Functions of Several Variables</b>	<b>596 – 648</b>
Euclidean Spaces	596
Cauchy-Schwarz Inequality	597
Linear Transformation	598
Limit and Continuity of a Function	601
Derivative of a Vector Valued Function	603
Chain Rule	606
Directional Derivative	608
Gradient of a Function	609
Jacobian Matrix	610
Mean Value Theorem for Vector Valued Functions	629
Taylor's Theorem	631
Inverse Function Theorem	634
Implicit Function Theorem	638
Maxima and Minima	644
<b>CHAPTER 16: Jacobians</b>	<b>649 – 672</b>
Jacobian of Implicit Functions	657
Necessary and Sufficient Condition for a Jacobian to Vanish	662
<i>Bibliography</i>	673
<i>Index</i>	675
