Contributors and Reviewers	xi
Syllabus	xvii

SECTION I BIOMECHANICAL PRINCIPLES

Chapter 1 Basics of Biomechanics3–7

Megha Sandeep Sheth

- Introduction 4
- Basic Concepts 4
- Human Movement System 5
- Biomechanical Analysis 5
- Applications of Biomechanics 6

Chapter 2 Axes and Planes 8–16

Kinjal Bagthariya

- Introduction 9
- Anatomical Position 9
- Axes 9
- Planes 9
- Relationship between Axes and Planes 10
- Movements in Relation to Axes and Planes 11
- Clinical Significance 13

Chapter 3 Motion.....17–30

Himanshi Ruparelia, Ashish Kakkad

- Introduction 18
- Kinematics 18
- Kinetics 22
- Force Systems 23
- Translatory and Rotatory Forces 24

Chapter 4 Force31–42*Himanshu Mathur, Archita Agarwal*

- Introduction 32
- Core Concepts 32
- Forces and Moments 33
- Statics 36
- Levers 37
- Kinematics 39
- Kinetics 40

Chapter 5 Gravity43–51*Alpa Purohit*

- Introduction 44
- Core Concepts related to Gravity 44
- Base of Support 45
- Factors Affecting Stability 46
- Gravity in Relation to the Human Body 47

Chapter 6 Equilibrium52–66*P Ratan Khuman, Lourembam Surbala Devi*

- Introduction 53
- Core Concepts in Equilibrium 53
- Types of Equilibrium 53
- Factors Affecting Equilibrium 54
- Role of Nervous System in Maintaining Equilibrium 58
- Assessment Methods 59
- Interventions to Improve Equilibrium 60
- Role in Sports 60

Chapter 7 Work67–73*Nithin Ravindran Nair, Sandesh Bhaguram Sakpal, Anisha Gulati*

- Introduction 68
- Types of Work 68
- Fundamental Concepts 68
- Factors Affecting Work 69
- Physical and Physiological Aspects of Work 71

Chapter 8 Levers74–81*Amit M Patel, Suman Malukani*

- Introduction 75
- Classification 75
- Mechanical Advantage 77
- Levers in Human Body 78
- Muscles as Levers 79

SECTION II STRUCTURE AND FUNCTION**Chapter 9 Joints85–105***Edrish Contractor, Durva Ketan Mankad*

- Introduction 86
- Human Joints 86
- Materials or Components of Human Joints 87
- Artificial Materials as Human Joints 89
- General Properties of Connective Tissue 90
- Classification of Joints 94
- Design of Human Joints 95
- Functions of Joints 99
- Joint Motion 99
- Joint Pathomechanics 101
- Effects of Disease, Immobilization and Injury on Joints 103

Chapter 10 Muscles106–134*Nehal Shah, Mohit Bipin Shah*

- Introduction 107
- Structural Hierarchy and Architecture 107
- Classification of Muscle Fibers 111
- Terminologies for Muscle Attachments 116
- Properties of Muscle 116
- Muscle Contraction 120
- Muscle Work 121
- Length-Tension Relationship 123
- Force-Velocity Relationship 124
- Simple Machines in Anatomy 125
- Group Action of Muscles 126
- Two-Joint Muscle Dynamics 128
- Dynamic Control Patterns 129
- Effect of Immobilization, Injury and Aging 129

SECTION III AXIAL SKELETON

Chapter 11 Temporomandibular Joint.....137–149

Yagna Unmesh Shukla, Amit M Patel

- Introduction 138
- Anatomical Components 138
- Kinematics 138
- Kinematics of Opening and Closing of the Mouth 141
- Kinetics 142
- Functional Biomechanics 144
- Pathoanatomy 145

Chapter 12 Spine150–227

Sona Kolke, Venu Mohan

- Introduction 151
- Structure and Function 151
- Functional Units of the Spine 153
- Articulations of the Vertebral Column 157
- Ligaments of the Spine 158
- Kinematics of the Spine 160
- Cervical Spine 164
- Thoracic Spine 182
- Lumbar Spine 193
- Sacroiliac Joints 213
- Pubic Symphysis and Pelvic Floor 220
- Effects of Age 222

Chapter 13 Thorax.....228–242

Mariya Jiandani, Shravani Kale

- Introduction 229
- Bones of the Thorax 229
- Articulations of the Thoracic Cage 229
- Biomechanical Laws Governing Ventilation 231
- Kinetics and Kinematics of Ventilation 232
- Muscles of Ventilation 232
- Neural Control of Ventilation 235
- Pathomechanics of Ventilation 236
- Functional and Clinical Implications 239

SECTION IV UPPER LIMB

Chapter 14 Shoulder Anatomy.....245–256

Dhaval Talsaniya

- Introduction 246
- Glenohumeral Joint 246
- Acromioclavicular Joint 249
- Sternoclavicular Joint 250
- Muscles 252
- Blood and Nerve Supply 254

Chapter 15 Shoulder Mechanics257–280

Akta Bhalara Talsaniya

- Introduction 258
- Shoulder Complex 258
- Kinematics 258
- Kinetics 265
- Pathomechanics 272
- Shoulder Complex Forces During Upper Limb Weight Bearing 276

