## **Contents**

Preface to the Fifth Edition		
List c	of Symbols and Abbreviations	xvi
СНА	PTER 1: Mathematical Model of Control System	1.1-1.114
1 1	Control System	1.1
	Examples of Control Systems	1.2
	Mathematical Models of Control Systems	1.5
	Mechanical Translational Systems	1.6
	Mechanical Rotational Systems	1.14
	Electrical Systems	1.20
	Transfer Function of Armature Controlled DC Motor	1.21
	Transfer Function of Field Controlled DC Motor	1.24
	Electrical Analogous of Mechanical Translational Systems	1.25
	Electrical Analogous of Mechanical Rotational Systems	1.40
	Block Diagrams	1.49
	Signal Flow Graph	1.70
	Thermal System	1.89
	Hydraulic System	1.92
1.15	Pneumatic System	1.97
1.16	Short-Answer Questions	1.100
1.17	Exercises	1.107
CHAPTER 2: Components of Control System 2		
2 1	Components of Automatic Control System	2.1
	Potentiometers	2.2
	Synchros	2.5
	Controllers	2.10
	Servomotors	2.22
	DC Servomotors	2.23
	AC Servemeters	2.25

xii	Control Systems
-----	-----------------

2.8 Stepper Motors       2.30         2.9 Tachogenerator       2.36         2.10 Modulator and Demodulator       2.38         2.11 Gear Trains       2.41         2.12 Gyroscope       2.45         2.13 Solved Problems       2.45         2.14 Short-Answer Questions       2.54         2.15 Exercises       2.60         CHAPTER 3: Time Response Analysis       3.1-3.62         CHAPTER 3: Time Response Analysis       3.1-3.62         3.1 Time Respone       3.1         3.2 Test Signal       3.1         3.3 Order of a System       3.4         3.4 Review of Partial Fraction Expansion       3.4         3.5 Response of First Order System for Unit Step Input       3.7         3.6 Second Order System       3.9         3.7 Time Domain Specifications       3.16         3.8 Response With P, PI, PD and PID Controllers       3.21         3.9 Type Number of Control System       3.36         3.10 Steady State Error       3.36         3.11 Static Error Constant       3.37         3.12 Steady State Error when the Input is Unit Step Signal       3.37         3.13 Steady State Error when the Input is Unit Ramp Signal       3.38         3.14 Steady State Error when the Input is Unit Parabolic
2.10 Modulator and Demodulator       2.38         2.11 Gear Trains       2.41         2.12 Gyroscope       2.45         2.13 Solved Problems       2.47         2.14 Short-Answer Questions       2.54         2.15 Exercises       2.60         CHAPTER 3: Time Response Analysis       3.1-3.62         3.1 Time Respone       3.1         3.2 Test Signal       3.1         3.3 Order of a System       3.3         3.4 Review of Partial Fraction Expansion       3.4         3.5 Response of First Order System for Unit Step Input       3.7         3.6 Second Order System       3.9         3.7 Time Domain Specifications       3.16         3.8 Response With P, PI, PD and PID Controllers       3.21         3.9 Type Number of Control System       3.36         3.10 Steady State Error       3.36         3.11 Static Error Constant       3.37         3.12 Steady State Error when the Input is Unit Step Signal       3.37         3.13 Steady State Error when the Input is Unit Parabolic Signal       3.38         3.14 Steady State Error when the Input is Unit Parabolic Signal       3.39         3.15 Generalized Error Coefficients       3.40         3.16 Evaluation of Generalized Error Coefficients       3.43
2.11 Gear Trains       2.41         2.12 Gyroscope       2.45         2.13 Solved Problems       2.47         2.14 Short-Answer Questions       2.54         2.15 Exercises       2.60         CHAPTER 3: Time Response Analysis       3.1-3.62         3.1 Time Respone       3.1         3.2 Test Signal       3.1         3.3 Order of a System       3.3         3.4 Review of Partial Fraction Expansion       3.4         3.5 Response of First Order System for Unit Step Input       3.7         3.6 Second Order System       3.9         3.7 Time Domain Specifications       3.16         3.8 Response With P, PI, PD and PID Controllers       3.21         3.9 Type Number of Control System       3.36         3.10 Steady State Error       3.36         3.11 Static Error Constant       3.37         3.12 Steady State Error when the Input is Unit Step Signal       3.37         3.13 Steady State Error when the Input is Unit Ramp Signal       3.38         3.14 Steady State Error when the Input is Unit Parabolic Signal       3.39         3.15 Generalized Error Coefficients       3.40         3.16 Evaluation of Generalized Error Coefficients       3.42         3.17 Correlation between Static and Dynamic Error Coefficients       3.
