<i>Foreword by Maj Gen (Dr) Vibha Dutta</i>	<i>v</i>
<i>Foreword by Dr Deepak B. Sexena</i>	<i>vii</i>
<i>Preface</i>	<i>ix</i>
Part I: Foundations of Data Visualization in Health	1–58
1. Why Visualize Health Data?	3
2. Types of Health Data and Visualization Objectives	15
3. Principles of Good Data Visualization	27
4. Matching Visualization to Data and Research Questions	38
Part II: Core Graphical Tools for Health Data	59–120
5. Bar and Column Charts	63
6. Pie, Donut, and Waffle Charts	71
7. Histograms and Kernel Density Plots	76
8. Box Plots, Violin Plots, and Raincloud Plots	82
9. Scatter Plots and Correlation Matrices	88
10. Bubble Charts and Dot Plots	93
11. Time-Series and Trend Plots	97
12. Control Charts and Funnel Plots	103
13. Forest Plots and Meta-Analysis Visuals	108
14. Kaplan-Meier and Cox Regression Curves	112
15. ROC Curves, Calibration Plots, Decision Curves	116
Part III: Advanced Visualization Techniques	121–160
16. Heatmaps and Treemaps	123
17. Sankey Diagrams and Flow Charts	129
18. Radar Charts and Spider Graphs	136
19. Infographics for Public Health Messaging	143
20. Dashboards and Interactive Reporting	150
Part IV: Geospatial Visualization in Health Research	161–225
21. Basics of GIS in Health Research	165
22. Choropleth Maps and Graduated Symbol Maps	176
23. Kernel Density Maps and Hotspot Analysis	185
24. Spatial Interpolation and Kriging	198
25. Geo-coded Survey Data and Health Facility Mapping	205
26. Time-enabled Maps and Animated Cartography	212
27. Using QGIS, ArcGIS, and R for Spatial Analysis	220
Part V: Software Tools and Implementation	227–257
28. Graphing in Excel, SPSS, and STATA	229
29. ggplot2 and Tidyverse in R	235
30. Python (Seaborn, Matplotlib, Plotly)	239
31. Interactive Visuals with Power BI, Tableau, Shiny	244
32. Visualizing Qualitative Data	249
33. Data Reproducibility and Open Science	254
