| <i>Preface to the First Edition</i>  | <i>vi</i>  |
| <i>Preface to the Second Edition</i> | <i>vii</i> |

## General Microbiology

|                                                  |     |
|--------------------------------------------------|-----|
| 1. Introduction and History of Microbiology      | 1   |
| 2. Microscopy and Staining                       | 6   |
| 3. Taxonomy of Microorganisms                    | 14  |
| 4. Morphology of Bacteria                        | 16  |
| 5. Physiology of Bacteria                        | 26  |
| 6. Genetics of Bacteria                          | 31  |
| 7. Sterilisation and Disinfection                | 49  |
| 8. Culture Media                                 | 61  |
| 9. Culture Methods                               | 68  |
| 10. Laboratory Diagnosis of Bacterial Infections | 74  |
| 11. Normal Microbial Flora of Human Body         | 85  |
| 12. Infection and Infectious Diseases            | 89  |
| 13. Pathogenicity or Virulence of Microbes       | 95  |
| 14. Bacterial Growth Products                    | 98  |
| 15. Bio-Medical Waste (BMW) Management           | 100 |
| 16. Laboratory Animals                           | 102 |

## Immunology

|                                                          |     |
|----------------------------------------------------------|-----|
| 17. Immunity                                             | 104 |
| 18. Immunising Agents and National Immunisation Schedule | 109 |
| 19. Antigen (Ag)                                         | 113 |
| 20. Antibody (Ab) – Immunoglobulin (Ig)                  | 117 |
| 21. Antigen–antibody (Ag–Ab) Reactions                   | 124 |
| 22. Complement System                                    | 143 |
| 23. Structure and Function of Immune System              | 148 |
| 24. Immune Response (Ir)                                 | 158 |
| 25. Hypersensitivity                                     | 167 |
| 26. Immuno Deficiency Diseases (IDDs)                    | 175 |
| 27. Autoimmunity                                         | 179 |
| 28. Immunology of Transplantation and Malignancy         | 183 |
| 29. Immunohaematology                                    | 186 |

### Systemic Bacteriology

#### Gram-positive cocci (GPC)

|                      |     |
|----------------------|-----|
| 30. Micrococcaceae   | 188 |
| 31. Streptococcaceae | 197 |
| 32. Pneumococcus     | 204 |

#### Gram-negative cocci (GNC)

|                                          |     |
|------------------------------------------|-----|
| 33. Neisseriae, Moraxellaceae and Mimeae | 208 |
|------------------------------------------|-----|

#### Gram-positive bacilli (GPB)

|                                        |     |
|----------------------------------------|-----|
| 34. Corynebacterium                    | 217 |
| 35. Bacillaceae (Sporing Aerobes)      | 223 |
| 36. Clostridium (Sporing Anaerobes)    | 228 |
| 37. <i>Mycobacterium Tuberculosis</i>  | 238 |
| 38. <i>Mycobacterium Leprae</i>        | 245 |
| 39. Non-tuberculous Mycobacteria (NTM) | 249 |
| 40. Listeria and Erysipelothrix        | 252 |
| 41. Actinomycetales                    | 254 |

#### Gram-negative bacilli (GNB)

|                                                                                  |     |
|----------------------------------------------------------------------------------|-----|
| 42. Enterobacteriaceae-I ( <i>E. coli</i> , <i>Klebsiella</i> , <i>Proteus</i> ) | 257 |
| 43. Enterobacteriaceae-II ( <i>Salmonella</i> )                                  | 267 |
| 44. Enterobacteriaceae-III ( <i>Shigella</i> )                                   | 275 |
| 45. Enterobacteriaceae-IV ( <i>Yersinia</i> )                                    | 278 |
| 46. Vibrionaceae, <i>Aeromonas</i> and <i>Plesiomonas</i>                        | 284 |
| 47. Campylobacterales                                                            | 293 |
| 48. Non-fermenters                                                               | 297 |
| 49. Pasteurellales                                                               | 303 |
| 50. <i>Bordetella</i>                                                            | 308 |
| 51. <i>Brucella</i>                                                              | 312 |
| 52. Miscellaneous GNB                                                            | 315 |