2.12 Gyroscope       2.45         2.13 Solved Problems       2.47         2.14 Short-Answer Questions       2.54         2.15 Exercises       2.60         CHAPTER 3: Time Response Analysis       3.1-3.62         3.1 Time Respone       3.1         3.2 Test Signal       3.1         3.3 Order of a System       3.3         3.4 Review of Partial Fraction Expansion       3.4         3.5 Response of First Order System for Unit Step Input       3.7         3.6 Second Order System       3.9         3.7 Time Domain Specifications       3.16         3.8 Response With P, PI, PD and PID Controllers       3.21         3.9 Type Number of Control System       3.36         3.10 Steady State Error       3.36         3.11 Static Error Constant       3.37         3.12 Steady State Error when the Input is Unit Step Signal       3.37         3.13 Steady State Error when the Input is Unit Ramp Signal       3.38         3.14 Steady State Error when the Input is Unit Parabolic Signal       3.39         3.15 Generalized Error Coefficients       3.40         3.16 Evaluation of Generalized Error Coefficients       3.42         3.17 Correlation between Static and Dynamic Error Coefficients       3.43         3.19 Short-answer Questions
2.13 Solved Problems       2.47         2.14 Short-Answer Questions       2.54         2.15 Exercises       2.60         CHAPTER 3: Time Response Analysis       3.1-3.62         3.1 Time Respone       3.1         3.2 Test Signal       3.1         3.3 Order of a System       3.3         3.4 Review of Partial Fraction Expansion       3.4         3.5 Response of First Order System for Unit Step Input       3.7         3.6 Second Order System       3.9         3.7 Time Domain Specifications       3.16         3.8 Response With P, PI, PD and PID Controllers       3.21         3.9 Type Number of Control System       3.36         3.10 Steady State Error       3.36         3.11 Static Error Constant       3.37         3.12 Steady State Error when the Input is Unit Step Signal       3.37         3.13 Steady State Error when the Input is Unit Ramp Signal       3.38         3.14 Steady State Error when the Input is Unit Parabolic Signal       3.39         3.15 Generalized Error Coefficients       3.40         3.16 Evaluation of Generalized Error Coefficients       3.42         3.17 Correlation between Static and Dynamic Error Coefficients       3.43         3.18 Alternate Method for Generalized Error Coefficients       3.43
2.14 Short-Answer Questions       2.54         2.15 Exercises       2.60         CHAPTER 3: Time Response Analysis         3.1 Time Respone       3.1         3.2 Test Signal       3.1         3.3 Order of a System       3.3         3.4 Review of Partial Fraction Expansion       3.4         3.5 Response of First Order System for Unit Step Input       3.7         3.6 Second Order System       3.9         3.7 Time Domain Specifications       3.16         3.8 Response With P, PI, PD and PID Controllers       3.21         3.9 Type Number of Control System       3.36         3.10 Steady State Error       3.36         3.11 Static Error Constant       3.37         3.12 Steady State Error when the Input is Unit Step Signal       3.37         3.13 Steady State Error when the Input is Unit Ramp Signal       3.38         3.14 Steady State Error when the Input is Unit Parabolic Signal       3.39         3.15 Generalized Error Coefficients       3.40         3.16 Evaluation of Generalized Error Coefficients       3.42         3.17 Correlation between Static and Dynamic Error Coefficients       3.43         3.18 Alternate Method for Generalized Error Coefficients       3.43         3.19 Short-answer Questions       3.53         3.20 Exer
