<i>Preface to the Fourth Edition</i>	v
<i>Preface to the First Edition</i>	vii
1. Importance of Animal Agriculture for Human Health and Well-being	1
Animal Nutrition and the Consumers of Animal Products	1
There is a Close Link between Animal and Human Nutrition	2
Contribution of Animal Products to Human Requirements	2
Major Nutritional Advantages in Meeting Human's Requirements Partly from Animal Products	4
Objections to the Use of Animal Products	4
Direct Nutritional Objections to Animal-derived Products	5
Cholesterol (LDLc) and n-3 Fatty Acids	7
Recommended Ratio among SFA, MUFA and PUFA for Good Health	7
Need to Produce Low-fat Meat and Milk and their Products	8
Modifying the Fatty Acid Composition of Meat and Milk Fats	8
Red Meats are Prone to Cause Cancer	9
Conjugated Linoleic Acid is a Beneficial Fatty Acid	9
Protein Nutrition and Metabolism has been an Active Research Area in Animal Nutrition	9
Is Meat Eating Really Necessary?	10
Brain is the Ever-growing Organ of Thought	10
Contribution of Nanotechnology to Greater Efficiency in Animal Nutrition and Production	11
Conclusions on Nanotechnology Contributions	16
2. Digestion and Absorption of Nutrients in Monogastric Animals	18
Digestive Systems in Animals	18
Monogastric Digestive Tract	20
3. Feed Intake Regulation and Prediction in Monogastric Animals	31
Intake Regulation in Monogastric Animals	31
Effect of Reducing the ME on Performance of Chicken Selected for High Growth Rates	36
Nutritional Deficiencies	37
Nutritional 'Wisdom' in Monogastric Animals	37
4. Poultry Nutrition	40
Improvement in Growth Rate and Feed Efficiency are Vital	40
Digestive Systems in the Birds	41
Digestion of Food in the Birds	45
Energy Utilisation by a Laying Hen	59
Calculation of Energy and Protein Requirements of Chicken	72
Broilers	75
Feeding of Ducks	117
Nutrition and Digestive Physiology of the Broiler Chick—Nutrition of the Newly Hatched Broiler Chick	137
Reduced-crude Protein (CP) Diets for Broiler Chickens—Effect of Inclusion of L-carnitine and Whey Powder	146
Nutrient Transporters—Glucose, Protein and Amino Acid Transporters	151
Necrotic Enteritis—Nutrition Connection; Reduced-protein Diets for Broiler Chickens	152

Impacts of Polyphenols on the Productivity of Poultry	159
Phytogenics as Natural Gut Health Management Tools for Sustainable Poultry Production	171
Effects of Heat Stress on Poultry Production Performances—Nutritional Strategies to Combat Heat Stress	173
Nutritional Interventions to Improve the Nutritional Value of Hen Eggs	181
5. Swine Nutrition	188
Nutrient Requirements (NRC 2012) of Growing–Finishing Pigs	194
Feeding of Pigs	201
Feeding of Piglets	202
Nutrient Requirements of Crossbred, Exotic and Indigenous Pigs	216
Supplementation of Enzymes	219
Impact of Phytase Superdosing on the Performance of Pigs	220
Feed Additives for Better Intestinal Health	223
Oxidative Stress—Effect of Feeding Antioxidant Supplements to Improve Meat Quality	226
Total Fibre Level: Feeding Strategies to Reduce Greenhouse Gas Emission from Pigs	228
Microbiomes in the Intestine of Developing Pigs: Implications for Nutrition and Health	229
Aquaporins—Primary Water Transporters Across the Plasma Membrane	230
Porcine Intestinal Mucosal Products and Peptones and their Value in Feeding of Animals	233
6. Horse Nutrition	241
Digestive System-Digestion and Absorption	244
Nutrient Requirements of Horses	252
Formulation of Diets for Horse	264
Feedstuffs	272
Feeding of Horse	274
Donkeys	296
Nutrition of Donkeys	299
7. Rabbit Nutrition	306
Characters of the Digestive Physiology of the Rabbit Digestion and Metabolism—Peculiarities	307
Level of Fibre in Diets for Rabbits	313
Nutrient Requirements and Feeding of Rabbits	316
8. Laboratory Animal Nutrition	334
Researching Animal Research	334
Rat	342
Other Laboratory Animals	347
Functional Foods	349
9. Antibiotic Growth Promoters in Animal Production—Potential Replacement for AGP—Feed Additives to Improve Gut Health	351
Antibiotic Growth Promoters in Animal Production	351
Potential Replacement for Antibiotic Growth Promoters (AGPs)	354
Probiotics and Gut Health in Poultry—Linking Gut Homeostasis and Productivity	357
Potential Role of Prebiotics and Probiotics in Manipulating Gut Microbiota to Enhance Gut Health and Food Safety in Poultry	364
Postbiotics and Probiotics as Substitutes of Antibiotics in Animals	368
Potential of Anthocyanins as Antibiotic Substitutes	370

10. Body Composition of Animals	374
Significance of Body Composition of Live Animals	374
Nutritional Control of Growth	381
11. Foodstuffs, Nutrients and their Functions: Production of Healthy Animal Products	385
Proteins	385
Lipids	390
Nutritional Potentiality of Important Foodstuffs	395
Food Additives Sweeteners	400
Designer Products and Nutraceuticals	401
Nutritional Interventions to Enhance CLA Content in Milk and Meat	403
Production of Healthy Food—Importance of Use of Next-generation Probiotics	407
12. Unconventional and Less Popular Feeds in Monogastric Animal Feeding	412
Alternative Feeds for Pigs	412
Alternative Protein and Energy Sources for Poultry	416
Insect Meal and Silkworm Pupae Meal as Source of Dietary Protein in Poultry Feed	425
Improving Nutritive Value and Reducing the Anti-nutritional Factors by Crop Breeding	426
Use of Hemp Plant in Diet of Non-ruminant Animals	426
Challenges Associated with Feeding Hemp to Animals	427
Appendices	429
<i>Appendix I</i>	429
Table 1: Metabolic size for live body weight ($W_{kg}^{0.75}$)	429
Table 2: Conversion factors	430
Table 3: Prefix names of multiples and submultiples of units	431
Table 4: Energy and protein content of common foodstuffs (per 100 g of edible portion)	431
Table 5: Chemical composition of common foodstuffs (all values are per 100 g of edible portion)	433
Table 6: Vitamins and minerals along with their sources	434
<i>Appendix II: Nutrient requirements for backyard chicken and balanced feed formulae for backyard chicken and other poultry</i>	435
Table 7: Ration for vanaraja (egg and meta type breeders)	435
Table 8: Ration for gramapriya breeders	435
Table 9: Nutrient requirements (%) for backyard chicken	436
Table 10: Maize-SBM-DORB-based feed formulae (kg/ton) for backyard chicken	436
Table 11: Maize-SBM-DORB-based feed formulae (kg/ton) with enzymes for backyard chicken	437
Table 12: Rations for ducks	437
Table 13: Rations for Japanese quails	438
Table 14: Rations for turkeys	438
Table 15a: Rations for guinea keets (hot season in tropics)	439
Table 15b: Rations for guinea keets (cold season in tropics)	439
Table 16: Rations for guinea fowl	439
Table 17: Rations for emus	440
Index	441