Chapter 16 Elbow Anatomy281–289

Chintan Lakhani

- Introduction 282
- Elbow Joint 282
- Radioulnar Joints 284
- Muscles 287

Chapter 17 Elbow Mechanics290–312*Saravanan Murugan*

- Introduction 291
- Elbow Joint 291
- Kinematics 291
- Kinetics 297
- Functional Integration of the Upper Limb: Synergy and Coordination between Shoulder, Elbow, and Wrist Joints 299
- Functional Tasks 301
- Pathomechanics 303
- Biomechanical Considerations in Rehabilitation and Exercise Prescription 305
- Biomechanical Considerations for Orthotics and Assistive Devices 308

Chapter 18 Wrist and Hand Anatomy313–329*Kaushal Zaveri*

- Introduction 314
- Wrist Joint (Radiocarpal Joint) 314
- Intercarpal Joints 314
- Midcarpal Joint 314
- First Carpometacarpal Joint 319
- Second to Fifth Carpometacarpal Joints 321
- Intermetacarpal Joints 322
- Metacarpophalangeal Joints 322
- Interphalangeal Joints 323
- Clinical Anatomy 327

Chapter 19 Wrist and Hand Mechanics330–360*Akta Bhalara Talsaniya*

- Introduction 331
- Wrist Complex 331
- Kinematics 331
- Kinetics 334
- Hand Complex 337
- Functional Position of Wrist and Hand 355
- Pathomechanics of Wrist and Hand 355

SECTION V LOWER LIMB**Chapter 20 Hip Anatomy363–372***Jitendra Patel*

- Introduction 364
- Bones Forming the Joint 364
- Ligaments 364
- Movements 366
- Relations of Hip Joint 366
- Bursae Around Hip Joint 367
- Factors Affecting Stability of Hip Joint 367
- Blood Supply 367
- Muscles 368
- Clinical Anatomy 370

Chapter 21 Hip Mechanics373–396*Twinkle Dabholkar, Juhi Bharnuke*

- Introduction 374
- Kinematics 374
- Synchronization of Movements of the Hip and Pelvis 377
- Kinetics 379
- Hip Joint Loading During Various Body Positions 386
- Pathomechanics 391

Chapter 22 Knee Anatomy397–412*Hiteshkumar M Chauhan*

- Introduction 398
- Bones Forming the Joint 398
- Ligaments of Knee Joint 399
- Bursae Related to the Joint 403
- Relations of Knee Joint 403
- Movements 404
- Muscles 404
- Locking and Unlocking of Knee Joint 406
- Arterial Supply 408
- Nerve Supply 408
- Clinical Anatomy 408

Chapter 23 Knee Mechanics413–434*Priyasingh Rangey*

- Introduction 414
- Tibiofemoral Joint 414
- Kinematics 415
- Kinetics 417
- Patellofemoral Joint 423
- Knee Joint During Activities of Daily Living 427
- Pathomechanics 429

Chapter 24 Ankle and Foot Complex Anatomy435–445*Jignesh Vadgama*

- Introduction 436
- Talocrural Joint 436
- Inferior Tibiofibular Joint 437
- Intertarsal Joints 438
- Tarsometatarsal Joints 441
- Metatarsophalangeal Joint 441
- Interphalangeal Joint 442
- Muscles of the Ankle Complex 442

Chapter 25 Ankle and Foot Mechanics446–477*Salvi Shah*

- Introduction 447
- Kinematics 447
- Kinetics 457
- Pathomechanics 468

SECTION VI FUNCTIONAL MECHANICS**Chapter 26 Posture481–505***Bhavana Gadhavi, Dharmang D Vyas*

- Introduction 482
- Postural Mechanism 482
- Classification 482
- Clinical Importance of Posture 483
- Biomechanical Components of Posture 483
- Postural Control 486
- Postural Alignment in Daily Life 491
- Biomechanical Efficiency of Posture 493
- Kinetics and Kinematics of Posture 494
- Structural Components of Posture 495
- Postural Assessment Techniques 496
- Postural Deviations 496

Chapter 27 Gait506–533*Dinesh Kumar Sorani*

- Introduction 507
- Historical Development of Gait Analysis 507
- Clinical Relevance in Physiotherapy Practice 507
- Biomechanical Overview of Walking 508
- Gait Cycle 508
- Rancho Los Amigos Phase Descriptions 509
- Temporal-Spatial Parameters 514
- Kinematics 516
- Kinetics 520
- Determinants of Gait 522
- Gait Abnormalities 523
- Energy Recruitment of Normal and Abnormal Gait 523
- Stair Negotiation 525
- Phases of Stair Negotiation 527
- Kinetics of Stair Ascent and Descent 528

Chapter 28 Skilled Movements534–547*Neha Mukkamala, Purvi Patel*

- Introduction 535
- Components 535
- Skilled Movement in Day-To-Day Activities 535
- Reach-to-Grasp Movement 535
- Sit-to-Stand 537
- Stair Ascent and Descent 539
- Lifting Objects from the Floor 542

Chapter 29 Clinical Applications548–553

Heli Salvi, Sakshi Jaiswal

- Introduction 549
- Clinical Applications 549
- Physiotherapy Implications 551

Chapter 30 Work Ergonomics554–566

Nithin Ravindran Nair, Anisha Devendra Gulati, Sandesh Bhaguram Sakpal

- Introduction 555
- Design of Workstations and Tools 555
- Analysis of Work Tasks 556
- Work Biomechanics and Related Musculoskeletal Disorders 557
- Future Trends in Work Biomechanics 561

Glossary 567–569

Index 571