#### Miscellaneous bacteria

|                                                          |     |
|----------------------------------------------------------|-----|
| 53. Non-sporing Anaerobes                                | 323 |
| 54. Spirochetes                                          | 326 |
| 55. Mycoplasmatales                                      | 337 |
| 56. Chlamydiales                                         | 341 |
| 57. Rickettsiales, <i>Coxiella</i> and <i>Bartonella</i> | 348 |

### Virology

#### General Virology

|                                              |     |
|----------------------------------------------|-----|
| 58. General Properties of Viruses            | 354 |
| 59. Virus-host Interactions                  | 362 |
| 60. Laboratory Diagnosis of Viral Infections | 366 |
| 61. Bacteriophage                            | 371 |

**DNA viruses**

|                                                                                      |     |
|--------------------------------------------------------------------------------------|-----|
| 62. Poxviridae                                                                       | 372 |
| 63. Herpesviridae                                                                    | 377 |
| 64. Other DNA Viruses (Hepadnaviridae, Adenoviridae, Papovaviridae and Parvoviridae) | 387 |

**RNA viruses**

|                                 |     |
|---------------------------------|-----|
| 65. Picornaviridae              | 394 |
| 66. Orthomyxoviridae            | 403 |
| 67. Paramyxoviridae             | 411 |
| 68. Arboviruses and Roboviruses | 420 |
| 69. Rhabdoviridae               | 442 |
| 70. Hepatitis Viruses           | 448 |
| 71. Retroviridae                | 461 |
| 72. Other RNA Viruses           | 473 |
| 73. Oncogenic Viruses           | 485 |

**Mycology**

|                                               |     |
|-----------------------------------------------|-----|
| 74. General Properties of Fungus              | 487 |
| 75. Laboratory Diagnosis of Fungal Infections | 491 |
| 76. Superficial Mycoses                       | 496 |
| 77. Deep Mycoses                              | 504 |
| 78. Miscellaneous Topics in Mycology          | 520 |

**Parasitology****General Parasitology**

|                                                  |     |
|--------------------------------------------------|-----|
| 79. Introduction and Classification of Parasites | 523 |
| 80. Laboratory Diagnosis of Parasitic Infections | 527 |

**Protozoa**

|                                              |     |
|----------------------------------------------|-----|
| 81. General Properties of Protozoa           | 532 |
| 82. Amoebae                                  | 535 |
| 83. Intestinal, Oral and Genital Flagellates | 551 |
| 84. Blood and Tissue Flagellates             | 556 |
| 85. Ciliata                                  | 573 |
| 86. Blood Inhabiting Sporozoa                | 576 |
| 87. Gastrointestinal Sporozoa                | 602 |
| 88. Microspora and Unclassified Protozoa     | 618 |

**Metazoa (Helminths/Worms)**

|                                                   |     |
|---------------------------------------------------|-----|
| 89. General Properties of Metazoa                 | 621 |
| Cestodes                                          |     |
| 90. Cestodes: General Features and Classification | 622 |
| 91. Cestodes: Pseudophyllidea                     | 626 |
| 92. Cestodes: Cyclophyllidea                      | 632 |

## Trematodes

|                                                     |     |
|-----------------------------------------------------|-----|
| 93. Trematodes: General Features and Classification | 655 |
| 94. Trematodes: Dioecious Trematodes                | 661 |
| 95. Trematodes: Monoecious Trematodes               | 671 |

## Nematodes

|                                                    |     |
|----------------------------------------------------|-----|
| 96. Nematodes: General Features and Classification | 686 |
| 97. Nematodes: Intestinal Nematodes                | 690 |
| 98. Nematodes: Somatic (Tissue) Nematodes          | 720 |
| 99. Miscellaneous Topics in Parasitology           | 742 |

**Clinical Microbiology**

|                                        |     |
|----------------------------------------|-----|
| 100. Health Care Associated Infections | 746 |
| 101. Systemic Infections               | 748 |

**Practical Microbiology and MCQs**

|                                                      |     |
|------------------------------------------------------|-----|
| 102. Exercise and Specimens in Practical Examination | 754 |
| 103. MCQs                                            | 756 |

|                      |     |