2.15 Exercises       2.60         CHAPTER 3: Time Response Analysis       3.1-3.62         3.1 Time Respone       3.1         3.2 Test Signal       3.1         3.3 Order of a System       3.3         3.4 Review of Partial Fraction Expansion       3.4         3.5 Response of First Order System for Unit Step Input       3.7         3.6 Second Order System       3.9         3.7 Time Domain Specifications       3.16         3.8 Response With P, PI, PD and PID Controllers       3.21         3.9 Type Number of Control System       3.36         3.10 Steady State Error       3.36         3.11 Static Error Constant       3.37         3.12 Steady State Error when the Input is Unit Step Signal       3.37         3.13 Steady State Error when the Input is Unit Ramp Signal       3.38         3.14 Steady State Error when the Input is Unit Parabolic Signal       3.39         3.15 Generalized Error Coefficients       3.40         3.16 Evaluation of Generalized Error Coefficients       3.42         3.17 Correlation between Static and Dynamic Error Coefficients       3.43         3.18 Alternate Method for Generalized Error Coefficients       3.43         3.19 Short-answer Questions       3.53         3.20 Exercises       3.59
CHAPTER 3: Time Response Analysis       3.1-3.62         3.1       Time Respone       3.1         3.2       Test Signal       3.1         3.3       Order of a System       3.3         3.4       Review of Partial Fraction Expansion       3.4         3.5       Response of First Order System for Unit Step Input       3.7         3.6       Second Order System       3.9         3.7       Time Domain Specifications       3.16         3.8       Response With P, PI, PD and PID Controllers       3.21         3.9       Type Number of Control System       3.36         3.10       Steady State Error       3.36         3.11       Static Error Constant       3.37         3.12       Steady State Error when the Input is Unit Step Signal       3.37         3.13       Steady State Error when the Input is Unit Ramp Signal       3.38         3.14       Steady State Error when the Input is Unit Parabolic Signal       3.39         3.15       Generalized Error Coefficients       3.40         3.16       Evaluation of Generalized Error Coefficients       3.42         3.17       Correlation between Static and Dynamic Error Coefficients       3.43         3.18       Alternate Method for Generalized Error Coe
3.1 Time Respone       3.1         3.2 Test Signal       3.1         3.3 Order of a System       3.3         3.4 Review of Partial Fraction Expansion       3.4         3.5 Response of First Order System for Unit Step Input       3.7         3.6 Second Order System       3.9         3.7 Time Domain Specifications       3.16         3.8 Response With P, PI, PD and PID Controllers       3.21         3.9 Type Number of Control System       3.36         3.10 Steady State Error       3.36         3.11 Static Error Constant       3.37         3.12 Steady State Error when the Input is Unit Step Signal       3.37         3.13 Steady State Error when the Input is Unit Ramp Signal       3.38         3.14 Steady State Error when the Input is Unit Parabolic Signal       3.39         3.15 Generalized Error Coefficients       3.40         3.16 Evaluation of Generalized Error Coefficients       3.42         3.17 Correlation between Static and Dynamic Error Coefficients       3.43         3.18 Alternate Method for Generalized Error Coefficients       3.43         3.20 Exercises       3.59
3.1 Time Respone       3.1         3.2 Test Signal       3.1         3.3 Order of a System       3.3         3.4 Review of Partial Fraction Expansion       3.4         3.5 Response of First Order System for Unit Step Input       3.7         3.6 Second Order System       3.9         3.7 Time Domain Specifications       3.16         3.8 Response With P, PI, PD and PID Controllers       3.21         3.9 Type Number of Control System       3.36         3.10 Steady State Error       3.36         3.11 Static Error Constant       3.37         3.12 Steady State Error when the Input is Unit Step Signal       3.37         3.13 Steady State Error when the Input is Unit Ramp Signal       3.38         3.14 Steady State Error when the Input is Unit Parabolic Signal       3.39         3.15 Generalized Error Coefficients       3.40         3.16 Evaluation of Generalized Error Coefficients       3.42         3.17 Correlation between Static and Dynamic Error Coefficients       3.43         3.18 Alternate Method for Generalized Error Coefficients       3.43         3.20 Exercises       3.59
3.2 Test Signal       3.1         3.3 Order of a System       3.3         3.4 Review of Partial Fraction Expansion       3.4         3.5 Response of First Order System for Unit Step Input       3.7         3.6 Second Order System       3.9         3.7 Time Domain Specifications       3.16         3.8 Response With P, PI, PD and PID Controllers       3.21         3.9 Type Number of Control System       3.36         3.10 Steady State Error       3.36         3.11 Static Error Constant       3.37         3.12 Steady State Error when the Input is Unit Step Signal       3.37         3.13 Steady State Error when the Input is Unit Ramp Signal       3.38         3.14 Steady State Error when the Input is Unit Parabolic Signal       3.39         3.15 Generalized Error Coefficients       3.40         3.16 Evaluation of Generalized Error Coefficients       3.42         3.17 Correlation between Static and Dynamic Error Coefficients       3.43         3.18 Alternate Method for Generalized Error Coefficients       3.43         3.19 Short-answer Questions       3.53         3.20 Exercises       3.59
3.2 Test Signal       3.1         3.3 Order of a System       3.3         3.4 Review of Partial Fraction Expansion       3.4         3.5 Response of First Order System for Unit Step Input       3.7         3.6 Second Order System       3.9         3.7 Time Domain Specifications       3.16         3.8 Response With P, PI, PD and PID Controllers       3.21         3.9 Type Number of Control System       3.36         3.10 Steady State Error       3.36         3.11 Static Error Constant       3.37         3.12 Steady State Error when the Input is Unit Step Signal       3.37         3.13 Steady State Error when the Input is Unit Ramp Signal       3.38         3.14 Steady State Error when the Input is Unit Parabolic Signal       3.39         3.15 Generalized Error Coefficients       3.40         3.16 Evaluation of Generalized Error Coefficients       3.42         3.17 Correlation between Static and Dynamic Error Coefficients       3.43         3.18 Alternate Method for Generalized Error Coefficients       3.43         3.19 Short-answer Questions       3.53         3.20 Exercises       3.59
3.3 Order of a System 3.4 Review of Partial Fraction Expansion 3.5 Response of First Order System for Unit Step Input 3.7 Response of First Order System for Unit Step Input 3.7 Time Domain Specifications 3.8 Response With P, PI, PD and PID Controllers 3.9 Type Number of Control System 3.36 Steady State Error 3.36 Steady State Error 3.36 Steady State Error Unit Step Signal 3.11 Static Error Constant 3.37 Steady State Error when the Input is Unit Step Signal 3.13 Steady State Error when the Input is Unit Ramp Signal 3.14 Steady State Error when the Input is Unit Parabolic Signal 3.15 Generalized Error Coefficients 3.40 Step State Error Coefficients 3.41 Correlation between Static and Dynamic Error Coefficients 3.42 Step Short-answer Questions 3.53 Step Short-answer Questions 3.59
3.4 Review of Partial Fraction Expansion 3.5 Response of First Order System for Unit Step Input 3.7 3.6 Second Order System 3.9 3.7 Time Domain Specifications 3.16 3.8 Response With P, PI, PD and PID Controllers 3.21 3.9 Type Number of Control System 3.36 3.10 Steady State Error 3.36 3.11 Static Error Constant 3.37 3.12 Steady State Error when the Input is Unit Step Signal 3.13 Steady State Error when the Input is Unit Ramp Signal 3.14 Steady State Error when the Input is Unit Parabolic Signal 3.15 Generalized Error Coefficients 3.40 3.16 Evaluation of Generalized Error Coefficients 3.41 3.17 Correlation between Static and Dynamic Error Coefficients 3.43 3.18 Alternate Method for Generalized Error Coefficients 3.43 3.19 Short-answer Questions 3.59
3.5 Response of First Order System for Unit Step Input 3.6 Second Order System 3.9 3.7 Time Domain Specifications 3.16 3.8 Response With P, PI, PD and PID Controllers 3.21 3.9 Type Number of Control System 3.36 3.10 Steady State Error 3.36 3.11 Static Error Constant 3.37 3.12 Steady State Error when the Input is Unit Step Signal 3.13 Steady State Error when the Input is Unit Ramp Signal 3.14 Steady State Error when the Input is Unit Parabolic Signal 3.15 Generalized Error Coefficients 3.40 3.16 Evaluation of Generalized Error Coefficients 3.41 3.18 Alternate Method for Generalized Error Coefficients 3.43 3.19 Short-answer Questions 3.59
3.7 Time Domain Specifications3.163.8 Response With P, PI, PD and PID Controllers3.213.9 Type Number of Control System3.363.10 Steady State Error3.363.11 Static Error Constant3.373.12 Steady State Error when the Input is Unit Step Signal3.373.13 Steady State Error when the Input is Unit Ramp Signal3.383.14 Steady State Error when the Input is Unit Parabolic Signal3.393.15 Generalized Error Coefficients3.403.16 Evaluation of Generalized Error Coefficients3.423.17 Correlation between Static and Dynamic Error Coefficients3.433.18 Alternate Method for Generalized Error Coefficients3.433.19 Short-answer Questions3.533.20 Exercises3.59
3.8 Response With P, PI, PD and PID Controllers 3.9 Type Number of Control System 3.36 3.10 Steady State Error 3.36 3.11 Static Error Constant 3.37 3.12 Steady State Error when the Input is Unit Step Signal 3.37 3.13 Steady State Error when the Input is Unit Ramp Signal 3.14 Steady State Error when the Input is Unit Parabolic Signal 3.15 Generalized Error Coefficients 3.40 3.16 Evaluation of Generalized Error Coefficients 3.41 Correlation between Static and Dynamic Error Coefficients 3.42 3.17 Correlation between Static and Dynamic Error Coefficients 3.43 3.18 Alternate Method for Generalized Error Coefficients 3.43 3.19 Short-answer Questions 3.59
3.9 Type Number of Control System 3.36 3.10 Steady State Error 3.36 3.11 Static Error Constant 3.37 3.12 Steady State Error when the Input is Unit Step Signal 3.13 Steady State Error when the Input is Unit Ramp Signal 3.14 Steady State Error when the Input is Unit Parabolic Signal 3.15 Generalized Error Coefficients 3.40 3.16 Evaluation of Generalized Error Coefficients 3.17 Correlation between Static and Dynamic Error Coefficients 3.18 Alternate Method for Generalized Error Coefficients 3.19 Short-answer Questions 3.53 3.20 Exercises
3.10 Steady State Error 3.36 3.11 Static Error Constant 3.37 3.12 Steady State Error when the Input is Unit Step Signal 3.37 3.13 Steady State Error when the Input is Unit Ramp Signal 3.38 3.14 Steady State Error when the Input is Unit Parabolic Signal 3.39 3.15 Generalized Error Coefficients 3.40 3.16 Evaluation of Generalized Error Coefficients 3.42 3.17 Correlation between Static and Dynamic Error Coefficients 3.43 3.18 Alternate Method for Generalized Error Coefficients 3.43 3.19 Short-answer Questions 3.53 3.20 Exercises 3.59
3.11 Static Error Constant 3.37 3.12 Steady State Error when the Input is Unit Step Signal 3.37 3.13 Steady State Error when the Input is Unit Ramp Signal 3.14 Steady State Error when the Input is Unit Parabolic Signal 3.15 Generalized Error Coefficients 3.40 3.16 Evaluation of Generalized Error Coefficients 3.17 Correlation between Static and Dynamic Error Coefficients 3.18 Alternate Method for Generalized Error Coefficients 3.19 Short-answer Questions 3.53 3.20 Exercises 3.57

3.14 Steady State Error when the Input is Unit Parabolic Signal 3.15 Generalized Error Coefficients 3.40 3.16 Evaluation of Generalized Error Coefficients 3.42 3.17 Correlation between Static and Dynamic Error Coefficients 3.43 3.18 Alternate Method for Generalized Error Coefficients 3.43 3.19 Short-answer Questions 3.53 3.20 Exercises
3.15 Generalized Error Coefficients3.403.16 Evaluation of Generalized Error Coefficients3.423.17 Correlation between Static and Dynamic Error Coefficients3.433.18 Alternate Method for Generalized Error Coefficients3.433.19 Short-answer Questions3.533.20 Exercises3.59
3.16 Evaluation of Generalized Error Coefficients3.423.17 Correlation between Static and Dynamic Error Coefficients3.433.18 Alternate Method for Generalized Error Coefficients3.433.19 Short-answer Questions3.533.20 Exercises3.59
3.17 Correlation between Static and Dynamic Error Coefficients3.433.18 Alternate Method for Generalized Error Coefficients3.433.19 Short-answer Questions3.533.20 Exercises3.59
3.18 Alternate Method for Generalized Error Coefficients 3.43 3.19 Short-answer Questions 3.53 3.20 Exercises 3.59
3.19 Short-answer Questions 3.53 3.20 Exercises 3.59
3.20 Exercises 3.59
CHAPTER 4: Frequency Pesnonse Analysis 4 1–4 88
CHAPTER 4: Frequency Response Analysis 4 1–4 88
The least the decire is the second of the se
4.1 Sinusoidal Transfer Function and Frequency Response 4.1
4.2 Frequency Domain Specifications 4.2
4.3 Frequency Domain Specifications of Second Order System 4.4
4.4 Correlation between Time and Frequency Response 4.7
4.5 Frequency Response Plots 4.9

Contents		
4.6	Bode Plot	4.9
4.7	Polar Plots	4.37
4.8	Nichols Plot	4.61
4.9	Closed Loop Response From Open Loop Response	4.65
4.10	M and N Circles	4.65
4.11	Nichols Chart	4.70
4.12	Short-Answer Questions	4.83
4.13	Exercises	4.88
CHA	APTER 5: Concepts of Stability and Root Locus	5.1-5.100
- 1		
	Impulse Response and Stability	5.1
	Location of Poles on s-Plane for Stability	5.3
	Routh Hurwitz Criterion	5.8 5.26
	Mathematical Preliminaries for Nyquist Stability Criterion	5.29
	Nyquist Stability Criterion Relative Stability	5.54
	Gain Margin and Phase Margin	5.55
	Root Locus	5.60
	Short-Answer Questions	5.95
	Exercises	5.99
CHA	APTER 6: Linear System Design	6.1-6.102
6.1	Introduction to Design using Compensators	6.1
6.2	Lag Compensator	6.4
6.3	Lead Compensator	6.26
6.4	Lag-Lead Compensator	6.49
6.5	PI, PD and PID Controllers	6.64
6.6	Feedback Compensation	6.82
6.7	Short-Answer Questions	6.95
6.8	Exercises	6.101
CHA	APTER 7: State Space Analysis	7.1–7.86
7.1	Introduction	7.1
7.2	State Space Formulation	7.1
7.3	State Model of Linear and Time Invariant Systems	7.2
7.4	State Diagram	7.4

xiv	Control Systems
-----	-----------------

7.5 State Space Representation using Physical Variables	7.6	
7.6 State Space Representation using Phase Variables	7.20	
7.7 State Space Representation using Canonical Variables	7.31	
7.8 Solution of State Equations	7.37	
7.9 Transformation of State Model	7.48	
7.10 Concepts of Controllability and Observability	7.57	
7.11 Effect of State Feedback	7.66	
7.11.1 Control System Design via Pole Placement by State Feedback	7.66	
7.11.2 State Observers	7.67	
7.12 Short-Answer Questions	7.70	
7.13 Exercises	7.80	
APPENDICES	A.1-A.6	
Annondivity I anless Transform Dairs and Dranarties	A.1	
Appendix I: Laplace Transform Pairs and Properties		
Appendix II: Roots of Algebric Equation by Lin's Method		
Appendix III: Matrix Fundamentals	A.4
